# Contents

<i>Preface</i>	v
<i>Nomenclature</i>	xi
1 Introduction	1
2 Conservation Equations and Boundary Conditions	22
3 Turbulence Models based on Eddy Viscosity Hypotheses	37
4 Stress Equation Modelling	58
5 Introduction to Numerical Methods for the Solution of the Thin Shear-layer Equations	77
6 Solution of Two-dimensional External Boundary-layer Problems	101
7 Inverse Boundary-layer Problems	123
8 Unsteady, Two-dimensional and Steady, Three-dimensional Flows	138
9 Computer Program for Unsteady Two-dimensional Boundary Layers	159
10 Recirculating Flows	192
11 Viscous-Inviscid Interactions and Corner Flows	219
12 Stability and Transition	235
13 Wings	253
14 Turbomachinery	273
15 Combustion	290
<i>References</i>	310
<i>Subject Index</i>	327
