IUTAM Symposium on Developments in Geophysical Turbulence

Proceedings of the IUTAM Symposium
held at the National Center for Atmospheric Research,
Boulder, CO,
16–19 June 1998

D III 276

Edited by

ROBERT M. KERR

*National Center of Atmospheric Research,

Contents

Preface	vii
1. Herring, J.R. A brief history of the Geophysical Turbulence Program at NCAR	1
2. Lilly, D.K. The meteorological development of large eddy simulation	5
3. Griffiths, R.W. Developments in high-Rayleigh number convection	19
4. Van Haarlem, B. & Nieuwstadt, F.T.M. Direct numerical simulation of particle motion in relation to structures in the convective boundary layer	37
5. Hallberg, R. & Rhines, P.B. Boundary sources of potential vorticity in geophysical circulations	51
6. Saiki, E.M., Kerr, R.M. & Large, W.G. Three-dimensional initiation of thermohaline fingering	67
7. Fernando, H.J.S. Aspects of stratified turbulence	81
8. Kimura, Y. & Métais, O. Particle dispersion and vortex formation in rotating stratified turbulence	93
9. Eiff, O. & Bonneton, P. Structural features of breaking waves in stratified flow over mountains	109
10. Cotel, A.J. & Breidenthal, R.E. Vortex Persistence: A recent model for stratified Entrainment and its application to geophysical flows	119
11. Hua, B.L., Klein, P. & Lapeyre, G. Formation of tracer gradients in nearly two-dimensional flows	127
12. Segur, H. Evolution of a tracer gradient in an incompressible, two-dimensional flow	143

13. Hua, B.L., Klein, P. & Lapeyre, G. Comments on "Evolution of a tracer gradient in an incompressible, two-dimensional flow" by Harvey Segur	151
14. Majda, A.J., Grote, M.J. & Shefter, M.G. Analytical models for vertical collapse and instability in stably stratified flows	153
15. Hayashi, Y.-Y., Ishioka, K., Yamada, M. & Yoden, S. Emergence of circumpolar vortex in two dimensional turbulence on a rotating sphere	179
16. Fincham, A.M. Direct laboratory simulations of 3D vortex structures in stably stratified rotating fluids	193
17. Tanahashi, M., Miyauchi, T. & Matuoka, K. Statistics of coherent fine scale structure in turbulent mixing layer	205
18. Diamessis, P.J. & Nomura, K.K. Structure and dynamics of small-scale turbulence in stably stratified homogeneous shear flows	219
19. Lesieur, M., Delcayre, F. & Lamballais, E. Spectral eddy-viscosity based LES of shear and rotating flows	235
20. Stevens, B., Moeng, C.-H. & Sullivan, P.P. Entrainment and subgrid lengthscales in large-eddy simulations of atmospheric boundary-layer flows	253
21. Gibbon, J.D. Extending Lundgren's transformation to construct stretched vortex solutions of the 3D Navier-Stokes and Euler equations	271
22. Galtier, S., Politano, H. & Pouquet, A. A one-dimensional MHD model of solar flares: statistics or physics?	283
List of Participants	293
