

Volume 25 Number 5 September-October 1990

# RADIO SCIENCE

*Including Special Section:  
Technical and Scientific Aspects  
of MST Radar*

*Published by the American Geophysical Union*

RADSCAD 25(5) 689-1104(1990)  
ISSN 0048-6604

## Contents

|   |  |     |
|---|--|-----|
| Current flow into a three-dimensionally anisotropic conductor (Paper 90RS00977)   | <i>James R. Wait</i>   | 689 |
| Measurement of waves on a wire parallel to a strip grating of finite width (Paper 90RS00978)                                    | <i>Benjamin Jacard</i>   | 695 |
| Wiener-Hopf analysis of the asymmetric slotline (Paper 90RS01157)   | <i>Ramakrishna Janaswamy</i>   | 699 |
| Scattering by randomly irregular narrow strips of constant width (Paper 90RS000984)   | <i>Cornel Eftimiu</i>  | 707 |
| Transverse electric wave scattering by two-dimensional surfaces of arbitrary shape in the presence of a wedge (Paper 90RS00645) | <i>Dalian Zheng, Krzysztof A. Michalski, Kelly J. Crowell, and Robert D. Nevels</i>  | 721 |
| Application of the bymoment method to electromagnetic scattering from multiple cylinders (Paper 90RS01103)                      | <i>Robert Lee and Andreas C. Cangellaris</i>   | 731 |
| Numerical simulation of solar wind density fluctuations and their effects on VLF radio interferometry (Paper 90RS00954)         | <i>Robert S. Williamson III and Dayton L. Jones</i>  | 743 |
| Modeling the $F_2$ layer peak height in terms of atmospheric pressure (Paper 90RS01104)   | <i>H. Rishbeth and R. Edwards</i>  | 757 |
| Application of computerized tomography to the investigation of ionospheric structures (Paper 90RS01155)                         | <i>T. D. Raymond, J. R. Austen, S. J. Franke, C. H. Liu, J. A. Klobuchar, and J. Stalker</i>   | 771 |
| Frequency dependence of Doppler shift for type III coherent radar echoes (Paper 90RS00504)                                      | <i>J. A. Koehler, G. J. Sofko, J. Watermann, A. G. McNamara, D. McDiarmid, D. André, P. Prikryl, M. McKibben, and K. H. Helgason</i> | 791 |
| Refraction of 50-MHz radar waves in a realistic ionospheric model (Paper 90RS00225)   | <i>Jurgen Watermann</i>  | 805 |
| Sources of high-mid-latitude scintillations in the American zone at 53°N (Paper 90RS01128)                                      | <i>John W. MacDougall</i>  | 813 |
| Some comments on seabed propagation of ULF/ELF electromagnetic fields (Paper 90RS00468)   | <i>Alan D. Chave, Agústa H. Flosadóttir, and Charles S. Cox</i>  | 825 |
| Fresnel-Kirchhoff theory applied to terrain diffraction problems (Paper 90RS00953)  | <i>J. H. Whitteker</i>   | 837 |
| A model for the prediction of differential rain attenuation on adjacent Earth-space propagation paths (Paper 90RS01198)         | <i>J. D. Kanellopoulos and V. A. Houdzoumis</i>  | 853 |
| Measurement of a zonal wind profile on Titan by Doppler tracking of the Cassini entry probe (Paper 90RS01405)                   | <i>D. H. Atkinson, J. B. Pollack, and A. Seiff</i>   | 865 |
| High-latitude irregularity spectra deduced from scintillation measurements (Paper 90RS00946)                                    | <i>A. W. Wernik, C. H. Liu, S. J. Franke, and M. Gola</i>  | 883 |
| <b>Special Section: Technical and Scientific Aspects of MST Radar</b>   |  |     |
| Foreword (Paper 89RS03555)  | <i>C. H. Liu and S. Fukao</i>  | 897 |
| Field tests of a lower tropospheric wind profiler (Paper 89RS03088)   | <i>W. L. Ecklund, D. A. Carter, B. B. Balsley, P. E. Currier, J. L. Green, B. L. Weber, and K. S. Gage</i>                           | 899 |
| Comparison of thermal advection measurements by clear-air radar and radiosonde techniques (Paper 89RS03480)                     | <i>M. Crochet, E. Bazile, and G. Rougier</i>   | 907 |

(continued on inside back cover)

|   |   |      |
|---|---|------|
| Simultaneous observations of the troposphere and lower stratosphere by the Flatland and Urbana ST radars<br>(Paper 89RS03244)                 | <i>G. D. Dester, C. H. Liu, S. J. Franke, and J. L. Green</i>   | 917  |
| Uncertainties in estimates of the mean vertical velocity from MST radar observations (Paper 89RS03410)  | <i>G. D. Nastrom, K. S. Gage, and W. L. Ecklund</i>   | 933  |
| Ultra-high vertical resolution radar measurements in the lower stratosphere at Arecibo (Paper 89RS03460)                                      | <i>H. M. Ierkic, R. F. Woodman, and P. Perillat</i>   | 941  |
| SCIDAR/radar simultaneous measurements of atmospheric turbulence (Paper 89RS03478)  | <i>Jean Vernin, Michel Crochet, Max Azouit, and Ogubazghi Ghebrehbran</i>   | 953  |
| Computer processing for deriving drop-size distributions and vertical air velocities from VHF Doppler radar spectra (Paper 89RS03243)         | <i>Toru Sato, Hiroshi Doji, Hisato Iwai, Iwane Kimura, Shoichiro Fukao, Mamoru Yamamoto, Toshitaka Tsuda, and Susumu Kato</i> | 961  |
| Echo power loss with RASS (radio acoustic sounding system) due to defocusing effects by distorted acoustic wave front (Paper 89RS03255)       | <i>Y. Masuda, J. Awaka, K. Okamoto, T. Tsuda, S. Fukao, and S. Kato</i>   | 975  |
| On the role of parametric instability of internal gravity waves in atmospheric radar observations<br>(Paper 89RS03018)                        | <i>J. Klostermeyer</i>  | 983  |
| Semidiurnal variations in the time scale of irregularities near the Antarctic summer mesopause<br>(Paper 89RS03281)                           | <i>G. J. Fraser and Usman Khan</i>  | 997  |
| Gravity waves in the mesosphere observed with the middle and upper atmosphere radar<br>(Paper 89RS03246)                                      | <i>T. Tsuda, S. Kato, T. Yokoi, T. Inoue, M. Yamamoto, T. E. VanZandt, S. Fukao, and T. Sato</i>                              | 1005 |
| VHF radar observations of mesoscale motions in the troposphere: Evidence for gravity wave Doppler shifting (Paper 89RS03481)                  | <i>R. A. Vincent and S. D. Eckermann</i>  | 1019 |
| Enhanced frequency spectra of winds at the mesoscale based on radar profiler observations<br>(Paper 89RS03109)                                | <i>G. D. Nastrom and K. S. Gage</i>   | 1039 |
| A simple model for the enhanced frequency spectrum of vertical velocity based on tilting of atmospheric layers by lee waves (Paper 89RS03312) | <i>Kenneth S. Gage and Gregory D. Nastrom</i>   | 1049 |
| Range dependence of volume scattering from a fractal medium: Simulation results (Paper 89RS03014)   | <i>Prabhat K. Rastogi and Karl F. Scheuchner</i>  | 1057 |
| Chaotic features of the atmospheric motions near the tropopause revealed by MU radar observation: Case study (Paper 89RS03484)                | <i>Peicai Yang, Da-ren Lu, Wei Li, Beiying Wu, Shoichiro Fukao, Mamoru Yamamoto, Toshitaka Tsuda, and Susumu Kato</i>         | 1065 |
| Signal processing and data analysis in middle atmosphere radar (Paper 89RS03411)  | <i>Prabhat K. Rastogi</i>   | 1071 |
| New quasi-complementary code sets for atmospheric radar applications (Paper 89RS03009)  | <i>Prabhat K. Rastogi and Gregory Sobolewski</i>  | 1087 |
| Effect of signal path distortions on the decoding performance in a pulse compression radar system<br>(Paper 89RS03545)                        | <i>Y. G. K. Patro, K. R. Suresh Nair, and P. Balamuralidhar</i>   | 1095 |
| Fourth International Workshop on the Technical and Scientific Aspects of MST Radars List of Reviewers   |   | 1101 |
