Table of Contents

Preface	vii
R.D. Keane and R.J. Adrian Theory of cross-correlation analysis of PIV images	1
S.B. Dalziel Decay of rotating turbulence: Some particle tracking experiments	27
H. Stapountzis, J. Westerweel, J.M. Bessem, A. Westendorp and F.T.M. Nieuwstadt Measurement of product concentration of two parallel reactive jets using digital image processing	55
H.A. Siller, R.J. Perkins and G. Janke Image analysis of oil film interferometry – a method of measuring wall shear stress distributions	71
L. Lourenco Recent advances in LSV, PIV and PTV	81
P. Guibert, Q.C. Duan, M. Murat and J. Julien Development of particle image velocimetry: A new computation method with directional resolution	101
A. Chavez and F. Mayinger Algorithms for automatic measurements of size and velocity of spray droplets from holography reconstructions	117
J. Massons, Jna. Gavaldà, J. Escoda, X. Ruiz and F. Diaz Characterization of Savonius rotor wake using image analysis processing techniques	143
V. Baier, W. Bechteler and S. Hartmann An application of image processing methods to determine the critical shear stress in sewer systems	159
M.P. Arroyo and C.A. Greated A three dimensional particle image velocimetry system and its application to the measurement of acoustic streaming	167
C. Hugl and A. Mueller A camera for measuring density, size and velocity of rising air bubbles and water velocity in a bubble plume	189
D.R. McCluskey, C. Elgaard, W.J. Easson and C.A. Greated The application of PIV to turbulent two-phase flow	207
P.A. Quinn, D.J. Skyner, C. Gray, C.A. Greated and W.J. Easson A critical analysis of the particle image velocimetry technique as applied to waves	227
J. Stefanini, G. Cognet, J.C. Vila, B. Merite and Y. Brenier A colored method for PIV technique	247
A.K. Hind Digital PIV applied to flows around artificial heart valves: Analysis by autocorrelation	259
