The Measurement of Turbulent Fluctuations

An Introduction to Hot-Wire Anemometry
and Related Transducers

Springer-Verlag
Berlin Heidelberg New York

A.V. Smol'yakov and V.M. Tkachenko

The Measurement of Turbulent Fluctuations

An Introduction to Hot-Wire
Anemometry and Related Transducers

Translated by S. Chomet, King's College London
Edited by P. Bradshaw, Imperial College London

With 95 Figures

Springer-Verlag
Berlin Heidelberg New York 1983

Contents

Chapter One STATISTICAL DESCRIPTION OF TURBULENCE

1.1	Turbulence as a Random Process	1
1.2	Statistical Averages of Random Variables	5
1.3	Stationarity and Homogeneity	17
1.4	Spectral Decomposition	23
1.5	Connection Between Correlation and Spectral Functions	31
1.6	The Equations of Turbulences	42

Chapter Two MEASUREMENT OF TURBULENT FLUCTUATIONS

2.1	Modeling of Statistical Characteristics of Turbulent Fluctuations	46
2.2	Experimental Systems	56
2.3	Thermo-anemometry (Hot-wire and Hot-film)	65
2.4	Doppler method	78
2.5	Other Methods of Measuring Turbulent Fluctuations	86
2.6	Instrumental Processing of Recorded Fluctuations	94
2.7	Experimental Uncertainties	109

Chapter Three TRANSDUCERS OF FINITE SIZE IN TURBULENT FLUCTUATIONS

3.1	General Relationships	129
3.2	Spatial and Wave Characteristics of Simple Transducers	146
3.3	A System of Transducers as Frequency Filter	174
3.4	Correction Functions for a Field of Velocity Fluctuations	194

Chapter Four STATISTICAL MODELS OF TURBULENT FIELDS

4.1	Models of the Field as a Basis for Correcting the Results of Measurements	212
4.2	Corcos Model of the Turbulent Pressure Field and Its Simplest Modifications	220
4.3	Departure from Multiplication Hypothesis	224
4.4	Diffusion Model	235
4.5	Convection Model	239
4.6	Phase Velocity of Cross-Spectrum	251

Chapter Five CORRECTION FUNCTIONS FOR THE PRESSURE FLUCTUATION FIELD

5.1	Power Spectrum	257
5.2	The Cross-Spectrum	268
5.3	Measurements with Wave Filters	282
