UNIVERSITÄT HANNOVER
MORTENHÄUSER STR. 2 • 3000 HANNOVER 21

PROCEEDINGS OF A SYMPOSIUM ON THE
AGROMETEOROLOGY
OF THE
RICE CROP

World Meteorological Organization and
The International Rice Research Institute

1980
THE INTERNATIONAL RICE RESEARCH INSTITUTE
Los Banos, Laguna, Philippines • P.O. Box 933, Manila, Philippines

Contents

Foreword	
<i>D. A. Davies</i>	vi
<i>N. C. Brady</i>	vii
Participants	ix
Opening remarks	xii
<i>W. Baier</i>	
Welcome address	
<i>V. K. Krishnamurthy</i>	xiii
<i>N. C. Brady</i>	xv
Presentation of papers	
I. CLIMATIC ASPECTS OF RICE PRODUCTION (REVIEW)	
Climatic constraints to rice production in the Philippines	3
<i>Ed. B. Pantastico and A. C. Cardenas</i>	
Meteorological aspects of rice production in Central and South America – current and future	9
<i>F. S. da Mota</i>	
Meteorological aspects of rice production in India	19
<i>P. S. Sreenivasan</i>	
Agrometeorology of three rice regions of the Indus Plain	33
<i>M. Rafiq</i>	
Agroclimatic constraints to dryland rice production in West Africa	37
<i>T. L. Lawson</i>	
The agroclimatic classification of rice-growing environments in Indonesia	47
<i>L. R. Oldeman</i>	
Macroclimatic aspects of rice production in Southeast Asia	57
<i>S. Hardjwinata</i>	
II. DATA ACQUISITION AND MEASUREMENTS	
Measurements of meteorological variables in rice-weather experiments	71
<i>Z. Uchijima</i>	
Measurement of evapotranspiration in rice	87
<i>V. S. Tomar and J. C. O'Toole</i>	
Minimum data requirements in rice experiments	95
<i>J. F. Angus</i>	
Acquisition and analysis of rice and weather data	101
<i>R. P. Sarker</i>	
III. RESEARCH AND APPLICATIONS	
The application of agrometeorology to some aspects of rice research in Sri Lanka	115
<i>C. R. Panabokke and N. Hussan</i>	

Agrometeorological research and extension for the rice farmer in the humid tropics <i>M. W. Baradas</i>	121
--	-----

Climatic factors in rice-based cropping systems research <i>H. G. Zandstra, J. F. Angus, and M. M. Tamisin</i>	127
---	-----

IV. CLIMATIC CHANGE AND VARIABILITY

The impact of world weather change on rice production <i>J. W. Stansel</i>	143
---	-----

Climatically induced rice production variations and their influence on society <i>K. Takahashi</i>	153
---	-----

Crop weather analysis based on minimum meteorological data for multiple cropping in the humid lowland tropics <i>J. J. Riley</i>	157
---	-----

Climate change in India <i>R. E. Huke and S. Sardido</i>	173
---	-----

Maximum water requirement of upland rice variety OS6 in the humid/subhumid zone of West Africa <i>T. L. Lawson and K. Alhuri</i>	181
---	-----

V. MODELING AND DATA ANALYSIS

Climatic factors and the modeling of rice growth and yield <i>J. F. Angus and H. G. Zandstra</i>	189
---	-----

A conceptual agromet rice yield model <i>J. W. Stansel and R. E. Fries</i>	201
---	-----

Dynamic simulation of irrigated rice crop growth and yield <i>J. A. McMennamy</i>	213
--	-----

Rainfall recurrence analysis for extrapolating rice-based cropping patterns <i>R. A. Morris and F. M. Rumbaoa, Jr.</i>	223
---	-----

A weather-technology model for rice in Southern Brazil <i>F. S. da Mota and J. B. da Silva</i>	235
---	-----

An analogue approach for estimating rice yield in China <i>A. Y. M. Yao and S. K. LeDuc</i>	239
--	-----

Report of Working Groups	249
Background information	249
Objectives	250
Recommendations of Working Group I – Climatic data	250
Recommendations of Working Group II – Minimum data requirements in rice-weather experiments	252
Recommendations of Working Group III – Data analysis and modeling	252
Other general recommendations	254
Closure of the session	254
