CONTENTS

1. INTRODUCTION AND EARLY THEORIES, 3
 - 1.1 *A considerable circulation*, 3
 - 1.2 *General remarks*, 4
 - 1.3 *Historical background: Part I*, 6

2. OBSERVING THE ATMOSPHERE, 15
 - 2.1 *An overview*, 15
 - 2.2 *The surface-based network and its biases*, 16
 - 2.3 *Other observing systems and their limitations*, 17
 - 2.3.1 *Satellite-based systems*, 17
 - 2.3.2 *Other systems*, 25
 - 2.4 *Data analysis*, 27
 - 2.5 *Spatial and temporal representativeness*, 28
 - 2.6 *Compositing observations*, 34

3. ZONAL AVERAGE OBSERVATIONS, 39
 - 3.1 *Zonal average radiation and heating fields*, 40
 - 3.2 *Zonal average temperature fields*, 57
 - 3.3 *Zonal average velocity fields*, 63
 - 3.4 *Zonal average pressure fields*, 74
 - 3.5 *Zonal average moisture and cloudiness*, 77

- 4. MOMENTUM AND ENERGY RELATIONSHIPS, 90**
- 4.1 *Zonal average momentum equation, 91*
 - 4.2 *Component kinetic energy equations, 96*
 - 4.2.1 *Derivations, 97*
 - 4.2.2 *Interpretation, 103*
 - 4.2.2.1 *Zonal mean cells transport, 103*
 - 4.2.2.2 *Eddy transports, 104*
 - 4.3 *Available potential energy, 111*
 - 4.3.1 *Introduction, 111*
 - 4.3.2 *General comments, 113*
 - 4.3.3 *Derivation of available potential energy, 115*
 - 4.4 *Limited volume energy generation equations, 121*
 - 4.5 *Interpretation of the limited volume energy equations, 128*
 - 4.5.1 *Term (A), 128*
 - 4.5.1.1 *Solar (shortwave) radiation, 129*
 - 4.5.1.2 *Outgoing (longwave) infrared radiation, 129*
 - 4.5.1.3 *Sensible heat transfer, 129*
 - 4.5.1.4 *Latent heat, 132*
 - 4.5.1.5 *Frictional dissipation, 134*
 - 4.5.2 *Term (B), 135*
 - 4.5.3 *Term (C), 141*
 - 4.5.4 *Term (D), 142*
 - 4.5.5 *Term (E), 143*
 - 4.6 *Eddy versus zonal average energetics, 143*
- 5. OBSERVED NONZONAL FIELDS, 160**
- 5.1 *Radiation fields, 161*
 - 5.2 *Temperature fields, 164*
 - 5.3 *Velocity fields, 169*
 - 5.4 *Pressure fields, 177*
 - 5.5 *Cloudiness, rainfall, and humidity, 181*
 - 5.6 *Momentum flux fields, 192*
 - 5.7 *Heat flux fields, 193*
 - 5.8 *Storm tracks, 197*
 - 5.9 *Energetics, 204*
 - 5.10 *Asian summer monsoon, 210*

- 6. THEORIES FOR ZONAL FIELDS, 218**
- 6.1 *Simple radiative-convective models*, 218
 - 6.2 *Zonal mean motions from eddies*, 231
 - 6.2.1 *Historical background: Part II*, 231
 - 6.2.2 *Zonal momentum: Maintenance against friction*, 233
 - 6.2.3 *Subtropical jets: Roles of Hadley cells and eddies*, 238
 - 6.2.3.1 *Transient eddies versus time-mean cells*, 238
 - 6.2.3.2 *Hadley cell motions and the jet*, 240
 - 6.2.4 *The stratospheric "Hadley" circulation*, 244
 - 6.3 *Kuo-Eliassen equation*, 249
 - 6.3.1 *Derivation*, 249
 - 6.3.2 *Discussion*, 254
 - 6.3.2.1 *Eddy momentum flux divergence*, 256
 - 6.3.2.2 *Eddy heat flux convergence*, 257
 - 6.3.2.3 *Diabatic heating*, 259
 - 6.3.2.4 *Frictional retardation*, 260
 - 6.3.2.5 *Combined influences*, 263
 - 6.4 *Some possible feedbacks*, 264
 - 6.5 *Reconciliation of momentum flux and jet stream positions*, 269
 - 6.5.1 *Angular momentum conservation*, 270
 - 6.5.2 *Eddy-induced circulations*, 271
 - 6.5.3 *Orographic and thermal localizing of winds*, 274
 - 6.5.4 *Time variability*, 280
 - 6.5.5 *Summary*, 280
 - 6.6 *Simple zonally symmetric flow models*, 281
 - 6.7 *Intertropical convergence zone structure and CISK*, 286
- 7. THEORIES FOR NONZONAL FIELDS, 298**
- 7.1 *The instability of zonal mean fields*, 299
 - 7.1.1 *A simple analytic model*, 299
 - 7.1.2 *Laboratory experiments*, 307
 - 7.2 *Forced planetary waves*, 311
 - 7.2.1 *An early study of topographic forcing*, 314
 - 7.2.2 *An early study of thermal forcing*, 323
 - 7.2.3 *Transient eddy forcing*, 330
 - 7.2.4 *Which forcing dominates?* 334
 - 7.2.5 *Energy propagation*, 341
 - 7.3 *Wave-cyclone life cycles*, 343
 - 7.3.1 *Theoretical evidence*, 343
 - 7.3.2 *Observational evidence*, 352

7.4 Eliassen-Palm fluxes, 3587.4.1 *Example 1: Mean meridional circulations, 360*7.4.2 *Example 2: Potential vorticity, 366*7.4.3 *Example 3: Zonal mean zonal wind maintenance, 367*7.4.4 *Example 4: Eddy energy propagation, 368*7.4.5 *EP flux diagrams for frontal cyclones, 371*7.4.6 *Stratospheric sudden warming, 374***8. APPLICATIONS, 380**8.1 *Speculations on a qualifying exam problem, 381*8.2 *Applications to "global change," 383***APPENDIX: AVERAGING, 386**A.1 *Basic definitions, 387*A.2 *Some general rules, 387***REFERENCES, 391****INDEX, 417**
