

PROCEEDINGS OF
THE FIRST SINO-AMERICAN WORKSHOP ON
MOUNTAIN METEOROLOGY

BEIJING, 18-23 MAY, 1982

CHAIRMEN: TAO SHIYEN, ELMAR R. REITER, GAO YOUXI

SPONSORED BY ACADEMIA SINICA

AND BY THE U.S. NATIONAL ACADEMY OF SCIENCES,

COMMITTEE ON SCHOLARLY COMMUNICATIONS

WITH THE PEOPLE'S REPUBLIC OF CHINA

EDITORS:

ELMAR R. REITER

COLORADO STATE UNIVERSITY, FT. COLLINS, COLORADO

ZHU BAOZHEN

ACADEMIA SINICA

QIAN YONGFU

ACADEMIA SINICA

SCIENCE PRESS, BEIJING

AMERICAN METEOROLOGICAL SOCIETY

BOSTON, MASSACHUSETTS

1983

CONTENTS

	Page
OPENING CEREMONY	1
0.1 Opening Address, Ye Duzheng	3
0.2 Introductory Remarks, Elmar R. Reiter	5
SESSION I - PLANETARY AND LARGE-SCALE EFFECTS OF MOUNTAINS ON GENERAL CIRCULATION AND CLIMATE: OBSERVATIONAL ASPECTS	9
1.1 Thermal Effects of the Tibet Plateau on Atmospheric Circulation Systems, Elmar R. Reiter	11
1.2 Influences of Land-Sea Topography Distributions on the Temperature Field in July, Gao Youxi et al.	37
1.3 The Effects of the Land-Sea Distribution and of the Plateau on the Mean Meridional Circulation at Low Latitudes in July, Luo Siwei et al.	57
1.4 Orographic Rain on the Western Ghats, Ronald B. Smith and Yuhlang Lin	71
1.5 Wind and Temperature Changes Over Eurasia During the Onset and Withdrawal of the Summer Monsoon of 1979, Ding Yihui et al.	99
1.6 Annulus Simulation of the Northern Summer Mean General Circulation and Comparative Study of Flow Pattern Characteristics Over Eastern Asia, Sung Chengshan et al.	115
SESSION II - PLANETARY AND LARGE-SCALE EFFECTS OF MOUNTAINS ON GENERAL CIRCULATION AND CLIMATE: THEORETICAL ASPECTS	133
2.1 The Effects of Mountains on the Atmospheric General Circulation and Climate, W. Lawrence Gates	135
2.2 Comparison Between the Winter and Summer Response of the Northern Hemispheric Model Atmosphere to Forcing by Topography and Stationary Heat Sources, Huang Ronghui	175
2.3 The Effects of Topography on the Stationary Planetary Waves in Winter and Summer, Lin Benda	205
SESSION III: PLANETARY AND LARGE-SCALE EFFECTS OF MOUNTAINS ON GENERAL CIRCULATION AND CLIMATE: NUMERICAL MODELLING . .	241
3.1 Numerical Experiments with the Sichuan Flooding Catastrophe (11-15 July 1981), John B. Hovermale	243

3.2	On the Atmospheric Heat Source Over Asia and Its Relation to the Formation of the Summer Circulation, Chen Longxun et al.	265
3.3	Numerical Experiments Simulating the Effects of Heat Sources and Orography in East Asia on the Seasonal Changes in Atmospheric Circulation, Wang Anyu et al.	291
3.4	Orographically Induced Vortex Centers, Isidoro Orlanski	311
3.5	Numerical Simulation of Development of Monsoon Circulation in July, H.L. Kuo and Qian Yongfu	341
3.6	A Numerical Experiment on the Dynamic and Thermal Effects of the Qinghai-Xizang (Tibet) Plateau in Summer, Ji Liren et al.	355
3.7	The Mean Wind Structure of the Baroclinic, Convective Boundary Layer, J.C. Wyngaard	371
3.8	The Role of Stationary and Transient Waves in Seasonal Forcing of the Buildup of the Tibetan High, Zhu Baozhen et al.	397
3.9	Monthly Mean Heating Fields of the Atmosphere and Their Annual Variation Over Asia and the Qinghai-Xizang Plateau, Yao Lanchang and Luo Siwei	413
SESSION IV - MESOSCALE EFFECTS OF MOUNTAINS ON HEAVY RAINFALL AND SEVERE LOCAL STORMS: OBSERVATIONAL ASPECTS		423
4.1	An Episode of Mesoscale Convective Complexes That Formed to the Lee of the Colorado Rocky Mountains, William R. Cotton	425
4.2	Some Observational Evidence of the Influence of Topography on Severe Rainstorms in China, Cai Zeyi and Li Jishun	457
4.3	The Influence of Mt. Liupan on Hail Processes Over the Pingliang District in China, Qu Zhang	473
4.4	Conceptual and Numerical Models of the Evolution of the Environment of Severe Local Storms, Richard A. Anthes and Toby N. Carlson	483
4.5	A Comparative Numerical Simulation of the Sichuan Flooding Catastrophe (11-15 July 1981), Richard A. Anthes and Philip Haagenson	519
4.6	Topographic Effects on Heavy Rainfall in the Dongting Lake Drainage Area, Zhang Yan	525

4.7	On the Gravity Wave of Jet Type in the Planetary Boundary Layer and the Formation of Heavy Rain, Yu Zhihao and Chen Liangdong	539
4.8	A Brief Analysis and Numerical Simulation of the Sichuan Extraordinarily Heavy Rainfall Event in 1981, Zhou Xiaoping and Hu Xingfang	555
	SESSION V - MOUNTAIN-VALLEY CIRCULATIONS AND THEIR EFFECTS ON METEOROLOGICAL FIELDS	567
5.1	Stably Stratified Moist Airflow Over Mountainous Terrain, Douglas K. Lilly and Dale R. Durran	569
5.2	Numerical Model for a Large-Scale Mountain-Valley Breeze on a Plateau, Sang Jianguo and Elmar R. Reiter	609
5.3	Slope Winds, Fu Baopu	631
5.4	Selected Topics on the Parameterization of Cumulus Convection, Bruce A. Albrecht	647
5.5	A Study of the Influence of Orography on Diurnal Variations of Temperature, Pressure, Wind Velocity, Precipitation, Relative Humidity and Duration of Sunshine, Lin Zhiguang	665
5.6	The Atmospheric Turbidity and Its Effects on Solar Radiation Over a City in a Valley During Winter, Shen Zhibao et al.	683
	SUMMARY AND RECOMMENDATIONS OF DISCUSSION GROUPS	697
