Frontiers in Fluid Mechanics

A Collection of Research Papers
Written in Commemoration of the 65th Birthday
of Stanley Corrsin

Editors: S. H. Davis and J. L. Lumley

With 132 Figures

INSTITUT 19312881

Contents

On the Approach to Isotropy of Homogeneous Turbulence: Effect of the Partition of Kinetic Energy Among the Velocity Components
By L. Le Penven, J. N. Gence and, G. Comte-Bellot (With 16 Figures) 1
1. Introduction 1
2. Experimental Arrangements 4
3. Measuring Equipment and Procedure 7
4. Experimental Results 8
5. Consequences for Turbulence Modeling in the Physical Space . 12
6. Anisotropy of the Spectral Tensor 15
7. Conclusions 19
Appendix 20
References 21

Random Incompressible Motion on Two and Three-Dimensional Lattices and Its Application to the Walk on a Random Field
By M.J. Karweit (With 14 Figures) 22
1. Introduction 22
2. Description and Generation of Discrete Fields 24
3. Production of Markovian and Correlated Discrete Fields . . . 27
4. Statistics of the Fields 30
5. Statistics of Particle Dispersion 35
6. Extending the Work to Three-Dimensional Discrete Fields . . 38
7. Conclusions 39
References 39

Transition and Turbulence in Fluid Flows and Low-Dimensional Chaos
By K.R. Sreenivasan (With 18 Figures) 41
1. Introduction 41
2. Experiments 45
3. Results from Spectral Measurements 47
4. Results from the Dimension of the Attractor 58
5. Discussion of Results 63
Appendix 64
References 66

Some Contributions of Two-Point Closure to Turbulence
By J.R. Herring (With 9 Figures) 68
1. Introduction 68

2. The Decay of Total Energy and Scalar Variance 71
3. Return to Isotropy 75
4. Two-Dimensional Turbulence 76
5. Convection 78
6. Concluding Comments 79
Appendix A 81
Appendix B 83
References 86

Intermittent Turbulent Flow
By W. Kollmann (With 10 Figures) 88
1. Introduction 88
2. Conditional Events and Their Description 89
3. Conditional Moments 92
4. Turbulent Flows with Chemical Reactions 101
5. Applications 104
6. Conclusions 108
References 108
Appendix 111

The Spectra of Single Reactants in Homogeneous Turbulence
By E.E. O'Brien 113
1. Introduction 113
2. Turbulent Mixing Approximation 115
3. Transport in Composition Space Due to Molecular Diffusion and Reaction 117
4. Combined Closures for Turbulent Mixing of a Reactive Scalar 120
References 121

The Dynamics of Turbulent Spots
By J.J. Riley and M. Gad-el-Hak (With 17 Figures) 123
1. Introduction 123
2. The Incipient Spot 124
3. Average Properties of Spots 131
4. Underlying Structure of Turbulent Spots 135
5. Relationship to Other Flows 145
6. Conclusions 149
References 152

Spectral and Statistical Characteristics of Breaking Waves
By O.M. Phillips 156
1. Introduction 157
2. The Statistical Equilibrium of Short Waves 158
3. Constraints on the Constants of Proportionality 164
4. Some Statistical Characteristics of Breaking Events 165
References 169

How Do Liquid Drops Spread on Solids?
By S. Rosenblat and S.H. Davis (With 4 Figures) 171
1. Introduction 171
2. Formulation 172
3. Lubrication Approximation 174
4. Evolution Equation 177
5. Newtonian Liquids 179
6. Non-Newtonian Liquids 181
7. Conclusions 182
References 183

Effects of Streamline Curvature on Turbulence
By M.M. Gibson (With 12 Figures) 184
1. Introduction 184
2. The Analogy Between Streamline Curvature and Buoyancy . . 186
3. Measurements in Curved Wall Layers 189
4. Modeling the Second Moment Equations 194
References 198

Limitations of Second Order Modeling of Passive Scalar Diffusion
By J.L. Lumley and I. Van Cruyningen (With 15 Figures) 199
1. Introduction 199
2. Pope's Problem 204
3. Equations, Model and Initial Conditions 207
4. Results and Discussion 210
5. Conclusions 216
References 217

Acoustic Wave Propagation in Fluids
By T.S. Margulies and W.H. Schwarz (With 17 Figures) 219
1. Introduction 219
2. Single-Component Newtonian Fluid 221
3. Newtonian Fluid Mixture with Coupled Reactions (Nondiffusive System) 232
4. Binary Mixture of Newtonian Fluids with a Generalized Fick's Law of Diffusion 246
5. Viscoelastic Fluids 255
6. Viscoelastic Fluids with Coupled Reactions 272
7. Conclusions 274
8. List of Symbols 275
References 278
