Contents

Preface xi

List of Participants xv

FUNDAMENTALS

The Decay of Homogeneous Isotropic Turbulence

W. K. George 3

Turbulence Measurements in a Nearly Homogeneous Shear Flow

M. M. Gibson and V. E. Kanellopoulos 17

Turbulence Subjected to Compression and Passive Scalar Transport

J. P. Bertoglio 29

The Probability Density Function for Contaminant Concentrations in Some Self-Similar Turbulent Flows

P. C. Chatwin and P. J. Sullivan 41

Some Contributions to Asymptotic Theory for Turbulent Flows

K. Gersten 53

COHERENT STRUCTURES

KEYNOTE PAPER

Coherent Structures Associated with Turbulent Transport

R. F. Blackwelder 69

Some Symmetrical Properties of Conditional Averages

R. F. Blackwelder 89

KEYNOTE PAPER

The Organized Motion and Its Contribution to Transport in Turbulent Shear Flows

R. A. Antonia 91

KEYNOTE PAPER

Turbulence Management in Free Shear Flows by Control of Coherent Structures

H. S. Husain, J. E. Bridges, and F. Hussain 111

Understanding the Origin of Coherent Structure

W. O. Criminale 131

- Eruption Mechanism for Turbulent Flows Near Walls
J. D. A. Walker and S. Herzog **145**
- Study of Streamwise Vortical Structures in a Two-Dimensional Turbulent Channel Flow by Digital Image Processing
K. Nishino, N. Kasagi, and M. Hirata **157**
- Coherent Structures in the Inner Layer of Wall Turbulence under the Spatial Restriction
S. Maruyama and H. Tanaka **171**
- On Physical Mechanisms of Turbulent Drag Reduction Using Riblets
K.-S. Choi **185**
- Coherent Structure of a D-Type Rough Wall Boundary Layer
H. Osaka and S. Mochizuki **199**
- The Generation of Surface-Renewal Eddies in an Open-Channel Flow
S. Komori, Y. Hiraga, Y. Murakami, and H. Ueda **213**
- Incoherent Turbulence Structure in the Vortex-Street Wake of a Normal Plate
M. Kiya and M. Matsumura **225**
- On Large Scale Coherent Structure in Turbulent Plane Plume
A. Murota and K. Nakatsuji **239**

WALL SHEAR FLOWS

KEYNOTE PAPER

- Turbulent Transfer to a Wall at Large Schmidt Numbers
T. J. Hanratty and E. Vassiliadou **255**
- Statistical Characteristics of Transfer Processes in a Wall Turbulent Shear Flow
Y. Nagano and M. Tagawa **275**
- Turbulence Characteristics Downstream of Two Types of Turbulence Promoters
J. C. S. Lai, K. J. Bullock, and T. B. Walker **289**
- Effect of Injected Polymer Thread on Turbulence in a Pipe Flow
H. Usui and Y. Sano **299**
- Experimental Studies on Laminarization of Turbulent Duct Flow by Fluid Injection
K. Suzuki, T. Baba, A. K. Abdel-Rahman, and Y. Hagiwara **311**
- Large-Scale Vortical Structure in the Turbulent Boundary Layer Flow under Unstably-Stratified Conditions
H. Ueda, S. Komori, and K. Fukui **325**
- Turbulence Transport Phenomena across Stable Thermal Stratified Layer in a Rectangular Channel Duct
K. Hishida, T. Ogita, K. Kobayashi, M. Maeda, and S. Yokobori **335**

- Modeling Turbulent Heat Transfer in Impinging Jets
K. Kataoka, H. Degawa, Y. Hamada, and S. Hamano **349**

FREE SHEAR FLOWS

- Concerning the Wake Effect on the Initial Instability Development of a Mixing Layer
J. J. Miao and C. T. Hsu **363**
- The Effects of Stabilizing and Destabilizing Curvature on a Turbulent Mixing Layer
M. W. Plesniak and J. P. Johnston **377**
- An Experimental Study of Flow around a Square Prism
D. F. G. Durão, P. S. T. Gouveia, and J. C. F. Pereira **391**
- The Entrainment Eddies in a Wake Flow
M. Tabatabai, J. G. Kawall, and J. F. Keffer **405**
- Covariance and Mixing of Temperature Fluctuations from Line Sources in Grid Turbulence
H. Stapountzis **419**
- Dispersed Phase Transport in a Plane Mixing Layer
H. Kobayashi, S. M. Masutani, S. Azuhata, N. Arashi, and Y. Hishinuma **433**
- Prediction of a Gas-Particle Turbulent Jet with the Fluctuation-Spectrum-Random-Trajectory Model
J. Fan, K. Cen, H. Taniguchi, and H. Zhao **447**

SCALAR AND BUOYANT TRANSPORT

KEYNOTE PAPER

- Natural Convection Mass Transfer in an Inclined Enclosure at High Rayleigh Number
R. J. Goldstein, H. D. Chiang, and E. Sayer **459**
- The Effect of Embedded Longitudinal Vortex Pairs on Turbulent Boundary Layer Heat Transfer
W. R. Pauley and J. K. Eaton **487**
- The Influence of Jet-Grid Turbulence on Turbulent Boundary Layer Flow and Heat Transfer
J. C. Han and C. D. Young **501**
- Local Mass Transfer in Skewed Rectangular Cavities
M. K. Chyu and J. S. Kapat **515**

Transport Phenomena in Three-Dimensional Turbulent Surface Jets with Buoyancy Effect

F. Ogino, A. Kimoto, and M. Kageyama **531**

The Growth and Collapse of a Turbulent Patch in a Stratified Fluid

H. J. S. Fernando and I. P. D. DeSilva **545**

MODELING AND PREDICTION OF TURBULENT TRANSPORT

KEYNOTE PAPER

Recent Results in the Prediction of Turbulent Separated Flows

R. H. Pletcher **559**

Application of an Improved $k-\epsilon$ Model to the Calculation of Turbulent Pipe Flows with Circumferentially Nonuniform Heating

H. K. Myong, N. Kasagi, and M. Hirata **579**

Application of a Two-Equation Turbulence Model to Heat Transfer and Fluid Flow of an Impinging Round Jet

T. Kunugi and H. Kawamura **593**

The Simulation of Flow and Heat Transfer in Channels with Ribbed Surface

T. R. Fodemski **605**

Application of an Algebraic Stress Model to Axisymmetric Flows in an Engine-Like Cylinder

S.-H. Kang and C.-H. Lee **619**

Finite Volume Calculations of a High Reynolds Number Backward Facing Step Flow Employing a Colocated Variable Arrangement

S. Obi, M. Perić, and G. Scheuerer **633**

A Closure Model of Diffusion Transport of the Reynolds-Stress Equations and Its Application to a Turbulent Step Flow

R. S. Amano and J. C. Chai **649**

Numerical Prediction of Flow Characteristics and Retardation of Mixing in a Turbulent Swirling Flow

S. Hirai, T. Takagi, and T. Higashiya **661**

The Finite Element Turbulent Flow Analysis of Three-Dimensional Large Scale Problems

H. Okuda, Y. Eguchi, and G. Yagawa **675**

A Refined Numerical Procedure for Turbulent Heat Transfer with Coarse Grids of Finite Difference Calculation

I. Satoh and Y. Kurosaki **687**

NUMERICAL SIMULATIONS OF TURBULENCE

KEYNOTE PAPER

Advances in Turbulent Transport Modeling Based on Direct Simulations of Turbulence

W. C. Reynolds, M. M. Rogers, and N. D. Sandham 701

KEYNOTE PAPER

Investigation of Heat and Momentum Transport in Turbulent Flows Via Numerical Simulations

J. Kim 715

Numerical Simulation of Homogeneous Compressible Turbulence

K. Dang and Y. F. Morchoisne 731

Numerical Simulation of Turbulent Channel Flow at Low and High Reynolds Numbers

K. Horiuti 743

Large Eddy Simulation of Turbulent Swirling Flow

Y. Morinishi and T. Kobayashi 757

Simulation of an Axisymmetric Jet under Controlled Excitation

E. Stuhlraeger and T. Miyauchi 769

MEASUREMENT TECHNIQUES

Direct Measurement of Streamwise Vorticity Fluctuations with a Cylinder Probe

E. Bawirzanski, M. Randolph, and H. Eckelmann 785

Tracking of Macroscopic Particle Motions Generated by a Turbulent Wind Via Digital Image Analysis

A. D. Ciccone, J. G. Kawall, and J. F. Keffer 793

Liquid-Crystal Thermometry Based on Automatic Color Evaluation and Applications to Measure Turbulent Heat Transfer

N. Akino, T. Kunugi, M. Ueda, and A. Kurosawa 807

Measurements in Heavily-Laden Dusty Jets with Phase-Doppler Anemometry

Y. Hardalupas, A. M. K. P. Taylor, and J. H. Whitelaw 821

An Experimental Study on Turbulent Transport in Two-Dimensional Shear Layer by Simultaneous Measurement of Velocity and Concentration with a Laser Doppler Velocimeter and a Laser-2-Focus System

I. Yokota, T. Nakajima, R. Matsumoto, and S. Noda 837

Direct Measurements of Momentum and Mass Transport in Turbulent Shear Flows by Combining LDV and Laser Fluorescence Method

T. Takagi, T. Kondoh, M. Komiyama, and Y. Shintani **851**

TURBULENT TRANSPORT IN APPLICATIONS

The Characteristics of Periodic Motions in the Swirling Flows with and without Flame

J. K. Yoon and H. D. Shin **863**

Fluctuations and Massive Separation in Three-Dimensional Shock-Wave/Boundary-Layer Interactions

M. I. Kussoy, J. D. Brown, J. L. Brown, W. K. Lockman, and C. C. Horstman **875**

Experimental and Numerical Studies of Propagation Phenomena in Turbulent Flows around Buildings

W. Frank **889**

A Generalized Approach to Wind Set-up

I. K. Tsanis **899**

Index **909**
