Preface xi

I. INTRODUCTION

PART A

| | | |
|-----|--------------------------|---|
| 1.1 | A few simple experiments | 1 |
| 1.2 | Equations of motion | 5 |
| 1.3 | Theoretical survey | 8 |

PART B

| | | |
|-----|--|----|
| 1.4 | A formulation for stratified fluids | 11 |
| 1.5 | Rudiments of vorticity theory | 18 |
| 1.6 | Rudiments of viscous boundary layer theory | 23 |

2. CONTAINED ROTATING FLUID MOTION:
LINEAR THEORIES

| | | |
|------|--|----|
| 2.1 | Classification | 28 |
| 2.2 | Almost rigid rotation | 28 |
| 2.3 | The Ekman layer | 30 |
| 2.4 | Spin-up | 34 |
| 2.5 | The initial value problem: formulation | 38 |
| 2.6 | The geostrophic mode | 43 |
| 2.7 | Inertial waves | 51 |
| 2.8 | Mean circulation theorem | 54 |
| 2.9 | Viscous dissipation | 56 |
| 2.10 | The initial value problem: solution and critique | 58 |
| 2.11 | Special cases | 60 |
| 2.12 | Motion in a sphere | 63 |
| 2.13 | Precession and the problem of forced motions | 68 |

| | | |
|-------------|--|----------------|
| 2.14 | Resonance in a sphere | <i>page</i> 78 |
| 2.15 | Motion in a cylinder | 81 |
| 2.16 | Rossby waves: part one | 85 |
| 2.17 | Steady motions and Ekman layers | 91 |
| 2.18 | Vertical boundary layers | 97 |
| 2.19 | Steady motions and vertical shear layers | 106 |
| 2.20 | A 'wind-driven' circulation | 118 |
| 2.21 | Some effects of stratification | 124 |

**3. CONTAINED ROTATING FLUID MOTION:
NON-LINEAR THEORIES**

| | | |
|-------------|--|-----|
| 3.1 | Introduction | 133 |
| 3.2 | Boundary layer on an infinite plate | 133 |
| 3.3 | Boundary layer on a finite plate | 139 |
| 3.4 | Motion between concentric plates | 145 |
| 3.5 | Spherical boundaries | 150 |
| 3.6 | Momentum-integral methods | 153 |
| 3.7 | Spin-up | 160 |
| 3.8 | Some experiments with non-linear phenomena | 173 |
| 3.9 | Large angle precession | 176 |
| 3.10 | Vortex flows and similarity solutions | 181 |

4. MOTION IN AN UNBOUNDED ROTATING FLUID

| | | |
|------------|---|-----|
| 4.1 | Classification | 185 |
| 4.2 | Plane inertial waves | 185 |
| 4.3 | Slow motion along the axis of rotation | 192 |
| 4.4 | Oscillatory motion | 200 |
| 4.5 | Wave propagation in a uniform current | 204 |
| 4.6 | Motion along the rotation axis at moderate speeds | 213 |
| 4.7 | Time-dependent considerations | 222 |

**5. DEPTH-AVERAGED EQUATIONS: MODELS FOR
OCEANIC CIRCULATION**

| | | |
|------------|--|-----------------|
| 5.1 | Introduction | <i>page</i> 225 |
| 5.2 | Depth-averaged equations | 225 |
| 5.3 | Oceanic models | 234 |
| 5.4 | Steady circulations and inertial boundary layers | 238 |
| 5.5 | Rossby waves: part two | 246 |
| 5.6 | Numerical studies | 254 |
| 5.7 | Flow between concentric spheres | 262 |

6. STABILITY

| | | |
|--------------------------------------|---|-----|
| 6.1 | Introduction | 271 |
| 6.2 | Rayleigh's criterion | 271 |
| 6.3 | Stability of the Ekman layer: experiments | 275 |
| 6.4 | Stability of the Ekman layer: theory | 281 |
| 6.5 | Vertical shear layers | 288 |
| 6.6 | Stratified fluids | 292 |
| 6.7 | Thermal convection in a rotating annulus | 293 |
| <i>Notation Guide</i> | | 300 |
| <i>Bibliography and Author Index</i> | | 305 |
| <i>Subject Index</i> | | 324 |
