HANDBOOK OF METEOROLOGY

EDITED BY

F. A. BERRY, JR.

*Captain, U.S.N., Officer-in-Charge, U.S. Navy
Weather Central, Washington, D.C.*

E. BOLLAY

Lieutenant Commander, U.S.N.R.

NORMAN R. BEERS

FIRST EDITION
FOURTH IMPRESSION

New York

London

McGRAW-HILL BOOK COMPANY, INC.

1945

~~INSTITUT F. MET. U. KLIMAT.
TECHN. HOCHSCHULE HANNOVER~~

B 38

CONTENTS

For the detailed contents of any section consult the title page of that section. For the alphabetical index see pp. 1057 to 1068.

	SECTION	PAGE
PREFACE.		v
LIST OF CONTRIBUTORS		vii
NUMERICAL AND GRAPHICAL DATA	I	1
METEOROLOGICAL MATHEMATICS AND CALCULATIONS	II	123
PHYSICS OF ATMOSPHERIC PHENOMENA.	III	241
RADIATION.	IV	283
METEOROLOGICAL THERMODYNAMICS AND ATMOSPHERIC STATICS	V	313
KINEMATICS AND DYNAMICS OF FLUID FLOW	VI	411
THE SCIENTIFIC BASIS OF MODERN METEOROLOGY	VII	501
METEOROLOGICAL INSTRUMENTS	VIII	531
TRANSMISSION AND PLOTTING OF METEOROLOGICAL DATA	IX	573
SYNOPTIC METEOROLOGY AND WEATHER FORECASTING	X	601
CLOUDS AND STATES OF THE SKY	XI	881
CLIMATOLOGY.	XII	927
HYDROMETEOROLOGY	XIII	999
OCEANOGRAPHY.	XIV	1029
INDEX.		1057

SECTION I
NUMERICAL AND GRAPHICAL DATA

BY NORMAN R. BEERS
AND THE AEROLOGICAL ENGINEERING STAFF, POSTGRADUATE SCHOOL,
UNITED STATES NAVAL ACADEMY

CONTENTS

	Page
Mathematical Tables.....	3
Units and Measures.....	25
Physical Data.....	34
Meteorological Tables and Graphs	
Wind.....	47
Thermodynamics.....	70
Pressure.....	83
Atmospheric Statics.....	105
General.....	113
Bibliography.....	121

SECTION II
**METEOROLOGICAL MATHEMATICS
AND CALCULATIONS**

BY **FREDERICK A. FICKEN**

CONTENTS

1. Real Numbers.....	124
2. Computation.....	128
3. Elementary Geometry.....	138
4. Formal Algebra.....	143
5. Trigonometry.....	148
6. Solution of Equations.....	155
7. Analytic Geometry.....	160
8. Differential Calculus.....	173
9. Integral Calculus.....	191
10. Functions of Several Variables.....	199
11. Differential Equations.....	212
12. Vector Analysis.....	219
13. Mechanics.....	225
14. Empirical Data and Statistics.....	232

SECTION III
PHYSICS OF ATMOSPHERIC PHENOMENA

BY H. G. HOUGHTON, S. C. LOWELL, AND K. B. McEACHRON

CONTENTS

Visibility, <i>by</i> H. G. Houghton.....	242
Condensation and Precipitation, <i>by</i> S. C. Lowell.....	252
Lightning and Lightning Protection, <i>by</i> K. B. McEachron.....	264

SECTION IV

RADIATION

By J. CHARNEY

CONTENTS

Introduction and Definitions.....	284
Solar Radiation.....	292
Terrestrial Radiation.....	297
Elsasser Radiation Chart.....	301
Synoptic Applications.....	305

SECTION V

METEOROLOGICAL THERMODYNAMICS AND ATMOSPHERIC STATICS

BY NORMAN R. BEERS

CONTENTS

Introduction and First Law.....	314
Second Law, Temperature, and Entropy.....	320
Equation of State and Thermodynamic Coordinates.....	326
Specific Heats.....	329
Thermometry and Thermometric Substances.....	332
Properties of Pure Substances.....	337
Properties of Gases.....	345
Thermodynamic Properties of the Earth's Atmosphere.....	351
Thermodynamic Diagrams and Calculations.....	361
Pressure, Temperature, and Altitude in the Atmosphere.....	371
Meteorological Temperatures.....	381
Miscellaneous Thermodynamic Charts and Processes:	
Rossby Diagram.....	390
Multipressure Hygrometric Chart.....	391
Amount of Precipitable Water.....	392
Rates of Precipitation.....	393
Isobaric Cooling of Saturated Air.....	393
Mixing of Two or More Air Masses.....	395
Thorough Stirring of a Bounded Stratum.....	398
Conservative Properties and Air-mass Identification.....	400
Stability and Instability.....	402
Ascent or Descent of a Layer and Effect on Lapse Rate.....	405
General Aspects of Viscosity.....	408

SECTION VI

KINEMATICS AND DYNAMICS OF FLUID FLOW

BY H. J. STEWART

CONTENTS

1. Introduction.....	412
2. Frontogenesis and Frontolysis.....	413
3. Kinematical Analysis of the Pressure Field.....	419
4. The Dynamical Principles.....	425
5. Circulation and Vorticity.....	431
6. Atmospheric Wind Systems.....	435
7. Surfaces of Discontinuity.....	441
8. General Effects of Viscosity.....	446
9. The Wind Structure and Turbulence near the Earth's Surface.....	453
10. Diffusion of Properties by Eddies.....	461
11. Energy Changes in Atmospheric Wind Systems.....	469
12. Perturbation Theory.....	474
13. Atmospheric Tidal Motions.....	483

SECTION VII

THE SCIENTIFIC BASIS OF MODERN METEOROLOGY

By C.-G. ROSSBY

CONTENTS

	PAGE
Convective Circulation.....	502
Meridional (North-and-South) Circulation.....	505
Influence of the Earth's Rotation.....	507
Planetary Flow Patterns and the Stability of Zonal Circulation.....	513
Intensity Fluctuations in Zonal Circulation and the Circulation Index.....	520
Influence of Land Masses and Oceans on the Circulation Pattern.....	521

SECTION VIII
METEOROLOGICAL INSTRUMENTS

BY LOUVAN E. WOOD

CONTENTS

	PAGE
Introduction.....	532
Barometers.....	532
Barographs.....	537
Thermographs.....	538
Hygrographs.....	539
Thermometers.....	540
Psychrometers.....	542
Wind Instruments.....	544
Precipitation Gauges.....	555
Sunshine-duration Transmitter.....	557
Quadruple Recorder.....	558
Determination of Upper Wind by Pilot-balloon Observations.....	559
Ceiling-height Instruments.....	562
Aerometeorograph.....	563
Radiosonde Equipment.....	563
Exposure of Instruments.....	569
Automatic Weather Stations.....	570
Calibration and Test Equipment.....	571
Bibliography.....	572

SECTION IX
**TRANSMISSION AND PLOTTING OF
METEOROLOGICAL DATA**

BY GEORGE R. JENKINS

CONTENTS

Meteorological Codes.....	574
Plotting Weather Charts.....	594
Meteorological Maps.....	598
Time.....	599

SECTION X
**SYNOPTIC METEOROLOGY AND WEATHER
 FORECASTING**

BY F. A. BERRY, JR., E. BOLLAY, J. F. O'CONNOR, NORMAN R. BEERS,
 GEORGE R. JENKINS, R. A. BAUMGARTNER, CIVILIAN STAFF,
 INSTITUTE OF TROPICAL METEOROLOGY, RIO PIEDRAS,
 PUERTO RICO, VINCENT J. OLIVER,
 AND MILDRED B. OLIVER

CONTENTS

	PAGE
Historical Background, by E. Bollay.....	603
Air Masses, by F. A. Berry, Jr., and E. Bollay	
Source Regions.....	604
Classification of Air Masses.....	607
General Characteristics of Air Masses.....	608
Characteristic Air Mass Properties over North America.....	608
Weather and Flying Conditions in North American Air Masses.....	621
Characteristic Air-mass Properties over Europe.....	628
Characteristic Air-mass Properties over Asia.....	634
Characteristic Air-mass Properties in the Southern Hemisphere.....	636
Fronts, by E. Bollay	
Classification of Fronts.....	638
Warm Fronts.....	641
Cold Fronts.....	645
Influence of Mountain Ranges.....	651
Overrunning Cold Fronts.....	653
Occluded Fronts.....	656
Cyclones and Anticyclones, by E. Bollay	
Cyclones.....	658
Anticyclones.....	666
Displacement of Pressure Systems, by J. F. O'Connor.....	669
Upper-air Conditions, by E. Bollay.....	675
Atmospheric Stability and Instability, by Norman R. Beers	
General Principles, Slice Method (\bar{C}).....	693
Procedures and Techniques of Analysis for Cumulus Activity.....	703
Thunderstorms and Thunderstorm Forecasting.....	712
Examples of Analysis and Forecast.....	716
Fog and Fog Forecasting, by J. F. O'Connor.....	727

Evaporation and Distribution of Water Vapor in the Atmosphere, by Norman R. Beers.....	737
Diurnal Variation of the Meteorological Elements, by George R. Jenkins	
Pressure.....	746
Wind.....	749
Temperature.....	750
Humidity of Surface Air.....	751
Cloudiness.....	751
Precipitation.....	752
Visibility.....	752
Icing on Aircraft, by E. Bollay.....	753
Atmospheric Cross Sections for Flight Operations, by E. Bollay.....	756
Air Trajectories, by R. A. Baumgartner.....	759
Tropical Synoptic Meteorology, by Civilian Staff, Institute of Tropical Meteorology, Rio Piedras, Puerto Rico	
Introduction.....	763
Principles of Tropical Meteorology.....	763
Synoptic Models of the Tropics.....	767
Tropical Analysis.....	780
Tropical Forecasting.....	795
Southern Hemisphere Synoptic Meteorology, by Civilian Staff, Institute of Tropical Meteorology, Rio Piedras, Puerto Rico	
Introduction.....	804
The General Circulation.....	804
Air Masses.....	806
Fronts.....	807
Tropical Meteorology.....	809
Analytical Peculiarities of the Southern Hemisphere.....	810
Forecasting the Weather with the Aid of Upper-air Data, by Vincent J. Oliver and Mildred B. Oliver	
10,000-ft. Winds and Wind Changes.....	813
Frontal Weather from Winds Aloft.....	815
Displacement of Surface Systems by Pressure Changes Aloft.....	819
Deepening and Filling from 10,000-ft. Chart.....	819
Mean Temperatures and Mean-temperature Changes.....	820
Prognostic 10,000-ft Chart.....	821
Construction of Mean Isotherms.....	829
Synoptic Examples.....	831
Construction and Use of Isentropic Charts.....	848
Weather Analysis from Single-station Data, by Vincent J. Oliver and Mildred B. Oliver	
Introduction.....	858
Outline of General Procedure.....	858
Use of Pilot-balloon Data.....	859
Radiosonde and Airplane Observations.....	863
Surface Observations in Single-station Forecasting.....	866
Synoptic Examples.....	867

SECTION XI

CLOUDS AND STATES OF THE SKY

By P. L. SCHERESCHEWSKY

CONTENTS

History and Introduction.....	882
International Classification of the Clouds and States of the Sky.....	884
Definition of Hydrometeors.....	901
Remarks on the International Classification.....	902
Sky Cover.....	903
Nephanalysis.....	903
Practice of Observations of Clouds and of States of the Sky.....	905
Cloud Observations in the Tropics.....	906
Cloud Observations in Temperate Latitudes.....	908
Color of the Sky (Cyanometry)—Haze Layers.....	911
Cloud Photography.....	912
U. S. Weather Bureau Cloud Code Chart.....	915

SECTION XII
CLIMATOLOGY

By H. LANDSBERG

CONTENTS

Introduction.....	928
Planetary (Radiation) Climate.....	929
General Circulation of the Atmosphere.....	937
Continental and Oceanic Influences on Climate.....	945
Influence of Topography on Climate.....	957
Influence of Lakes on Climate.....	961
Influences of Vegetation and Human Activity on Climate.....	962
Scheme of Climatic Controls.....	964
Climatic Variations.....	964
Classification of Climates.....	973
Regional Climates as Related to the Dynamics of the Atmosphere.....	977
Supplementary Climatic Charts.....	987
Bibliography.....	996

SECTION XIII
HYDROMETEOROLOGY

By A. S. FRY AND A. K. SHOWALTER

CONTENTS

Water Project System Operations	
Introduction.....	1000
Meteorology in Water Project System Operations.....	1002
Hydrology in Water Project System Operations.....	1007
Criteria for Water Project Meteorological Forecasts.....	1011
Quantitative Determinations of Maximum Rainfall	
Historic Background.....	1015
Analytic.....	1015
Geometric.....	1016
Dynamic.....	1017
Bibliography.....	1027

SECTION XIV
OCEANOGRAPHY

By. H. U. SVERDRUP

CONTENTS

Physical Properties of Sea Water.....	1030
Currents in the Ocean.....	1034
Sea-surface Temperatures.....	1041
Ice in the Sea.....	1043
Evaporation and Heat Exchange.....	1044
Interaction between the Ocean and the Atmosphere.....	1045
Surface Waves.....	1049
Empirical Knowledge of Wind Waves and Swell.....	1054
