	<i>page</i>
<i>Acknowledgements</i>	xi
<i>Foreword</i> by K. A. Browning	xiii
<i>A general introduction to the life and work of L. F. Richardson</i> by J. C. R. Hunt	1
<i>Introduction</i>	29
<i>Meteorology</i> by H. Charnock	29
<i>Numerical analysis</i> by L. Fox	36
<i>Fractals</i> by P. G. Drazin	45
<i>References</i>	47
<i>Note on the arrangement and presentation of the papers</i>	49

The papers

1907:3 Stresses in masonry dams. <i>Engineering</i> 84 , 555; 587.	51
1908:1 A freehand graphic way of determining stream lines and equipotentials. <i>Proc. Phys. Soc. Lond.</i> 21 , 88–124 (also <i>Phil. Mag.</i> (6) 15 , 237–69).	55
1908:2 The lines of flow of water in saturated soils. <i>Scient. Proc. R. Dubl. Soc.</i> 11 , 295–316.	95
1910 The approximate arithmetical solution by finite differences of physical problems involving differential equations, with an application to the stresses in a masonry dam. <i>Phil. Trans. R. Soc. A</i> 210 , 307–57.	119
1911 The approximate solution of various boundary problems by surface integration combined with freehand graphs. <i>Proc. Phys. Soc. Lond.</i> 23 , 75–85.	173
1915 Standardizing a Milne–Shaw seismograph. <i>Rep. Br. Ass. Advmt Sci.</i> , 74–9.	187
1919:2 Line squall, France, 6th September 1917. <i>Q. J. R. met. Soc.</i> 45 , 112 & facing p.	195
1919:3 Atmospheric stirring measured by precipitation. <i>Proc. R. Soc. A</i> 96 , 9–18.	199
1919:4 Measurement of water in clouds. <i>Proc. R. Soc. A</i> 96 , 19–31.	211
1919:5 A form of Knudsen's vacuum manometer. <i>Proc. Phys. Soc. Lond.</i> 31 , 270–7.	227
1919:6 The deflection of light during a solar eclipse. <i>Nature, Lond.</i> 104 , 393–4.	237

1920:1 Experiments on numerical prediction. <i>Annual Report of the Met. Committee for the Year Ending 21 March 1920</i> , 79–80.	241
1920:2 Some measurements of atmospheric turbulence. <i>Phil. Trans. R. Soc. A</i> 221 , 1–28.	245
1920:3 The supply of energy from and to atmospheric eddies. <i>Proc. R. Soc. A</i> 97 , 354–73.	277
1920:4 Sun-flash balloons for continuous signalling. <i>Q. J. R. met. Soc.</i> 46 , 293–4.	299
1920:5 Convective cooling and the theory of dimensions. <i>Proc. Phys. Soc. Lond.</i> 32 , 405–9.	303
1921:3 Note on a theorem by Mr. G. I. Taylor on curves which oscillate irregularly. <i>Proc. Lond. math. Soc.</i> (2) 20 , 211–12.	311
1921:4 Lizard balloons for signalling the ratio of pressure to temperature. <i>Prof. Notes Met. Office Lond.</i> no. 18, 2 , 75–93.	315
1921:5 Cracker balloons for signalling temperature. <i>Prof. Notes Met. Office Lond.</i> no. 19, 2 , 97–115.	337
1922:3 (with A. Wagner & R. Dietzius) An observational test of the geostrophic approximation in the stratosphere. <i>Q. J. R. met. Soc.</i> 48 , 328–41.	359
1923:1 Wind above the night-calm at Benson at 7 a.m. <i>Q. J. R. met. Soc.</i> 49 , 34.	375
1923:2 Demonstration of an electromagnetic inductor. <i>Proc. Phys. Lond.</i> 35 , 213.	379
1923:3 Theory of the measurement of wind by shooting spheres upward. <i>Phil. Trans. R. Soc. A</i> 223 , 345–82.	383
1924:1 Attempts to measure air temperature by shooting spheres upward. <i>Q. J. R. met. Soc.</i> 50 , 19–22.	423
1924:2 The aerodynamic resistance of spheres, shot upward to measure the wind. <i>Proc. Phys. Soc. Lond.</i> 36 , 67–80.	429
1924:4 How to observe the wind by shooting spheres upward. <i>Prof. Notes Met. Office Lond.</i> no. 34, 3 , 114–32.	447
1925:1 The brown corona and the diameters of particles. <i>Q. J. R. met. Soc.</i> 51 , 1–6.	471
1925:2 Photometric observations on clouds and clear skies. <i>Q. J. R. met. Soc.</i> 51 , 7–23.	479
1925:3 Turbulence and vertical temperature difference near trees. <i>Phil. Mag.</i> (6) 49 , 81–90.	499
1925:4 How to solve differential equations approximately by arithmetic. <i>Mathl Gaz.</i> 12 , 415–21.	511
1926:1 Atmospheric diffusion shown on a distance-neighbour graph. <i>Proc. R. Soc. A</i> 110 , 709–37.	521

1926: 3 (with D. Proctor) Diffusion over distances ranging from 3 km. to 86 km. <i>Mem. R. met. Soc.</i> 1 , 1–16.	553
1926: 4 (with R. E. Munday) The single-layer problem in the atmosphere and the height-integral of pressure. <i>Mem. R. met. Soc.</i> 1 , 17–34.	571
1926: 5 (with D. Proctor & R. C. Smith) The variance of upper wind and the accumulation of mass. <i>Mem. R. met. Soc.</i> 1 , 59–78.	591
1926: 6 Springs for vertical seismographs. <i>Mon. Not. R. astron. Soc. geophys. Suppl.</i> 1 , 403–11.	613
1927: 1 The deferred approach to the limit. I. <i>Phil. Trans. R. Soc. A</i> 226 , 299–349.	625
1927: 2 (as secretary to a committee) Meteorological studies in connection with the Toronto meeting of the British Association. <i>Q. J. R. met. Soc.</i> 53 , 295–300.	679
1928: 1 Report on photometers for a survey of the reflectivity of the earth's surface. <i>Int. Un. Geodesy & Geophysics met. Sect., Prague 1927</i> , 1–18.	687
1928: 2 (with students of Westminster Training College) Contact potential in the Dolezalek electrometer connected idiostatically. <i>Proc. Phys. Soc. Lond.</i> 40 , 234–9.	707
1928: 4 The amount of uniformly-diffused light that will go in series through two apertures forming opposite faces of a cube. <i>Phil. Mag. (7)</i> 6 , 1019–23.	715
1928: 5 (with V. Stanyon & other students of Westminster Training College) An absolute current-balance having a simple approximate theory. <i>Proc. Phys. Soc. Lond.</i> 41 , 36–42.	723
1929: 1 A search for the law of atmospheric diffusion. <i>Beitr. Phys. frei. Atmos.</i> 15 , 24–9.	733
1929: 2 (with R. S. Maxwell) A new type of practical examination, designed to be a fair competition. <i>Proc. Phys. Soc. Lond.</i> 42 , 108–25.	741
1930: 1 The reflectivity of woodland, fields and suburbs between London and St. Albans. <i>Q. J. R. met. Soc.</i> 56 , 31–8.	761
1930: 5 (with J. A. Gaunt) Diffusion regarded as a compensation for smoothing. <i>Mem. R. met. Soc.</i> 3 , 171–75.	771
1933: 1 Third-order aberrations of seismograph springs. <i>Mon. Not. R. astron. Soc. geophys. Suppl.</i> 3 , 125–31.	779
1933: 2 Time-marking a cathode-ray oscillogram. <i>Proc. Phys. Soc. Lond.</i> 45 , 135–41.	789
1933: 3 Photography of faint transient light-spots. <i>Nature, Lond.</i> 131 , 401–2.	799
1935: 1 Time-marking a cathode-ray oscillograph by harmonics. <i>Proc. Phys. Soc. Lond.</i> 47 , 258–62.	803
1936 Quanta and diffusion. <i>Unpublished MS.</i>	811

1937:2 The behaviour of an osglim lamp. I – Introduction, drift, equilibrium and A.C. bridge measurements. <i>Proc. R. Soc. A</i> 162 , 293–316.	
II – Oscillograph methods, steady motion and relaxational oscillations. <i>Proc. R. Soc. A</i> 162 , 316–35. III – Osglims in parallel, forming models of reciprocal inhibition. <i>Proc. R. Soc. A</i> 163 , 380–90.	815
1946:3 The probability of encounters between gas molecules. <i>Proc. R. Soc. A</i> 186 , 422–31.	875
1948:3 (with H. Stommel) Note on eddy diffusion in the sea. <i>J. Met.</i> 5 , 238–40.	887
1949:1 Meteorological publications by L. F. Richardson as they appear to him in October 1948. <i>Weather, Lond.</i> 4 , 6–9.	893
1950:1 A method for computing principal axes. <i>Br. J. Psychol. statist. Sect.</i> 3 , 16–20.	899
1950:3 A purification method for computing the latent columns of numerical matrices and some integrals of differential equations. <i>Phil. Trans. R. Soc. A</i> 242 , 439–91.	907
1951:1 Spectrum of atmospheric turbulence. <i>Nature, Lond.</i> 167 , 318.	963
1952:3 The criterion of atmospheric turbulence. <i>Q. J. R. met. Soc.</i> 78 , 422–5.	967
1952:5 Transforms for the eddy-diffusion of clusters. <i>Proc. R. Soc. A</i> 214 , 1–20.	973
Note on the patents	995
The patents	
1912:1 Apparatus for warning a ship of its approach to large objects in a fog. Patent no. 9423.	997
1912:2 Apparatus for warning a ship at sea of its nearness to large objects wholly or partly under water. Patent no. 11,125.	1005
