Preface x

Contributing Authors xii

List of Frequently Used Symbols xv

1. ATMOSPHERIC CHEMISTRY AND THE EARTH SYSTEM	1
1.1 Introduction . . . . .	1
1.2 The Earth System . . . . .	5
Further Reading . . . . .	17
Essay: Atmospheric Chemistry and the Earth System by Ralph J. Cicerone	19

## Part 1: Fundamentals

2. ATMOSPHERIC DYNAMICS AND TRANSPORT	23
2.1 Introduction . . . . .	23
2.2 The Governing Equations . . . . .	25
2.3 Constraints on Atmospheric Motion . . . . .	32
2.4 Zonal Means and Eddies . . . . .	44
2.5 Atmospheric Waves . . . . .	53
2.6 Tropospheric Circulation and Transport . . . . .	64
2.7 Stratospheric Circulation and Transport . . . . .	73
2.8 Stratosphere-Troposphere Exchange . . . . .	78
Further Reading . . . . .	80
Essay: Why Understand Dynamics — And What Is “Understanding” Anyway? by Michael E. McIntyre . . . . .	82
3. CHEMICAL AND PHOTOCHEMICAL PROCESSES	85
3.1 Introduction . . . . .	85
3.2 Radiation . . . . .	86
3.3 Photophysical and Photochemical Processes . . . . .	94
3.4 Chemical Reactions . . . . .	95
3.5 Catalytic Cycles . . . . .	106
3.6 Role of Excited States . . . . .	108
3.7 Measurement of Rate Coefficients . . . . .	109
3.8 The Steady State Approximation . . . . .	112

3.9 Lifetimes in the Atmosphere . . . . .	112
Further Reading . . . . .	114
Essay: When Do We Know Enough about Atmospheric Chemistry? by Harold Schiff . . . . .	115
<b>4. AEROSOLS AND CLOUDS</b>	<b>117</b>
4.1 Introduction . . . . .	117
4.2 Overview of the Atmospheric Aerosol . . . . .	117
4.3 The Role of Clouds in Tropospheric Chemistry . . . . .	126
4.4 Single-Particle Physical Characteristics . . . . .	129
4.5 Gas-to-Particle Conversion . . . . .	137
4.6 Acid-Base Reactions of Aerosol Particles . . . . .	141
4.7 Removal Processes Associated with Aerosols . . . . .	142
4.8 Solubility of Gases in Droplets . . . . .	144
4.9 Mass Transfer Rates . . . . .	148
4.10 Aqueous Reactions . . . . .	151
Further Reading . . . . .	154
Essay: Aerosols and Clouds: A Postscript by Richard P. Turco . . . . .	155
<b>5. TRACE GAS EXCHANGES AND BIOGEOCHEMICAL CYCLES</b>	<b>159</b>
5.1 Introduction . . . . .	159
5.2 Surface Exchanges . . . . .	161
5.3 The Global Water Cycle . . . . .	165
5.4 The Global Carbon Cycle . . . . .	167
5.5 The Global Nitrogen Cycle . . . . .	188
5.6 The Global Sulfur Cycle . . . . .	195
5.7 Halogens . . . . .	201
Further Reading . . . . .	203
Essay: The View from Outside by James Lovelock . . . . .	204
 <b>Part 2: Chemical Families</b>	
<b>6. HYDROGEN COMPOUNDS</b>	<b>209</b>
6.1 Importance of Atmospheric Hydrogen Compounds . . . . .	209
6.2 Scope and Definitions . . . . .	210
6.3 Sources of Hydrogen to the Atmosphere . . . . .	210
6.4 Chemistry of Hydrogen Species in the Middle Atmosphere . . . . .	212
6.5 Chemistry of Hydrogen Compounds in the Troposphere . . . . .	216
6.6 Concentrations of Hydrogen Compounds in the Stratosphere . . . . .	220
6.7 Concentrations of Hydrogen Compounds in the Troposphere . . . . .	226
6.8 Summary . . . . .	231
Further Reading . . . . .	232
Essay: Hydrogen Compounds by Dieter Ehhalt . . . . .	233
<b>7. NITROGEN COMPOUNDS</b>	<b>235</b>
7.1 Importance of Atmospheric Odd Nitrogen . . . . .	235
7.2 Scope and Definitions . . . . .	235
7.3 The Role of Odd Nitrogen in the Stratosphere . . . . .	237

7.4 Odd Nitrogen in the "Contemporary" Stratosphere . . . . .	248
7.5 Odd Nitrogen in the Troposphere . . . . .	254
7.6 Experimental Summary of the Influence of Odd Nitrogen in the Continental Boundary Layer . . . . .	276
7.7 NO <sub>3</sub> Chemistry . . . . .	277
7.8 Gaseous Acid and Particulate Nitrate Formation . . . . .	281
7.9 Chemistry of Organic Nitrates . . . . .	282
Further Reading . . . . .	287
Essay: Time's Arrow by Ian Galbally . . . . .	288
<b>8. HALOGEN COMPOUNDS</b>	<b>291</b>
8.1 Introduction . . . . .	291
8.2 Scope and Definitions . . . . .	291
8.3 Sources of Halogens . . . . .	292
8.4 Loss Processes of Halogen Source Gases . . . . .	298
8.5 Inorganic Chemistry of Halogen Species . . . . .	301
8.6 Controlling the Detrimental Effects of Halogens on the Atmosphere: Future Outlook . . . . .	316
Further Reading . . . . .	321
Essay: CFCs and Stratospheric Ozone Depletion by Mario Molina . . . . .	322
<b>9. CARBON-CONTAINING COMPOUNDS</b>	<b>325</b>
9.1 Introduction . . . . .	325
9.2 Scope and Definitions . . . . .	325
9.3 Atmospheric Photochemistry of Hydrocarbons . . . . .	326
9.4 Distribution of Hydrocarbons . . . . .	338
Further Reading . . . . .	345
Essay: Hydrocarbons by Hanwant Singh . . . . .	346
<b>10. SULFUR COMPOUNDS</b>	<b>349</b>
10.1 Introduction . . . . .	349
10.2 Scope and Definitions . . . . .	350
10.3 Sulfur Compounds . . . . .	351
10.4 Tropospheric Chemistry of Sulfur Compounds . . . . .	351
10.5 Measurements of Sulfur Gas Abundances and Distributions . . . . .	361
10.6 SO <sub>2</sub> and Acid Precipitation . . . . .	367
10.7 Stratospheric Sulfur Chemistry . . . . .	368
10.8 Gas-Phase Ionic Chemistry in the Stratosphere . . . . .	370
Further Reading . . . . .	370
Essay: Sulfur, Aerosols, Clouds, and Rain by Robert J. Charlson . . . . .	371
<b>Part 3: Tools</b>	
<b>11. OBSERVATIONAL METHODS: INSTRUMENTS AND PLATFORMS</b>	<b>375</b>
11.1 Introduction . . . . .	375
11.2 Instrumentation for Constituent Measurements . . . . .	375
11.3 Flux Measurements . . . . .	399
11.4 Measurements of Atmospheric Radiation . . . . .	403

11.5 Instrumentation for Aerosol and Cloud Measurements . . . . .	405
11.6 Observing Platforms . . . . .	406
Further Reading . . . . .	419
Essay: From Individual Measurements to Scale Integration Strategies by Gérard Mégie . . . . .	420
<b>12. MODELING</b>	<b>423</b>
12.1 Introduction . . . . .	423
12.2 Model Equations . . . . .	424
12.3 Modeling Chemical Processes . . . . .	427
12.4 Modeling Atmospheric Transport . . . . .	433
12.5 Examples and Illustrations . . . . .	440
12.6 Modeling Global Budgets and Biogeochemical Cycles . . . . .	450
12.7 Data Assimilation . . . . .	454
12.8 Inverse Modeling . . . . .	458
12.9 Chemical-Transport Models in the Future . . . . .	459
Further Reading . . . . .	460
Essay: How Complex Do Models Need to Be? by Henning Rodhe . . . . .	461
 <b>Part 4: Ozone, Climate, and Global Change</b>	
<b>13. TROPOSPHERIC OZONE</b>	<b>465</b>
13.1 Introduction . . . . .	465
13.2 Distribution and Trends . . . . .	467
13.3 Production and Loss of Ozone . . . . .	472
13.4 Major Uncertainties and Research Needs . . . . .	484
Further Reading . . . . .	485
Essay: Tropospheric Ozone by Paul Crutzen . . . . .	486
<b>14. MIDDLE ATMOSPHERIC OZONE</b>	<b>487</b>
14.1 Introduction . . . . .	487
14.2 The Ozone Distribution . . . . .	491
14.3 Ozone Production . . . . .	493
14.4 Ozone Destruction . . . . .	494
14.5 Transport Effects . . . . .	500
14.6 Polar Ozone . . . . .	501
14.7 Ozone Perturbations . . . . .	506
14.8 Impact of Ozone Depletion on UV Radiation . . . . .	509
Further Reading . . . . .	511
Essay: Ozone Depletion: From Pole to Pole by Susan Solomon . . . . .	513
<b>15. ATMOSPHERIC CHEMISTRY AND CLIMATE</b>	<b>515</b>
15.1 Introduction . . . . .	515
15.2 Radiation in the Atmosphere . . . . .	516
15.3 Natural Variations: Past Climates . . . . .	522
15.4 Impact of Anthropogenic Trace Gases on Climate . . . . .	523
15.5 Global Warming Potentials (GWPs) . . . . .	528
15.6 Radiative Effects of Aerosols . . . . .	530

15.7 Response of the Climate System to Radiative Forcing . . . . .	534
Further Reading . . . . .	536
Essay: Can Climate Models Be Validated? by Stephen H. Schneider . . .	537
<b>16. ATMOSPHERIC EVOLUTION AND GLOBAL PERSPECTIVE</b>	<b>539</b>
16.1 Introduction . . . . .	539
16.2 Atmospheric Evolution on Geological Timescales . . . . .	539
16.3 Human Influences on the Atmosphere . . . . .	543
16.4 Future Trends . . . . .	546
16.5 Global Perspective . . . . .	549
Further Reading . . . . .	550
Essay: The Atmospheric Humankind: Our Related Futures by Daniel L. Albritton . . . . .	551
<b>APPENDIXES</b>	<b>553</b>
Appendix A: Physical Constants and Other Data . . . . .	555
Appendix B: Units, Conversion Factors, and Multiplying Prefixes . . . .	558
Appendix C: Atmospheric Parameters and Mixing Ratios of Chemical Constituents . . . . .	560
Appendix D: Chemical Species in the Atmosphere . . . . .	567
Appendix E: Rate Coefficients for Second-Order Gas-Phase Reactions . . .	570
Appendix F: Rate Coefficients for Association Gas-Phase Reactions . . . .	574
Appendix G: Mass Accommodation Coefficients . . . . .	575
Appendix H: Surface Reaction Probability . . . . .	576
Appendix I: Atmospheric Humidity . . . . .	578
Appendix J: Henry's Law Coefficients . . . . .	580
Appendix K: Aqueous Equilibrium Constants . . . . .	581
Appendix L: Rate Coefficients for Aqueous-Phase Reactions . . . . .	582
Appendix M: Spectrum of Solar Extraterrestrial Actinic Flux (120-730 nm)	585
Appendix N: Photolysis Frequencies . . . . .	588
<b>Sample Problems</b>	<b>597</b>
<b>References</b>	<b>615</b>
<b>Index</b>	<b>649</b>
