Table of Contents

Preface v

Part One: Invited Papers 1

Multi-symplectic structure, Boussinesq equations and periodic travelling waves 3
T.J. Bridges

Repulsive dynamics of solitary pulses 24
H.C. Chang, E.A. Demekhin

Capillary–gravity water-waves problem as a dynamical system 42
G. Iooss

Nonlinear dynamics of film flows: solitary wave interactions 58
J. Liu, J.P. Gollub

Resonant triads of capillary-gravity waves in the presence of a wind-drift current 71
L.C. Morland

The impact of water waves upon a wall 83
D.H. Peregrine, M.E. Topliss

A Hamiltonian perturbation theory for coherent structures illustrated to wave problems 99
E. van Groesen

Modulated modulation equations 117
A. van Harten

Part Two: Contributed Papers 131

Instability of standing waves with large wavelength in problems with $O(2)$ symmetry 133
A. Afendikov, A. Mielke

Homotopy stable spatially chaotic waves on an infinite interval 139
A.V. Babin

Long–time averaged Euler and Navier–Stokes equations for rotating fluids 145
A. Babin, A. Mahalov, B. Nicolaenko

Validity of the Ginzburg–Landau approximation in 2–dimensional Poiseuille flow 158
P. Bollerman

Nonlinear waves and thermal convection 165
F.H. Busse, R.M. Clever

Bifurcations of traveling waves in extended systems 181
G. Dangelmayr, J.D. Rodriguez

Edge waves and steady currents near a vertical cliff 191
H.E. de Swart, P. Blondeaux, G. Vittori

On the creation of multi-pulse traveling waves by global bifurcations 201
A. Doelman, P. Holmes

Local dynamics near a nonsemisimple resonance in Blasius boundary-layer flow 209
U. Ehrenstein, W. Koch

Spectral analysis of soliton formation 216
J. Engelbrecht, A. Salupere, T. Peipman, G.A. Maugin

Dynamics of surface waves in the Faraday experiment 223
H. Friedel, E.W. Laedke, K.H. Spatschek

Periodic patterns and traveling fronts for the Ginzburg–Landau equation 230
T. Gallay

Structure functions in magnetohydrodynamic turbulence 239
R. Grauer, C. Marliani

Solitary waves with oscillatory tails 248
R. Grimshaw

A new Hamiltonian formulation of the steady water-wave problem 259
M.D. Groves

The orbital stability of fronts for high order parabolic partial differential equations 268
M. Haragus

Periodic and quasi-periodic Alfvenic structures in a cold plasma 275
A.T. Il'ichev

On large-scale dynamics of weakly nonlinear wave-systems 282
E.A. Kartashova

Instabilities of finite amplitude short-crested free surface waves 291
C. Kharif, S. Badulin, V. Shrira

Nonlinear waves propagation in dispersive systems with coupled modes 300
S.V. Korsunsky

Exponential estimate of oscillations for generalized solitary waves 307
E. Lombardi

Spatially extended and localized traveling wave convection in binary fluid mixtures 316
M. Lücke, W. Barten, M. Kamps, R. Schmitz

Gap solitons in a coupled Korteweg-de Vries system 324
B.A. Malomed, R. Grimshaw, X. Tian

Phase shift of interacting algebraic solitary waves in a two-layer fluid system 335
Y. Matsuno

Equations for turbulent flood waves 342
Z. Mei, A.J. Roberts

Homoclinic and heteroclinic solutions in two–phase flow 353
A. Mielke

Two dimensional, periodic, capillary-gravity waves with negative surface tension 363
H. Okamoto, M. Shōji

On the strong spectral stability of some Boussinesq solitary waves 370
R.L. Pego, M.I. Weinstein

Justification of modulation equations for domains with $n \geq 2$ unbounded space directions 383
G. Schneider

Disappearance of waves in modulated train of surface gravity waves 392
M. Tanaka

Hamiltonian numerics for Hamiltonian wave models 399
F.P.H. van Beckum

WAVEPACK a software package for basic concepts and research in wave equations 405
F.P.H. van Beckum, W. Djohan

Solitary wave splitting due to a mildly sloping bottom 408
E.F.G. van Daalen

List of Participants **415**
