CONTENTS

	Page
Preface	
Part I - Preliminaries	
I.1 - General Concepts and Examples of Rotating Fluids by <i>E. J. Hopfinger</i>	3
Part II - Fundamentals	
II.1 - Parameters, Scales and Geostrophic Balance by <i>E. J. Hopfinger</i>	1 5
II.2 - Vorticity, Potential Vorticity by <i>M. Mory</i>	2 7
Part III - Instabilities	
III.1 - Dynamics and Instabilities of Ekman and Stewartson Layers by <i>P. L. Read</i>	4 9
III.2 - Barotropic and Baroclinic Instabilities by <i>P. F. Linden</i>	8 5
III.3 - Dynamics of Fronts and Frontal Instability by <i>P. F. Linden</i>	9 9
Part IV - Waves	
IV.1 - Wave Motions in a Rotating and/or Stratified Fluid by <i>T. Maxworthy</i>	1 2 7
IV.2 - Inertial Waves by <i>M. Mory</i>	1 7 5
IV.3 - Rotating Annulus Flows and Baroclinic Waves by <i>P. L. Read</i>	1 8 5
Part V - Vortex Dynamics	
V.1 - Dynamics of Vortex Filaments by <i>D. W. Moore</i>	2 1 7
V.2 - Two-Dimensional Barotropic and Baroclinic Vortices by <i>E. J. Hopfinger</i>	2 5 9
V.3 - Long-Lived Eddies in the Atmospheres of the Major Planets by <i>P. L. Read</i>	2 8 3
V.4 - Vortex Flow Generated by a Rotating Disc by <i>M. Mory and A. Spohn</i>	3 0 1

Part VI - Turbulence

VI.1 - Rotation Effects on Turbulence by <i>M. Mory</i>	3 1 5
VI.2 - Convective and Shear Flow Turbulence with Rotation by <i>T. Maxworthy</i>	3 3 9
VI.3 - Baroclinic Turbulence by <i>E. J. Hopfinger</i>	3 5 9
VI.4 - Resonant Collapse by <i>P. F. Linden and R. Manasseh</i>	3 7 1
