# CONTENTS

List of contributors	v
Preface	ix
List of symbols	xv
<b>Introduction</b>	<b>1</b>
<b>1 Some aspects of the global circulation of the atmosphere in January and July 1980</b>	<b>5</b>
I. N. JAMES	
1.1 Analysis and sources of data	5
1.2 The time-averaged flow	8
1.3 Temperature fluxes	12
1.4 Momentum fluxes	17
1.5 Summary of results	24
References	25
<b>2 The climatological mean stationary waves: observational evidence</b>	<b>27</b>
J. M. WALLACE	
2.1 Introduction	27
2.2 Meridional structure of the Northern Hemisphere stationary waves	28
2.3 Northern Hemisphere wintertime stationary waves	30
2.4 Northern Hemisphere summertime stationary waves	36
2.5 Southern Hemisphere stationary waves	42
2.6 The tropical stationary waves	49
2.7 Summary and conclusions	49
References	52
<b>3 Observations of low-frequency atmospheric variability</b>	<b>55</b>
J. M. WALLACE and M. L. BLACKMON	
3.1 Introduction	55
3.2 Geographical distribution of low-frequency fluctuations	56
3.3 Horizontal structure of the low-frequency fluctuations	57
3.4 Time variation of the low-frequency patterns	65
3.5 A spectral view of low-frequency variability	69
3.6 Causes of low-frequency variability—observational evaluation of theories	74
3.7 Concluding remarks	90
References	91

<b>4</b>	<b>Persistent anomalies of the extratropical Northern Hemisphere wintertime circulation</b>	<b>95</b>
	R. M. DOLE	
4.1	Introduction	95
4.2	Data	95
4.3	Method for defining cases	96
4.4	Geographic distribution	97
4.5	Horizontal structure	100
4.6	Time evolution	104
4.7	Discussion	107
	References	108
<b>5</b>	<b>Mid-latitude wintertime circulation anomalies appearing in a 15-year GCM experiment</b>	<b>111</b>
	N.-C. LAU	
5.1	Introduction	111
5.2	Data sets	113
5.3	Eigenvector patterns	113
5.4	Circulation features in anomalous months	118
5.5	Synoptic description of an outstanding blocking episode	120
5.6	Discussion	121
	References	124
<b>6</b>	<b>Stationary and quasi-stationary eddies in the extratropical troposphere: theory</b>	<b>127</b>
	I. M. HELD	
6.1	Introduction	127
6.2	Barotropic model in a beta-plane channel: zonal propagation of Rossby waves	129
6.3	Barotropic model on a sphere: meridional propagation of Rossby waves	135
6.4	Baroclinic model in a beta-plane channel: vertical propagation of Rossby waves	145
6.5	Thermal forcing	154
6.6	The relative importance of thermal and orographic forcing	157
6.7	Quasi-stationary eddies in a zonally symmetric climate	165
	References	167

<b>7 Modelling of the transient eddies and their feedback on the mean flow</b>	<b>169</b>
B. J. HOSKINS	
7.1 Introduction	169
7.2 Some general arguments	169
7.3 Zonal averaging	171
7.4 Time-averaged three-dimensional flow	187
7.5 Conclusion	196
References	197
<b>8 Transient eddies in mid-latitudes: observations and interpretation</b>	
E. O. HOLOPAINEN	
8.1 Introduction	201
8.2 The intensity and characteristic structure of the transient eddies in the extratropical latitudes of the Northern Hemisphere	203
8.3 Energetics of the transient disturbances	206
8.4 The interplay between the transient disturbances and the time-mean flow in the atmosphere	213
8.5 Concluding remarks	229
References	230
<b>9 The large-scale structure of the tropical atmosphere</b>	<b>235</b>
P. J. WEBSTER	
9.1 Introduction	235
9.2 The observed structure of the tropical atmosphere	237
9.3 Aspects of the dynamic structure of the low latitudes	252
9.4 Heating processes	260
9.5 Tropical-extratropical interactions	266
References	273
<b>10 The stratosphere and its links to the troposphere</b>	<b>277</b>
J. R. HOLTON	
10.1 Introduction	277
10.2 Observational background	278
10.3 Dynamical background	284
10.4 The extratropical winter stratosphere	288
10.5 Dynamics of the equatorial stratosphere: the quasi-biennial oscillation	292

xiv CONTENTS

10.6	Interannual variability in the stratosphere	296
10.7	Concluding remarks	300
	References	300
<b>11</b>	<b>The oceanic general circulation and its interaction with the atmosphere</b>	<b>305</b>
	D. L. T. ANDERSON	
11.1	Introduction	305
11.2	The oceanic heat transport and general circulation	306
11.3	Ocean-atmosphere interaction on short time scales: the extratropics	316
11.4	Ocean-atmosphere interaction on short time scales: the tropics	318
	References	333
<b>12</b>	<b>Medium-range weather prediction—operational experience at ECMWF</b>	<b>337</b>
	L. BENGTSSON and A. J. SIMMONS	
12.1	Introduction	337
12.2	The ECMWF global forecasting system	338
12.3	Methods of assessment	343
12.4	The predictability of the extratropical Northern Hemisphere	344
12.5	Tropical and Southern Hemispheric forecasts	354
12.6	Systematic errors	356
12.7	Concluding remarks	360
	References	362
<b>13</b>	<b>Predictability in theory and practice</b>	<b>365</b>
	C. E. LEITH	
13.1	Introduction	365
13.2	Classical predictability analysis	366
13.3	Quantum predictability analysis	369
13.4	Local predictability	372
13.5	Model imperfections	373
13.6	Assimilation of observations	374
13.7	Error budget analysis	378
13.8	Conclusion	380
	References	381
	Appendix	385
	Epilogue	391
	Index	393
