

# Remote sounding of atmospheres

---

J. T. HOUGHTON

*Director General, Meteorological Office, Bracknell*

F. W. TAYLOR

*Head, Department of Atmospheric Physics, University of Oxford*

C. D. RODGERS

*Lecturer, Department of Atmospheric Physics, University of Oxford*

CAMBRIDGE UNIVERSITY PRESS

*Cambridge*

*London New York New Rochelle*

*Melbourne Sydney*

## CONTENTS

<i>Preface</i>		
1	Introduction	1
2	Platforms in space	9
3	Visible, infrared and microwave imaging	29
4	Radiation budget measurements	47
5	Principles of remote temperature sounding	64
6	Instruments for remote temperature sounding	79
7	Retrieval theory	119
8	Remote temperature sounding for weather forecasting	151
9	Stratospheric and mesospheric temperature measurements	163
10	Minor constituent abundance measurements	183
11	Cloud, aerosol and precipitation measurements	212
12	Density, pressure and wind measurement	225
13	Ionospheric measurements	233
14	Remote sounding of the atmospheres of Venus and Mercury	239
15	Remote sounding of the atmosphere of Mars	272
16	Remote sounding in the outer solar system	287
17	Further developments	313
	<i>References</i>	316
	<i>Index and glossary</i>	335
