# Contents

<i>Preface</i>	ix
<i>Symbols</i>	xi
<i>Abbreviations</i>	xvii
<b>1 The atmospheric boundary layer</b>	<b>1</b>
1.1 Introduction	1
1.2 History	3
1.3 Observing the ABL	5
1.4 ABL modelling	5
1.5 Applications	6
1.6 Scope of the book	7
1.7 Nomenclature and some definitions	8
Notes and bibliography	12
<b>2 Basic equations for mean and fluctuating quantities</b>	<b>15</b>
2.1 Turbulence and flow description	15
2.2 Governing equations for mean and fluctuating quantities	20
2.3 The simplified mean equations	25
2.4 The turbulence closure problem	26
2.5 The second-moment equations	29
2.6 Turbulent kinetic energy and stability parameters	32
Notes and bibliography	38
<b>3 Scaling laws for mean and turbulent quantities</b>	<b>40</b>
3.1 The wind profile: simple considerations	40
3.2 Wind profile laws: the neutral case	42
3.3 Monin–Obukhov similarity theory: the non-neutral surface layer	49
3.4 Generalized ABL similarity theory	60
3.5 Similarity theory and turbulence statistics	70
Notes and bibliography	82
<b>4 Surface roughness and local advection</b>	<b>85</b>
4.1 Aerodynamic characteristics of the land	85

4.2	Scalar roughness lengths	89
4.3	The vegetation canopy	93
4.4	Flow over the sea	97
4.5	Local advection and the internal boundary layer	104
	Notes and bibliography	113
<b>5</b>	<b>Energy fluxes at the land surface</b>	<b>115</b>
5.1	Surface energy balance and soil heat flux	115
5.2	Radiation fluxes	120
5.3	Evaporation	125
5.4	Condensation	139
	Notes and bibliography	143
<b>6</b>	<b>The thermally stratified atmospheric boundary layer</b>	<b>145</b>
6.1	The convective boundary layer	145
6.2	The stable (nocturnal) boundary layer	164
6.3	The marine atmospheric boundary layer	182
6.4	Mesoscale flow and IBL growth	186
	Notes and bibliography	191
<b>7</b>	<b>The cloud-topped boundary layer</b>	<b>193</b>
7.1	General properties of the CTBL	194
7.2	Observations	200
7.3	Radiation fluxes and cloud-top radiative cooling	207
7.4	Entrainment and entrainment instability	212
7.5	Numerical modelling of the CTBL	216
	Notes and bibliography	222
<b>8</b>	<b>Atmospheric boundary-layer modelling and parameterization schemes</b>	<b>224</b>
8.1	Introduction	224
8.2	Surface temperature	226
8.3	Surface humidity (soil moisture)	229
8.4	Canopy parameterization	235
8.5	Surface fluxes	243
8.6	Rate equation for ABL depth	244
8.7	Turbulence closure schemes	245
8.8	ABL cloud parameterization	256
	Notes and bibliography	257
<b>9</b>	<b>The atmospheric boundary layer, climate and climate modelling</b>	<b>258</b>
9.1	Introduction	258
9.2	Sensitivity of climate to the ABL and to land surface	262
9.3	Research priorities	267
	Notes and bibliography	277
	<i>Appendices</i>	279
	<i>References</i>	294
	<i>Index</i>	311
