# Contents

<b>Preface</b>	xi
Remarks on turbulence theory J.-L. LIONS	1
Hydrodynamic visualization of organized structures and turbulences in boundary layers, wakes, jets or propellor flows H. WERLE	15
<b>I. Free Shear Flows</b>	27
The emergence of characteristic (coherent?) motion in homogeneous turbulent shear flows D.J. CARRUTHERS, J.C.H. FUNG, J.C.R. HUNT and R.J. PERKINS	29
Generation of coherent structures in free shear layers P. COMTE, Y. FOUILLET, M.-A. GONZE, M. LESIEUR, O. METAIS and X. NORMAND	45
Use of the proper orthogonal decomposition in a plane turbulent mixing layer J. DELVILLE, S. BELLIN and J.-P. BONNET	75
On the three-dimensional dynamics of coherent structures forming in free, shear flows J.C. LASHERAS and E. MEIBURG	91
Visualizations of helium jets in air R. RIVA, G. BINDER, S. TARDU and M. FAVRE-MARINET	113
Thermal striping: structures in interacting jets H.M. TSAI, D.C. LESLIE and P.R. VOKE	125
<b>II. Boundary Layers</b>	139
Three-dimensional aspects of the organized motion in a turbulent boundary layer R.A. ANTONIA and D.K. BISSET	141
Large-eddy simulation of boundary layers with a step change in pressure gradient R. FRIEDRICH and F. UNGER	159

<b>III. Fundamentals</b>	175
Intermittent structure of dissipation in isotropic turbulence viewed from a direct simulation I. HOSOKAWA and K. YAMAMOTO	177
The spatial structure of homogeneous turbulence at Reynolds numbers around 1000 A. VINCENT and M. MENEGUZZI	191
Wavelet analysis of fully developed turbulence data and measurements of scaling exponents E. BACRY, A. ARNEODO, U. FRISCH, Y. GAGNE and E. HOPFINGER	203
How solenoidal can be the Lamb vector in turbulent flow? Consequences and implications A. TSINOBER	217
<b>IV. Chaos and Instability</b>	225
Bifurcations and bursting of streaks in the turbulent wall layer N. AUBRY and S. SANGHI	227
The dynamics of organized structures in the axisymmetric jet mixing layer M. GLAUSER, X. ZHENG and C.R. DOERING	253
Instability of the rectangular duct flow and generation of the secondary flow T. TATSUMI and T. YOSHIMURA	267
<b>V. Vortex Breakdown</b>	283
Vortex breakdown: a coherent transition trigger in concentrated vortices S. LEIBOVICH	285
Numerical simulation of vortex breakdown via 3-D Euler equations P. MEGE, T.H. LE and Y. MORCHOISNE	303
<b>VI. Two-dimensional Turbulence</b>	321
The coherent vortices of two-dimensional and geostrophic turbulence J.C. McWILLIAMS	323

Experiments on forced, quasi-two-dimensional turbulence at upwelling fronts S. NARIMOUSA, T. MAXWORTHY and G.R. SPEDDING	343
Merging of two-layer baroclinic vortices J. VERRON, E. HOPFINGER and J.C. McWILLIAMS	355
Transmission of acoustic waves through mixing layers and 2D isotropic turbulence D. JUVE, P. BLANC-BENON and G. COMTE-BELLOT	367
<b>VII. Geophysical Fluid Dynamics</b>	<b>385</b>
Spectra and correlation functions of surface layer atmospheric turbulence in unstable thermal stratification B.A. KADER and A.M. YAGLOM	387
Organized structures in strongly stratified flows J.J. RILEY, M.-P. LELONG and D.N. SLINN	413
Fossile and active turbulence R.C. SANDERSON, A.D. LEONARD, J.R. HERRING, and J.C. HILL	429
Coherent structures in stratified turbulent shear flows deduced from direct simulations T. GERZ	449
Influence of a shear on a stably-stratified flow C. STAQUET	469
Gravity wave patterns in the wake of a sphere in a stratified fluid J.M. CHOMAZ, P. BONNETON, A. BUTET, E.J. HOPFINGER and M. PERRIER	489
<b>VIII. Compressible and Reacting Flows</b>	<b>505</b>
The compressible mixing layer D. VANDROMME and H. HAMINH	507
Numerical simulations of supersonic plane Couette flow instability N. DOLEZ and J. LEORAT	525

Reactive scalar as a tracer of organized structures in turbulent mixing layers J.-P. CHOLLET, M.-R. VALLCORBA, and R. GATHMANN	537
<b>IX. MHD Turbulence</b>	551
Large-eddy simulation of MHD turbulent channel flow under a uniform magnetic field Y. SHIMOMURA	553
Coherent structures in MHD turbulence and turbulent dynamo S. YANASE, J. MIZUSHIMA and S. KIDA	569
<b>List of Participants</b>	585
<b>Author Index</b>	601
<b>Colour Plates</b>	603
