

**APPLIED  
FLUID  
DYNAMICS  
HANDBOOK**

# **APPLIED FLUID DYNAMICS HANDBOOK**

**ROBERT D. BLEVINS**

VAN NOSTRAND REINHOLD COMPANY

# Contents

- Preface / v**
- 1. Definitions / 1**
- 2. Symbols / 5**
- 3. Units / 6**
- 4. Dimensional Analysis / 8**
  - 4.1 Introduction / 8
  - 4.2 Boundary Geometry / 8
  - 4.3 Euler Number / 10
  - 4.4 Reynolds Number / 10
  - 4.5 Mach Number / 11
  - 4.6 Froude Number / 11
  - 4.7 Weber Number / 11
  - 4.8 Cavitation Number / 12
  - 4.9 Richardson Number / 12
  - 4.10 Rayleigh Number / 12
  - 4.11 Strouhal Number / 12
  - 4.12 Kolmogoroff Scales / 13
  - 4.13 Application / 13
    - 4.13.1 The  $\Pi$ -Theorem / 13
    - 4.13.2 Example: Model Testing a Nuclear Reactor / 14
    - 4.13.3 Example: Model Testing of a Surfboard / 15
- 5. Conservation Equations / 19**
  - 5.1 Introduction / 19
  - 5.2 Conservation of Mass / 19
    - 5.2.1 Equations of Conservation of Mass / 19
    - 5.2.2 Example of Conservation of Mass / 20
  - 5.3 Conservation of Energy / 23
    - 5.3.1 Forms of Fluid Energy / 23
    - 5.3.2 Equations of Conservation of Energy / 23
    - 5.3.3 Examples of Conservation of Energy / 24
  - 5.4 The Bernoulli Equations / 29
    - 5.4.1 Presentation of the Equations / 29
    - 5.4.2 Example of the Bernoulli Equations / 30
  - 5.5 Conservation of Momentum / 32
    - 5.5.1 The Momentum Equations / 32
    - 5.5.2 Examples of Conservation of Momentum / 33
- 6. Pipe and Duct Flow / 38**
  - 6.1 General Considerations / 38
    - 6.1.1 General Assumptions / 38
    - 6.1.2 Principles of Pipe Flow / 38
  - 6.2 Velocity Profiles for Fully Developed Pipe Flow / 39
    - 6.2.1 Inlet Length / 39
    - 6.2.2 Fully Developed Profiles / 40
  - 6.3 Straight Uniform Pipes and Ducts / 42
    - 6.3.1 General Form for Incompressible Flow / 42
    - 6.3.2 Friction Factor for Laminar Flow ( $Re < 2000$ ) / 42
    - 6.3.3 Friction Factor for Transitional Flow ( $2000 < Re < 4000$ ) / 48
    - 6.3.4 Friction Factor for Turbulent Flow ( $Re > 4000$ ) / 50
  - 6.4 Curved Pipes and Bends / 55
    - 6.4.1 General Form / 55
    - 6.4.2 Diametrical Pressure Difference / 65
    - 6.4.3 Curved Pipes and Gradual Bends / 66
    - 6.4.4 Sharp Bends / 67
    - 6.4.5 Vanes in Sharp Bends / 67
    - 6.4.6 Interaction Between Closely Spaced Bends and Components / 70
    - 6.4.7 Force on a Bend / 70
  - 6.5 Abrupt Changes in Flow Area / 71
    - 6.5.1 Entrances and Abrupt Contractions / 71
    - 6.5.2 Exits and Abrupt Expansions / 72
    - 6.5.3 Orifice Plates / 80
    - 6.5.4 Valves / 83

- 6.6 Joining and Dividing Flow / 89
    - 6.6.1 Classification of Pipe Junctions / 89
    - 6.6.2 Pipe Junctions / 89
    - 6.6.3 Manifolds / 95
    - 6.6.4 Networks / 98
  - 6.7 Compressible Flow / 99
    - 6.7.1 Compressible Flow of a Perfect Gas Through Uniform Pipes and Ducts / 99
    - 6.7.2 A Technique for Adiabatic Flow Through Pipeline Components / 101
  - 6.8 Two-Phase Flow / 102
    - 6.8.1 Fundamental Concepts / 102
    - 6.8.2 Liquid-Gas Two-Phase Flow / 109
    - 6.8.3 Solid-Liquid Two-Phase Flow / 112
  - 6.9 Examples of Pipe Flow / 114
    - 6.9.1 Compressible Air Flow Example / 114
    - 6.9.2 Water Flow Example / 116
    - 6.9.3 Adiabatic Pipeline Flow Example / 118
- 7. Nozzles, Diffusers, and Venturis / 124**
- 7.1 General Assumptions / 124
  - 7.2 Theoretical Nozzle Performance / 124
    - 7.2.1 General Considerations / 124
    - 7.2.2 Incompressible Nozzle Flow / 124
    - 7.2.3 Compressible Nozzle Flow / 126
  - 7.3 Nozzle Discharge Coefficient / 136
  - 7.4 Theoretical Diffuser Performance / 144
    - 7.4.1 General Considerations in Diffuser Analysis / 144
    - 7.4.2 Theoretical Aspects of Diffuser Performance / 144
    - 7.4.3 Diffuser Stall / 145
  - 7.5 Diffuser Pressure Recovery Coefficient / 147
    - 7.5.1 General Considerations / 147
    - 7.5.2 Performance of Diffusers with Free Discharge / 149
  - 7.6 Venturi Tubes / 155
  - 7.7 Examples / 158
    - 7.7.1 Nozzle Example / 158
    - 7.7.2 Diffuser Example / 160
- 8. Open Channel Flow / 164**
- 8.1 General Considerations / 164
  - 8.2 Uniform Flow in a Uniform Channel / 165
    - 8.2.1 Pressure and Velocity Distribution / 165
    - 8.2.2 Computation of Uniform Flow / 166
    - 8.2.3 Critical Flow / 183
  - 8.3 Varied Flow / 187
    - 8.3.1 Gradually Varied Flow / 187
    - 8.3.2 Hydraulic Jump / 192
  - 8.4 Channel Structures / 201
    - 8.4.1 Weirs / 201
    - 8.4.2 Spillways / 208
    - 8.4.3 Flumes / 210
    - 8.4.4 Sluice Gates / 212
    - 8.4.5 Transitions / 214
- 8.5 Sediment Transport / 215**
- 8.5.1 Sediment Production and Properties / 215
  - 8.5.2 Initiation of Motion / 216
  - 8.5.3 Rate of Sediment Discharge / 218
  - 8.5.4 Scour Around Piers / 221
- 8.6 Example / 222
- 9. Jets, Plumes, Wakes, and Shear Layers / 229**
- 9.1 General Assumptions / 229
  - 9.2 Submerged Jets / 229
    - 9.2.1 General Considerations / 229
    - 9.2.2 Submerged Laminar Jets ( $Re < 2000$ ) / 231
    - 9.2.3 Submerged Turbulent Jets ( $Re > 3000$ ) / 232
  - 9.3 Wall Jets, Impinging Jets, Jets in Coflow, Jets in Cross Flow, Jets with Swirl / 238
    - 9.3.1 Wall Jets / 238
    - 9.3.2 Jets in Coflow / 242
    - 9.3.3 Round Jets in Cross Flow / 244
    - 9.3.4 Round Jets with Swirl / 245
  - 9.4 Plumes and Buoyant Jets / 247
    - 9.4.1 General Considerations / 247
    - 9.4.2 Plume Characteristics / 249
    - 9.4.3 Turbulent Buoyant Jets in a Uniform Reservoir / 249
    - 9.4.4 Turbulent Buoyant Jets in Stratified Reservoir with Cross Flow / 252
  - 9.5 Jet Pumps and Confined Jets / 257
    - 9.5.1 Jet Pumps / 257
    - 9.5.2 Confined Jets / 260
  - 9.6 Liquid Jets in Gases and Bubble Plumes in Liquids / 262
    - 9.6.1 Liquid Jets in Gases / 262
    - 9.6.2 Bubble Plumes / 264
  - 9.7 Far Wakes / 265
    - 9.7.1 General Considerations / 265
    - 9.7.2 Laminar Wakes / 266
    - 9.7.3 Turbulent Wakes / 266
  - 9.8 Shear Layers / 268
  - 9.9 Examples / 271
    - 9.9.1 Jet Example / 271
    - 9.9.2 Plume Example / 272
- 10. Fluid Dynamic Drag / 279**
- 10.1 General Considerations / 279
  - 10.2 Boundary Layer Drag / 279
    - 10.2.1 General Considerations / 279

- 10.2.2 Laminar Similar Solutions / 280
  - 10.2.3 Approximate Methods for Incompressible Laminar Boundary Layers / 286
  - 10.2.4 Separation and Boundary Layer Control / 297
  - 10.2.5 Laminar-Turbulent Transition / 298
  - 10.2.6 Turbulent Boundary Layer / 300
  - 10.2.7 Approximate Methods for Turbulent Boundary Layers / 304
  - 10.2.8 Drag of Protuberances in Turbulent Boundary Layers / 308
  - 10.3 Screens, Grillages, and Tube Bundles / 309
    - 10.3.1 Screens, Grillages, and Perforated Plates / 309
    - 10.3.2 Tube and Rod Arrays / 327
  - 10.4 Bluff Structures / 328
    - 10.4.1 General Considerations / 328
    - 10.4.2 Three Coefficients / 341
    - 10.4.3 Principles of Drag Minimization / 342
    - 10.4.4 Application to Road Vehicles / 347
  - 10.5 Streamlined Structures / 350
    - 10.5.1 General Considerations / 350
    - 10.5.2 Streamlined Struts, Bodies, and Nonlifting Airfoils / 351
    - 10.5.3 Wings, Airfoils, and Lift / 353
  - 10.6 Cavitating and Surface-Piercing Structures / 361
    - 10.6.1 Cavitation and Drag / 361
    - 10.6.2 Ventilation and Drag / 363
  - 10.7 Resistance of Ships / 366
    - 10.7.1 A Method of Computing Ship Resistance / 366
    - 10.7.2 Aspects of Skin Friction Resistance of Ships / 369
    - 10.7.3 Aspects of Wave-Making Resistance / 370
  - 10.8 Examples / 371
    - 10.8.1 Terminal Speed of a Falling Object / 371
    - 10.8.2 Glide Slope of a Wing / 372
- 11. Wind and Atmospheric Processes / 382**
- 11.1 Introduction / 382
  - 11.2 Atmospheric Composition, Statics, and Stability / 382
    - 11.2.1 Atmospheric Characteristics / 382
    - 11.2.2 Atmospheric Stability / 396
  - 11.3 Origin of Wind and Storms / 398
    - 11.3.1 General Considerations / 398
    - 11.3.2 Geostrophic and Local Winds / 399
  - 11.4 Surface Winds / 400
    - 11.4.1 General Considerations / 400
    - 11.4.2 Boundary Layer of the Earth / 404
    - 11.4.3 Extreme Winds / 408
  - 11.5 Wind Pressure, Wind Forces, and Urban Aerodynamics / 413
    - 11.5.1 General Considerations / 413
    - 11.5.2 Wind Pressure on Structures / 413
    - 11.5.3 Wind Forces on Structures / 419
    - 11.5.4 Wind Breaks and Urban Aerodynamics / 430
  - 11.6 Examples / 433
    - 11.6.1 Altimetry / 433
    - 11.6.2 Wind Force on a Lattice Tower / 438
- 12. Ocean Waves and Coastal Processes / 443**
- 12.1 Introduction / 443
  - 12.2 Waves in Deep Water and Constant Depth Shallow Water / 443
    - 12.2.1 General Considerations / 443
    - 12.2.2 Wave Mechanics / 443
    - 12.2.3 Wind Waves and Swell / 458
    - 12.2.4 Other Wave Generation / 466
  - 12.3 Waves in Basins and Shoaling Water / 467
    - 12.3.1 Shoaling Water / 467
    - 12.3.2 Reflection and Resonance / 475
    - 12.3.3 Refraction and Diffraction / 476
  - 12.4 Wave Forces on Structures / 477
    - 12.4.1 General Considerations / 477
    - 12.4.2 Wave Forces on Piling and Piers / 477
    - 12.4.3 Wave Forces on Large Cylindrical Structures / 479
    - 12.4.4 Wave Forces on Sea Walls / 481
    - 12.4.5 Rubble Mound Breakwater / 482
  - 12.5 Examples / 486
    - 12.5.1 Diffraction and Shoaling at a Beach / 486
    - 12.5.2 Wave Force on a Piling / 487
- 13. Porous Media, Fluid Bearings, and Fluid Seals / 493**
- 13.1 Introduction / 493
  - 13.2 Porous Media / 493
    - 13.2.1 General Considerations / 493
    - 13.2.2 Darcy's Law and Its Solution / 493
    - 13.2.3 Application to Fluidized Beds / 496
  - 13.3 Fluid Bearings and Seals / 499
    - 13.3.1 General Considerations / 499
    - 13.3.2 Fluid Bearings / 501
    - 13.3.3 Seals / 506
  - 13.4 Example: Flow Between a Rotating and a Stationary Cylinder / 507
- 14. Properties of Gases and Liquids / 510**
- 14.1 Introduction / 510
  - 14.2 Gases / 510
    - 14.2.1 Perfect Gas Law / 510

**x CONTENTS**

- 14.2.2 Compressibility of Nonideal Gases / 514
- 14.2.3 Viscosity / 516
- 14.2.4 Data for Air and Other Gases at Low Pressure / 518
- 14.3 Liquids / 524

**Appendix A: Navier-Stokes and Boundary Layer Equations / 529**

- A.1 Navier-Stokes Equations in Two-Dimensional Flow / 529
- A.2 Navier-Stokes Equations for Axisymmetric Flow in Cylindrical Coordinates / 530
- A.3 Boundary Layer Equations / 531

**Appendix B: Reynolds Stress and Turbulence Measurements / 536**

- B.1 General Considerations / 536
- B.2 Measurements in Turbulent Jets / 537
- B.3 Measurements in Turbulent Wakes / 540
- B.4 Measurements in Turbulent Plane Shear Layer / 541
- B.5 Measurements in Turbulent Boundary Layers / 541
- B.6 Measurements in Turbulent Pipe Flow / 543

**Appendix C: Potential Flow / 544**

- C.1 General Considerations / 544
- C.2 Potential Flow Fields / 545

**Index / 555**
