# Rotating Fluids in Geophysics

Edited by

P.H. ROBERTS      A.M. SOWARD

*School of Mathematics  
University of Newcastle upon Tyne  
England*

1978

ACADEMIC PRESS

London · New York · San Francisco

*A Subsidiary of Harcourt Brace Jovanovich, Publishers*

## CONTENTS

Contributors	v
Foreword	vii
Acknowledgements	xi
Contents	xiii
CHAPTER 1: GENERAL INTRODUCTION: THE DYNAMICS OF ROTATING FLUIDS .	
by R. Hide	
1.1 Introduction	1
1.2 Some Useful Results	3
1.3 Flows due to Oscillatory Mechanical Forcing	7
1.4 Steady Source-Sink Flows	10
1.5 Thermally-Driven Flows due to an impressed Horizontal Temperature Gradient	20
References	26
CHAPTER 2: HOMOGENEOUS FLUIDS IN ROTATION	
A Viscous Effects, by D.W. Moore	
2.1 Objectives	29
2.2 The Equations of Motion	29
2.3 Rossby and Ekman Numbers. Geostrophy	31
2.4 The Ekman Layer	35
2.5 Flows with Horizontal Boundaries	40
2.6 Flows with Axisymmetry	47
2.7 Stewartson Shear Layers	54
2.8 Non Axisymmetric Motion	61
References	65

## CONTENTS

B	Waves, by K. Stewartson	
2.9	Introduction	67
2.10	Basic Equations	68
2.11	Almost Rigid Motions	70
2.12	Plane Inertial Waves	71
2.13	Reflection of Inertial Waves	74
2.14	Waves in Closed Containers	79
2.15	Inertial Waves between Concentric Spheres	82
2.16	Rossby Waves	93
2.17	The Beta Plane	99
	References	101
	C Supporting Article: Turbulence in Rotating Fluids, by D.J. Tritton	105
CHAPTER 3:	INHOMOGENEOUS FLUIDS IN ROTATION	
	A Variations on a Theme of Eady, by P.G. Drazin	
3.1	Theme: the Eady Problem	139
3.2	First Variation: Viscosity	146
3.3	Episode	148
3.4	Second Variation: Cylindrical and Spherical Configurations	154
3.5	Third Variation: Non-Linearity	163
3.6	Coda: Experiments	166
	References	167
	B Baroclinic Instability and Frontogenesis, by B.J. Hoskins	
3.7	Introduction	171
3.8	Symmetric Baroclinic Instability	176
3.9	Brief Sketch of Non-Linear Quasi-Geostrophic Theory	180
3.10	Fronts	182
3.11	Baroclinic Waves: Some Effects of Full Non-Linearity and Spherical Geometry	191

	References	201
C	Topics in Oceanography, by J.A. Johnson	
3.12	Introduction	205
3.13	Coastal Upwelling	217
3.14	Unsteady and Stratified Coastal Upwelling	226
3.15	Southern Ocean Circulation	233
	References	238
D	Articles on Related Topics	
1	Some Considerations of Stability, Wave Interactions and Energy Transfer in Large-Scale Atmospheric Flow, by W. Blumen	239
2	Topographic Effects in Rotating Stratified Fluids, by P.A. Davies	249
3	Withdrawal from a Reservoir, by W.G. Pritchard	267
4	Rotating Stars, by C.A. Jones	281
CHAPTER 4: THE MAGNETOHYDRODYNAMICS OF ROTATING FLUIDS		
A	Basic Theory and Simple Consequences, by N.O. Weiss	
4.1	Introduction	295
4.2	Kinematic Magnetohydrodynamics	297
4.3	Dynamical Effects	305
	References	313
B	Magnetohydrodynamic Waves and Instabilities in Rotating Fluids, by D.J. Acheson	
4.4	Introduction: the Dimensionless Parameter $\mathcal{J}$	315
4.5	Steady, or Quasi-Steady Motions: the Dimensionless Parameter C	316
4.6	Three-Dimensional Wave Motions	322
4.7	Magnetohydrodynamic Rossby Waves	324
4.8	Magnetohydrodynamic Waves in a Rotating Spherical Shell	329

## CONTENTS

4.9	Generation of Slow Magnetohydrodynamic Waves by Instabilities	332
4.10	Magnetic Buoyancy in a Rotating Gas	338
4.11	Magnetohydrodynamic Effects on Thermal Convection in a Rotating Sphere	341
4.12	Concluding Remarks	344
	References	346
	C The Kinematic Dynamo Problem, by A.M. Soward	
4.13	The Basic Problem	351
4.14	An Antidynamo Theorem	352
4.15	Almost Axisymmetric Dynamos	354
4.16	A Two-Scale Dynamo of Small Microscale Magnetic Reynolds Number	356
	References	359
	D Introduction to the Theory of Geomagnetism, by F. Busse	
4.17	Introduction to Geomagnetism	361
4.18	Convection in the Earth's Core	363
4.19	The Dynamo Problem for Convection in the Earth's Core	372
4.20	The Amplitude of Planetary Magnetic Fields	379
	References	387
	E Articles on Related Topics	
1	Magnetic Flux Ropes, by M.R.E. Proctor and N.O. Weiss	389
2	A Convection Driven Dynamo, by A.M. Soward	409
3	Magneto-Convection in a Rapidly Rotating Fluid, by P.H. Roberts	421
CHAPTER 5: TECHNIQUES		
	A Theory of Hydrodynamic Stability, by L.M. Hocking	
5.1	Introduction	437

## CONTENTS

5.2	Inviscid Flow	447
5.3	Viscous Flow	454
5.4	Development of Initial Disturbances	459
5.5	Non-Linear Theory	463
	References	468
B	Supporting Articles	
1	Some Asymptotic Problems in the Theory of the Stability of Stratified Viscous Shear Flows, by W.H. Reid	471
2	Numerical Methods for the Solution of Linear Differential Eigenvalue Problems, by A. Davey	485
3	Numerical Methods in Geophysical Fluid Dynamics, by M. Ghil	499
4	Laboratory Experiments in Geophysical Fluids, by P.A. Davies	523
	Subject Index	547
