# Contents

Preface	vii
1 The Atmospheric Aerosol	1
2 Scattering in the Atmosphere	33
3 Solar Radiation and Its Disposition in the Atmosphere	63
4 Principles of Atmospheric Thermal Radiation	107
5 Radiative Transfer and the Radiation Budget of the Atmosphere	149
6 The Nucleation of Water and Ice in the Atmosphere	199
7 Growth Processes of Water Drops and Ice Particles	233
8 Precipitation Processes	283
9 Common Optical Phenomena in the Atmosphere	325

<b>10</b>	
<b>Atmospheric Electricity</b>	<b>361</b>
<b>Appendix: Some Useful Constants and Numerical Parameters</b>	<b>409</b>
<b>References</b>	<b>415</b>
<b>Index</b>	<b>431</b>
