## TABLE OF CONTENTS

<b>Preface</b> .....	vii
<b>E. J. Plate</b>	
Convective boundary layer: a historical introduction .....	1
<b>J. C. Wyngaard</b>	
Convection viewed from a turbulence perspective .....	23
<b>J. C. R. Hunt</b>	
Eddy dynamics and kinematics of convective turbulence .....	41
<b>S. Zilitinkevich, A. Grachev, and J. C. R. Hunt</b>	
Surface frictional processes and non-local heat / mass transfer in the shear-free convective boundary layer .....	83
<b>R. B. Stull</b>	
Convective transport theory and the radix layer .....	115
<b>G. S. Golitsyn</b>	
Convection in viscous and rotating fluids from the viewpoint of the forced flow theory .....	129
<b>R. H. Käse</b>	
Modeling the oceanic mixed layer and effects of deep convection .....	157
<b>D. H. Lenschow</b>	
Observations of clear and cloud-capped convective boundary layers, and techniques for probing them .....	185
<b>C. Kiemle, G. Ehret, K. J. Davis, D. H. Lenschow, and S. P. Oncley</b>	
Airborne water vapor differential absorption lidar studies of the convective boundary layer .....	207
<b>J. C. Wyngaard</b>	
Experiment, numerical modeling, numerical simulation, and their roles in the study of convection .....	239
<b>R. B. Stull</b>	
Transient turbulence theory: a nonlocal description of convection .....	253
<b>E. Fedorovich</b>	
Bulk models of the atmospheric convective boundary layer .....	265

<b>C.-H. Moeng</b>	
Parameterizations of the convective boundary layer in atmospheric models .....	291
<b>R. N. Meroney</b>	
Wind tunnel simulation of convective boundary layer phenomena: simulation criteria and operating ranges of laboratory facilities .....	313
<b>E. Fedorovich and R. Kaiser</b>	
Wind tunnel model study of turbulence regime in the atmospheric convective boundary layer .....	327
<b>F. T. M. Nieuwstadt</b>	
Review of diffusion processes in the convective boundary layer .....	371
<b>D. X. Viegas</b>	
Convective processes in forest fires .....	401
<b>C.-H. Moeng</b>	
Stratocumulus-topped atmospheric planetary boundary layer .....	421
<b>A. P. Siebesma</b>	
Shallow cumulus convection .....	441
<b>Index</b> .....	487
