Contents

1	Introduction	1
1.1	Topics	1
1.2	Helpful Notes.....	4
2	Free Oscillations	5
2.1	Survey	5
2.2	Harmonic Oscillators	6
2.2.1	Undamped Harmonic Oscillators.....	6
2.2.2	Harmonic Oscillations.....	9
2.2.3	Phase Diagrams.....	12
2.2.4	Harmonic Oscillators with Damping and Amplification	14
2.2.5	Frequency Spectra.....	20
2.2.6	Linear Spring-Mass Systems	23
2.2.7	Linear Electric Circuits.....	25
2.2.8	Equivalent Nonlinear Oscillators.....	27
2.3	Modulated Linear Oscillators.....	29
2.3.1	Representations	29
2.3.2	General Solutions.....	31
2.3.3	Zeros and Oscillatory Behavior.....	34
2.3.4	Chirp Oscillators	35
2.3.5	Aperiodically Modulated Linear Oscillators.....	37
2.3.6	Oscillators with Step or Pulse Modulation	42
2.3.7	Parametric Linear Oscillators	47
2.3.8	Singularities and Approximations	65
2.4	Oscillators with Relays.....	77
2.4.1	Switching Functions.....	78
2.4.2	Oscillators with Dry Friction.....	79
2.4.3	Oscillators with Drag	82
2.4.4	Oscillators with Constant Restoring Force	84
2.4.5	Oscillators with Constant Restoring Force and Dead Zone...	85
2.4.6	Oscillators with Hysteresis.....	88
2.5	Nonlinear Liénard Oscillators	89
2.5.1	General Properties.....	90
2.5.2	Duffing Oscillators	91
2.5.3	Simple Pendulum.....	98

	2.5.4	Smith Oscillators	101
	2.5.5	Van der Pol Oscillator	103
3		Forced Oscillations	111
3.1		External Forces.....	111
3.2		Excitation of Harmonic Oscillators.....	112
	3.2.1	Transients	113
	3.2.2	Real Harmonic Excitation	113
	3.2.3	Complex Harmonic Excitation	116
	3.2.4	Exceptional Sub- and Ultraharmonics	117
	3.2.5	General Periodic Excitation.....	120
	3.2.6	Broad-Band Excitation.....	120
	3.2.7	Impulse or Shock Excitation.....	121
	3.2.8	Transients after Switching on.....	123
3.3		Excitation of Modulated Linear Oscillators.....	126
	3.3.1	Stationary Motion and Green Functions.....	127
	3.3.2	Excitation of Specific Oscillators.....	128
	3.3.3	Feedback.....	131
3.4		Excitation of Nonlinear Liénard Oscillators.....	133
	3.4.1	Lagrange Stability	133
	3.4.2	Periodic Excitation of Duffing Oscillators	134
	3.4.3	Harmonic Excitation of the van der Pol Oscillator.....	141
4		Kinematics of Systems	147
4.1		Survey.....	147
	4.1.1	Standard Systems.....	147
	4.1.2	Autonomous Systems	148
	4.1.3	Linear Systems	149
	4.1.4	Linearization of Autonomous Systems	151
4.2		Two-dimensional Autonomous Systems in General.....	152
	4.2.1	Description in Cartesian Coordinates.....	152
	4.2.2	Description in Polar Coordinates	153
	4.2.3	Classification of Systems and Flows.....	153
	4.2.4	Ideal Flows.....	156
	4.2.5	Hamiltonian Systems.....	169
	4.2.6	Gradient Systems and Flows.....	177
4.3		Two-dimensional Linear Autonomous Systems	183
	4.3.1	Representations.....	183
	4.3.2	Associated Differential Equations.....	185
	4.3.3	Stability	188
	4.3.4	Analysis of the Critical Point	190
	4.3.5	Propagators	195
4.4		Two-dimensional Quadratic Autonomous Systems	198
	4.4.1	Classification.....	198
	4.4.2	Type I Quadratic Systems.....	200

4.4.3	Type II Quadratic Systems.....	209
4.4.4	Type III Quadratic Systems.....	216
4.5	Limit Cycles of Two-dimensional Autonomous Nonlinear Systems .	223
4.5.1	Limit Cycles of Axially Symmetric Systems.....	223
4.5.2	Existence of Limit Cycles.....	231
4.6	Stability Criteria of Lyapunov.....	232
4.6.1	Conservative Field of Force.....	233
4.6.2	Lyapunov Functions and Stability	234
4.6.3	The Hamilton Function as Lyapunov Function	236
4.7	Population Dynamics	238
4.7.1	Single Populations	239
4.7.2	The Lotka-Volterra Model	240
4.8	Conservative Linear Mechanical Systems	243
4.8.1	Lagrange Mechanics.....	244
4.8.2	Oscillations.....	244
4.8.3	Molecular Vibrations.....	246
4.9	Time-dependent Linear Systems.....	247
4.9.1	Homogenous Systems of Arbitrary Dimensions	247
4.9.2	Stability of Homogeneous Systems	252
4.9.3	Two-dimensional Homogeneous Systems.....	253
4.9.4	Inhomogeneous Systems.....	257
4.10	Three-dimensional Systems and Flows.....	258
4.10.1	Concepts of Fluid Kinematics.....	259
4.10.2	Gradient Systems as Potential Flows.....	267
4.10.3	Flows without Sources of Sinks.....	270
4.10.4	Decomposition of Velocity Fields.....	273
4.10.5	Three and Higher Dimensional d'Alembert Systems.....	274
5	Transfer Systems.....	276
5.1	Linear Time-invariant Systems.....	276
5.1.1	Basic Concepts.....	276
5.1.2	System Operators of LTI Systems	277
5.1.3	Impulse Response Functions	278
5.1.4	Transients	280
5.1.5	Response Evaluation by Laplace Transformation	282
5.1.6	Fourier Analysis.....	282
5.1.7	Averages and Correlations	284
5.1.8	Differential Transfer Equations	287
5.1.9	Nonlinear Time-invariant Systems.....	289
5.2	Circuits.....	289
5.2.1	Feedback-control Systems	290
5.2.2	Resonant Oscillating Circuits	291
5.3	Delay Systems	294
5.3.1	Normalized Delay System	294

5.3.2	Delay Systems in Circuits.....	295
5.3.3	Nonlinear Delay Systems.....	298
6	Instability and Chaos.....	300
6.1	Bifurcation.....	300
6.1.1	Bifurcation in Autonomous Systems.....	300
6.1.2	Bifurcation in One Dimension.....	302
6.1.3	Saddle-Node Bifurcation.....	303
6.1.4	Transcritical Bifurcation.....	306
6.1.5	Pitchfork Bifurcation.....	308
6.1.6	Rotating Pendulum.....	311
6.1.7	Hopf Bifurcation.....	314
6.2	Deterministic Chaos.....	317
6.2.1	Criteria for Chaos.....	319
6.2.2	Routes to Chaos.....	320
6.3	Lorenz Model.....	322
6.3.1	Stability Considerations.....	323
6.3.2	Strange Lorenz Attractor.....	325
6.4	Logistic Map.....	326
7	Linear Waves.....	331
7.1	Classification of Waves.....	331
7.1.1	Scalar and Vectorial Waves.....	331
7.1.2	Longitudinal and Transversal Waves.....	334
7.1.3	Equivalence of Scalar and Longitudinal Waves.....	340
7.1.4	Linear Waves.....	341
7.2	Harmonic Waves.....	342
7.2.1	Description.....	342
7.2.2	Dispersion Relations.....	344
7.2.3	Differential Operators.....	347
7.2.4	Harmonic Electromagnetic Waves in Vacuum.....	349
7.3	Wave Velocities and Dispersion.....	356
7.3.1	Phase Velocity.....	358
7.3.2	Group or Envelope Velocity.....	359
7.3.3	Phase Dispersion.....	360
7.3.4	Group Dispersion.....	362
7.3.5	Surface Waves of Liquids.....	363
7.3.6	Envelope Equations.....	365
7.4	Linear Waves in Homogeneous Isotropic Media.....	368
7.4.1	Hertz Equation.....	369
7.4.2	Reduced Hertz Equation.....	370
7.4.3	Linear Klein-Gordon Equation.....	371
7.4.4	Telegraph Equation.....	374
7.4.5	Linear Diffusion Equation.....	377
7.4.6	Linearized Korteweg-de Vries Equation.....	379

7.4.7	Linear Schrödinger Equation	380
7.5	Electromagnetic Waves in Linear Media	382
7.5.1	Characterization of the Media	382
7.5.2	Dispersion of Harmonic Waves	385
7.5.3	Transient Waves	389
7.6	Linear Waves in Periodic Media and Structures	391
7.6.1	Infinite Chains with Identical Springs and Masses.....	391
7.6.2	Infinite Chains with Identical Springs and Alternating Masses	394
7.6.3	Electromagnetic Waves in Periodic Media.....	398
7.6.4	Wave Mechanics of a Particle in a Periodic Potential.....	408
8	Nonlinear Waves	413
8.1	Wave Equations and Solitary Waves	413
8.2	Nonlinear Waves without Dispersion.....	416
8.3	Nonlinear Diffusion.....	418
8.4	Korteweg-de Vries Equation	420
8.4.1	Conservation Laws	421
8.4.2	Traveling Waves.....	421
8.4.3	Korteweg-de Vries Solitons	423
8.4.4	Cnoidal Korteweg-de Vries Waves.....	425
8.4.5	Generalized Korteweg-de Vries Equation.....	426
8.5	Nonlinear Klein-Gordon Equations	427
8.5.1	Traveling Waves.....	429
8.5.2	Sine-Gordon Solitons.....	430
8.5.3	Cnoidal Sine-Gordon Waves	433
8.6	Nonlinear Schrödinger Equation	435
8.6.1	Nonlinear Kerr Media	436
8.6.2	Solitons in Kerr Media	439
8.6.3	Kerr Media with Gain.....	441
8.7	Maxwell-Bloch Equations	442
8.8	Toda Chain.....	447
8.8.1	Toda Solitons	448
8.8.2	Cnoidal Toda Waves.....	449
9	Standing Waves	451
9.1	Wave Form and Boundary Conditions	452
9.2	Free Vibrations of a String	453
9.3	Free Standing Waves on Membranes.....	456
9.3.1	Modes of a Rectangular Membrane.....	457
9.3.2	Modes of a Circular Membrane.....	458
9.4	Free Acoustic Standing Waves in Cavities.....	460
9.4.1	Traveling and Standing Spherical Waves	460
9.4.2	Acoustic Modes of a Spherical Cavity	462
9.5	Sturm-Liouville Wave Patterns.....	466

9.5.1	Sturm-Liouville Systems.....	467
9.5.2	Eigenvalues and Eigenfunctions.....	469
9.6	Free Nonlinear Standing Waves	471
9.6.1	Gradient Dominated Hertz Waves.....	471
9.6.2	Euler-Painlevé Waves.....	473
9.7	Forced Standing Waves	474
9.7.1	Forced Waves on a String.....	474
9.7.2	Forced Waves on a Telegraph Line.....	475
9.7.3	Forced Gradient Dominated Hertz Waves	476
9.7.4	Forced Bioche Waves.....	477
A	Appendix.....	479
A.1	Fourier Series.....	479
A.1.1	General Rules	479
A.1.2	Real Periodic Functions.....	480
A.2	Fourier Transformation	484
A.2.1	General Rules	484
A.2.2	Real Functions.....	485
A.3	Laplace Transformation.....	487
A.3.1	General Rules	487
A.3.2	Heaviside and Dirac Functions.....	488
A.3.3	Real Functions.....	489
A.4	Convolution (Faltung).....	490
A.4.1	General Rules	490
A.4.2	Heaviside Unit Step	492
A.4.3	Special Real Functions.....	493
A.4.4	Hilbert Transformation	494
