

DYNAMICAL METEOROLOGY

An Introductory Selection

$$n = a \sin b (x - ct)$$

$$acc_x = PGF_x + CF_x$$

$$n = f(x - ct) = a_s$$

$$Acc_x = PGF_x + CF_x$$

$$acc_y = PGF_y + CF_y$$

$$h(x, y) = a_0 + a_1x + a_2y$$

Contents

<i>List of contributors</i>	vi
<i>Preface</i>	vii
1 Weather, meteorology, physics, mathematics <i>B. W. Atkinson</i>	1
2 Atmospheric hydrodynamics <i>H. A. Panofsky</i>	8
3 Atmospheric thermodynamics <i>H. A. Panofsky</i>	21
4 Atmospheric vorticity and divergence <i>R. S. Harwood</i>	33
5 Practical analysis of dynamical and kinematic structure: principles, practice and errors <i>M. A. Pedder</i>	55
6 Practical analysis of dynamical and kinematic structure: some applications and a case study <i>M. A. Pedder</i>	69
7 Practical analysis of dynamical and kinematic structure: more advanced analysis schemes <i>M. A. Pedder</i>	87
8 Atmospheric waves <i>B. W. Atkinson</i>	100
9 Dynamical meteorology: some milestones <i>B. W. Atkinson</i>	116
10 The spectrum of atmospheric motions <i>E. R. Reiter</i>	130
11 Some aspects of the description of atmospheric turbulence <i>A. Ibbetson</i>	138
12 Atmospheric energetics <i>A. A. White</i>	153
13 Trough—ridge systems as slant-wise convection <i>J. S. A. Green</i>	176
14 Numerical modelling of the atmosphere <i>A. J. Gadd</i>	194
15 Epilogue: a perspective of dynamical meteorology <i>J. Smagorinsky</i>	205
<i>Index</i>	221
