
Numerical Simulations in the Environmental and Earth Sciences

Proceedings of the Second
UNAM-CRAY Supercomputing Conference

Edited by FERNANDO GARCÍA GARCÍA,
GERARDO CISNEROS,
AGUSTÍN FERNÁNDEZ-EGUIARTE,
and ROMÁN ÁLVAREZ

Contents

<i>Participants</i>	viii
<i>Scientific Committee</i>	xi
<i>Organizing Committee</i>	xi
<i>Preface</i>	xiii

I. General Circulation Models and Global Change

A General Circulation Model of the Atmosphere–Ocean System <i>Carlos R. Mechoso</i>	3
Coupled Ocean–Atmosphere Modeling: Computing and Scientific Aspects <i>M. Pontaud, L. Terray, E. Guilyardi, E. Sevault, D. B. Stephenson and O. Thual</i>	16
The OCCAM Global Ocean Model <i>C. S. Gwilliam, A. C. Coward, B. A. de Cuevas, D. J. Webb, E. Rourke, S. R. Thompson and K. Döös</i>	24
Climatic Asymmetries Relative to the Equator <i>S. G. H. Philander, T. Li and G. Lambert</i>	31
On the Use of a General Circulation Model to Study Regional Climate <i>Víctor O. Magaña-Rueda and Arturo I. Quintanar</i>	39
A Numerical Study of the Circulation and Sea Surface Temperature of the Gulf of Mexico <i>Jorge Zavala, A. Parés-Sierra, J. Ochoa and J. Sheinbaum</i>	49
Pacific Region CO ₂ Climate Change in a Global Coupled Climate Model <i>Gerald A. Meehl and Warren M. Washington</i>	58
Prospects and Problems in Modeling the Impacts of Climate Change in Latin America <i>Diana M. Liverman</i>	64
PIXSAT, a Digital Image Processing System in a CRAY–UNIX Environment <i>Alfredo Cortés, Román Álvarez and Miguel A. Castillo</i>	75
Marine Productivity Seasonal Forecast along the Ecuadorian Coastal Zone Based on Physical Models of ENSO <i>Gustavo Silva-Guerrero</i>	84
Land Cover Classification by Means of Satellite Imagery and Supercomputer Resources <i>Roberto Bonifaz, Román Álvarez and Brian Davis</i>	92

II. Dispersion and Mesoscale Modeling

Environmental Applications of Mesoscale Atmospheric Models <i>Thomas T. Warner</i>	105
An Integrated Air Pollution Modeling System: Application to the Los Angeles Basin <i>Rong Lu and Richard P. Turco</i>	116

An h -Adapting Finite Element Model for Atmospheric Transport of Pollutants <i>Darrell W. Pepper and David B. Carrington</i>	126
The Applicability of a Mesoscale Model in the Valley of Mexico during Extreme Air Pollution Episodes <i>Ismael Pérez-García and Everett C. Nickerson</i>	134
Mexico City Air Quality Simulations under Different Fuel Consumption Scenarios <i>Elba Ortiz, Jorge Gasca, Gustavo Sosa, Ma. Esther Ruiz and Luis Díaz</i> . . .	143
Numerical Modeling of Pollutant Particle Diffusion in the Atmospheric Boundary Layer <i>Gueorgui V. Mostovoi</i>	149
Investigating the Dispersion Inside Idealized Urban Street Canyons Using a k -epsilon Turbulence Model <i>YanChing Q. Zhang</i>	154
Coupling of an Urban Dispersion Model and an Energy-Budget Model <i>Glenn T. Johnson, A. John Arnfield and Jan M. Herbert</i>	161
A Mesoscale Meteorological Model to Predict Windflow in the Valley of Mexico <i>M. D. Williams, G. Sosa and V. Mora</i>	166
Some Experiments with a Three-Dimensional Semi-Lagrangian and Semiimplicit Cloud Model <i>José A. Vergara</i>	174
Large Eddy Modeling of Stratocumulus Clouds <i>G. B. Raga</i>	181
III. Geophysical Data Assimilation	
Computational Aspects of Kalman Filtering and Smoothing for Atmospheric Data Assimilation <i>Ricardo Todling</i>	191
Computational Aspects of Goddard's Physical-Space Statistical Analysis System (PSAS) <i>Jing Guo and Arlindo da Silva</i>	203
A Study on the Influence of the Pacific and Atlantic SST on the Northeast Brazil Monthly Precipitation Using Singular Value Decomposition <i>Cíntia Bertacchi Uvo, Carlos Alberto Repelli, Stephen Zebiak and Yohanan Kushnir</i>	210
Numerically Efficient Methods Applicable to the Eigenvalue Problems Arising in Linear Stability Analysis <i>Marco De la Cruz-Heredia and G. W. Kent Moore</i>	217
Use of Canonical Correlation Analysis to Predict the Spatial Rainfall Variability over Northeast Brazil <i>Carlos Alberto Repelli and José Maria Brabo Alves</i>	225
Identification of the ITCZ Axis by Computational Techniques <i>Celeste C. Ferreira and Fernando A. A. Pimentel</i>	231

Variational Assimilation of Acoustic Tomography Data and Point Observations: Some Comparisons and Suggestions to Perform Error Analysis <i>Julio Sheinbaum</i>	235
--	-----

IV. Methods and Applications in Geophysics

Do Man-Made Obstacles Produce Dynamical P-Wave Localization in Mexico City Earthquakes? <i>G. Báez, J. Flores and T. H. Seligman</i>	249
Domain Decomposition Methods for Model Parallelization <i>Ismael Herrera, Abel Camacho and Joaquín Hernández</i>	258
Parallelization Using TH-Collocation <i>Ismael Herrera, Joaquín Hernández, Abel Camacho and Jaime Garfias</i>	266
A Method for Simultaneous Estimation of Multiphase Relative Permeability and Capillary Pressure Functions <i>G. Mejía, A. Watson, K. Mohanty and J. Nordtvedt</i>	276
