Contents

| | |
|---|----------------|
| Preface | <i>page ix</i> |
| Acknowledgements | xi |
| List of tables | xv |
| 1 The nature and importance of aeolian sand research | 1 |
| 1.1 Definitions | 1 |
| 1.2 Previous work | 3 |
| 1.3 Future research requirements | 5 |
| 2 The nature of airflow | 7 |
| 2.1 Physical properties of air and the Earth's atmosphere | 7 |
| 2.2 Nature and types of air motion | 10 |
| 2.3 Storm types that generate sand-transporting winds | 15 |
| 2.4 Flow in the atmospheric boundary layer | 27 |
| 3 Characteristics of windblown sediments | 44 |
| 3.1 General properties of sediment grains | 44 |
| 3.2 Grain shape | 58 |
| 3.3 Porosity, permeability, and packing of sands | 63 |
| 3.4 Grain size characteristics of aeolian sediments | 65 |
| 3.5 Shape characteristics of aeolian dune sands | 73 |
| 3.6 Surface textures of aeolian sands | 77 |
| 3.7 Porosity and permeability of aeolian sands | 80 |
| 3.8 Sources and mineral composition of aeolian dune sand | 81 |
| 4 Mechanics of aeolian sand transport | 88 |
| 4.1 Particle entrainment | 88 |
| 4.2 Transport of particles by the wind | 100 |
| 5 The formation of sand seas and dunefields | 123 |
| 5.1 Definition of sand seas and dunefields | 123 |
| 5.2 Global distribution of sand seas | 123 |
| 5.3 Factors controlling the distribution and magnitude of sand seas | 127 |
| 5.4 Development of sand seas in relation to topography | 135 |
| 5.5 Wind regime and regional sandflow paths | 139 |
| 5.6 Evolution of ergs in response to climatic changes | 145 |

| | | |
|-----------|---|------------|
| 5.7 | Effect of sea-level changes on coastal dunefields | 148 |
| 5.8 | Effect of sea-level changes on continental dunefields | 151 |
| 6 | Aeolian bedforms | 152 |
| 6.1 | Types of aeolian sand accumulation and bedform terminology | 152 |
| 6.2 | Ripples | 153 |
| 6.3 | Sand dunes | 160 |
| 6.4 | Vegetated dunes | 195 |
| 6.5 | Sand sheets | 213 |
| 6.6 | Summary of factors determining the morphology of aeolian sand accumulations | 218 |
| 7 | Internal sedimentary structures of aeolian sand deposits | 221 |
| 7.1 | Introduction | 221 |
| 7.2 | Internal structures of sand dunes | 223 |
| 7.3 | Secondary sedimentary structures in dunes | 242 |
| 7.4 | Sedimentary structures of interdune areas and sand sheets | 246 |
| 7.5 | Niveo-aeolian deposits and cryogenic structures in cold-climate dunes | 251 |
| 8 | Post-depositional modification of dune sands | 254 |
| 8.1 | Introduction | 254 |
| 8.2 | Denudation by rain splash, surface wash, soil creep, and gulying | 255 |
| 8.3 | Near-surface compaction | 255 |
| 8.4 | Addition of allochthonous components | 256 |
| 8.5 | Weathering and pedogenesis of siliceous dune sands | 257 |
| 8.6 | Formation of carbonate aeolianites | 274 |
| 8.7 | Early diagenetic cementation by evaporite minerals | 284 |
| 9 | Management and human use of sand dune environments | 286 |
| 9.1 | Thermal properties of sand, moisture regime, and vegetation growth | 286 |
| 9.2 | Water courses in dune areas | 293 |
| 9.3 | Control of windblown sand | 294 |
| 9.4 | Human use of sand dune areas | 308 |
| 10 | Aeolian research techniques | 319 |
| 10.1 | Wind tunnel studies | 319 |
| 10.2 | Measurement of sand movement using sand traps | 324 |
| 10.3 | Sand tracer techniques | 330 |
| 10.4 | Methods of sample collection for grain size and mineralogical analysis | 331 |
| 10.5 | Methods of determining the grain size of sands | 335 |
| 10.6 | Characterization of airflow | 340 |
| 10.7 | Methods of monitoring changes in sand dune terrain | 341 |
| | Appendix I. SI units and c.g.s. equivalents | 343 |
| | References | 344 |
| | Index | 392 |
