## CONTENTS

Foreword.....	ix
Preface .....	xi
Color plates following page 138	
Problems and phenomenology in two-dimensional turbulence .....	1
<i>G.K. Vallis</i>	
Spectra of tracer distributions: A geometric approach .....	27
<i>R.T. Pierrehumbert</i>	
The dynamics associated with the chaotic tangles of two dimensional quasiperiodic vector fields: Theory and applications .....	47
<i>Darin Beigie, Anthony Leonard and Stephen Wiggins</i>	
Infinitely conducting dynamos and other horrible eigenproblems .....	139
<i>B. J. Bayly</i>	
A note on recent experiments with Rossby waves on eastward jets .....	177
<i>L.M. Polvani and Jihad Touma</i>	
Arnol'd stability applied to fluid flow: Successes and failures .....	187
<i>Theodore G. Shepherd</i>	
The search for simplified models of two-dimensional, structured turbulence .....	207
<i>James C. McWilliams and Jeffrey B. Weiss</i>	
Conformal transforms and dynamics of two-dimensional vortices .....	221
<i>Bernard Legras and David G. Dritschel</i>	
Breaking internal waves over isolated topography .....	239
<i>W.R. Peltier and J.F. Scinocca</i>
