CONTENTS

Preface	vii
<i>Chapter 1 THE KORTEWEG-DE VRIES EQUATION</i>	
1. The discovery of solitary waves	1
2. Fundamental ideas	4
3. The discovery of soliton interactions	7
4. Applications of the KdV equation	8
Problems	9
<i>Chapter 2 CNOIDAL WAVES</i>	
1. Wave solutions of the KdV solution	13
2. Solitary waves	13
3. General waves of permanent form	14
4. Description of waves in terms of elliptic functions	18
5. Infinitesimal waves	20
6. Solitary waves again	21
Problems	23
<i>Chapter 3 CONSERVATION LAWS</i>	
1. Fundamental ideas	32
2. Gardner's transformation	34
Problems	37
<i>Chapter 4 THE INITIAL-VALUE PROBLEM FOR THE KORTEWEG-DE VRIES EQUATION</i>	
1. The problem	40
2. Sketch of the method of inverse scattering	41
3. The scattering problem	42
4. The evolution equation	45
5. Solution of the scattering problem for $t > 0$	48

6. The inverse scattering problem	50
7. Qualitative character of the solution	51
8. Example: the delta-function potential	53
9. Example: $g(x) = -2\operatorname{sech}^2x$	56
10. Example: $g(x) = -6\operatorname{sech}^2x$	59
11. Examples: sech-squared potentials	62
12. Examples: some numerical results	63
13. Reflectionless potentials	67
Problems	71
 <i>Chapter 5 THE LAX METHOD</i>	
1. Description of the method in terms of operators	79
Problems	83
 <i>Chapter 6 THE SINE-GORDON EQUATION</i>	
1. Introduction	87
2. Waves and solitons	89
3. Some other simple explicit solutions	93
4. The interaction of two solitons	94
5. A breather	98
6. The method of inverse scattering	99
Problems	101
 <i>Chapter 7 BÄCKLUND TRANSFORMATIONS</i>	
1. Introduction	108
2. The sine-Gordon equation	111
3. The KdV equation	113
Problems	118
 <i>Chapter 8 EPILOGUE</i>	
1. Epilogue	121
 <i>Appendix A DERIVATION OF THE INTEGRAL EQUATION FOR INVERSE SCATTERING</i>	
	125
Bibliography and author index	128
Motion picture index	133
Subject index	134
