Atmospheric Tidal and Planetary Waves

KLUWER ACADEMIC PUBLISHERS

DORDRECHT / BOSTON / LONDON

Table of Contents

258/3285 INSTITUT
FÜR METEOROLOGIE U. KLIMATOLOGIE
UNIVERSITÄT HANNOVER
HERRENHAUSER STR. 2 · 3000 HANNOVER 21

Preface	ix
Chapter 1. Introduction	1
Chapter 2. Basic Equations	6
2.1. Hydrodynamic and Thermodynamic Equations	6
2.2. Equations of the Mean Flow	10
2.3. Equations of the Eddies	11
2.4. Energy Balance	12
2.5. Vorticity and Divergence	16
2.6. Linearization	17
2.7. Eliassen–Palm Flux	18
2.8. Ertel Potential Vorticity	19
2.9. Diffusive Separation of Atmospheric Constituents	20
2.10. Spherical Harmonics	22
2.11. Hermite Functions	31
Chapter 3. External Energy Sources	33
3.1. Solar Irradiance	33
3.2. Solar Heat Input into Upper Atmosphere	35
3.3. Solar Heat Input into Lower and Middle Atmosphere	40
3.4. Lunar Gravitational Tidal Energy	44
3.5. Solar Wind Energy	48
Chapter 4. Internal Energy Sources and Sinks	53
4.1. Eddy Viscosity	53
4.2. Eddy Heat Conduction	56
4.3. Latent Heat	59
4.4. Newtonian Cooling	61
4.5. Rayleigh Friction	61
4.6. Ion Drag	64
4.7. Feedback between Large-Scale Eddies and Mean Flow	64

Chapter 5. Horizontal Modal Structure	68
5.1. Separation of Variables	68
5.2. Eigenvalues of Laplace's Equations	71
5.3. Gravity Waves	76
5.4. Rossby-Haurwitz Waves	77
5.5. Kelvin Waves and Yanai Waves	79
5.6. Low Frequency Waves with Positive Eigenvalues	82
5.7. Class II Waves of Wavenumber $m = 0$	84
5.8. Diurnal Tides	90
5.9. Dynamo Action of Tidal Winds	95
5.10. Rossby Waves Migrating within Mean Zonal Flow	101
5.11. Influence of Zonal Mean Flow on Rossby-Haurwitz Waves	105
5.12. Solutions of Inhomogeneous Laplace Equations	115
Chapter 6. Vertical Modal Structure	116
6.1. Characteristic Waves	116
6.2. Vertical Wavenumber	118
6.3. Particular Solutions	120
6.4. Boundary Conditions	122
6.5. Normal Modes	124
6.6. Height Structure of External Waves	126
6.7. Directly Driven Circulation Cells	129
6.8. Indirectly Driven Circulation Cells	138
6.9. Height Structure of Internal Waves	141
6.10. Impulsive Heat Input	142
6.11. Ray Tracing of Rossby Waves	149
6.12. Mode Conversion	151
6.13. Baroclinic Instability	151
Chapter 7. Nonlinear Wave Propagation	158
7.1. Nonlinear Coupling between Rossby-Haurwitz Waves	158
7.2. Analytic Solutions for Weak Coupling of Rossby-Haurwitz Waves	160
7.3. Rossby-Haurwitz Wave Coupling in Realistic Mean Flow	162
7.4. Homogeneous and Isotropic Turbulence	167
7.5. Space-Time Analysis	173
7.6. Nonlinear Normal Mode Initialization	179
7.7. Lorenz Attractor	183
7.8. Logistic Difference Equation	186
7.9. Multiple Equilibria	195
Chapter 8. Tidal Waves	199
8.1. Seasonal Tides within Lower and Middle Atmosphere ($m = 0$)	199

8.2. Quasi-Stationary Seasonal Waves ($m > 0$)	210
8.3. Climatic Mean Flow	218
8.4. Seasonal Tides within Upper Atmosphere	224
8.5. Migrating Solar Diurnal Tides within Lower and Middle Atmosphere	234
8.6. Migrating Solar Diurnal Tides within Upper Atmosphere	242
8.7. Nonmigrating Solar Diurnal Tides	247
8.8. Lunar Tides	249
8.9. Electromagnetic Effects of Tidal Waves	254
8.10. Energy and Momentum Deposition of Solar Diurnal Tides	261
Chapter 9. Planetary Waves	266
9.1. Extratropical Transients	266
9.2. Southern Oscillation	272
9.3. Forty-Day Oscillations	277
9.4. Transients in the Tropical Middle Atmosphere	281
9.5. Fluctuations of Atmospheric Angular Momentum	288
9.6. Sudden Stratospheric Warmings	292
9.7. Thermospheric Response to Solar EUV Fluctuations	299
9.8. Thermospheric Storms	304
9.9. Solar Activity Effects within Middle and Lower Atmosphere	317
Chapter 10. Epilogue	322
References	323
Subject Index	341
