ATMOSPHERIC TIDES

Thermal and Gravitational

D. REIDEL PUBLISHING COMPANY

DORDRECHT-HOLLAND

TABLE OF CONTENTS

PREFACE v

CHAPTER 1. INTRODUCTORY AND HISTORICAL 1

1.1. Introduction: Pytheas, Bacon, Newton and Laplace 1
1.2. The Barometric and Other Daily Variations 4
1.2A. True or Apparent Time, and Mean Time 6
1.2B. The Harmonic Dial 7
1.3. Thermal Tides and Kelvin's Resonance Theory 10
1.4. More Realistic Atmospheric Models 11
1.5. The Phase of $S_2(p)$ 12
1.6. Doubts as to the Resonance Theory 13
1.7. Renewed Hope in the Resonance Theory 14
1.8. Atmospheric Oscillations as Studied by Weekes and Wilkes 15
1.9. Rockets Exclude Resonance 18
1.10. Ozone Absorption of Radiation the Main Cause of $S_2(p)$ 19
1.11. Upper Air Data 21
1.12. Theoretical Calculations of the Diurnal Thermal Tide 22
1.13. Other Features of Atmospheric Oscillations 23

CHAPTER 2S. THE SOLAR DAILY ATMOSPHERIC OSCILLATIONS AS REVEALED BY METEOROLOGICAL DATA 24

2S.1. The Material Studied; Ground Level Data 24
2S.2. Harmonic Analysis of S; The Non-Cyclic Variation 25
2S.3. The Seasonal Variation of S 26
2S.3A. Daily Seasonal Integers σ (Sigma) or SN (Bartels, 1954) 28
2S.4. The World-Wide Distribution of S, Particularly of $S(p)$ 31
2S.4A. $S_2(p)$ 31
2S.4A.1. Types of Associated Legendre Functions 35
2S.4A.2. The Spherical Harmonic Expression of $S_2(p)$ 37
2S.4B. $S_1(p)$ 38
2S.4C. $S_3(p)$ 43
2S.4D. $S_4(p)$ 43
2S.5. The Daily Variation of Air Temperature T 44

2S.6. The Daily Wind Variation $S(\mathbf{V})$ 46
2S.7. Atmospheric Daily Changes above Ground Level 48
2S.7A. Daily Variations between the Ground and 30 km 48
2S.7B. Daily Variations from 30 km–60 km 50
2S.7C. Daily Variations from 80–120 km 56
2S.7D. Daily Variations in the Thermosphere 62
2S.7E. Analysis of Data Covering Only a Fraction of a Day 63

CHAPTER 2L. THE LUNAR ATMOSPHERIC TIDE AS REVEALED BY METEOROLOGICAL DATA 66

2L.1. Introduction 66
2L.2. The Tropical Lunar Air Tide 67
2L.3. The Lunar Air Tide Outside the Tropics 67
2L.4. The Month and the Lunar Day 69
2L.4A. The Main Harmonic Components of the Lunar Tidal Potential 72
2L.5. Methods of Computation of L from Observed Data; Early Methods Based on Apparent Lunar Time 74
2L.6. The Chapman-Miller (or C-M) Method for Meteorological Variables 78
2L.6A. Use of the Integers Mu (or μ) instead of the Integers Nu or Nu′ (or ν') 80
2L.6B. The Components S_p 81
2L.7. Vector Probable Errors 81
2L.8. The Determination of L_2 from Only a Few Meteorological Readings per Day 82
2L.9. The Lunar Semidiurnal Barometric Tide $L_2(p)$ 84
2L.10. The Expression of $L_2(p)$ in Spherical Harmonic Functions 86
2L.11. The Asymmetry of $L_2(p)$ Relative to the Equator, and its Seasonal Variation 91
2L.12. Comparison of $L_2(p)$ and $S_2(p)$ 93
2L.13. The Lunar Tidal Wind Variation 95
2L.14. The Lunar Tidal Variation of Air Temperature 100
2L.15. The Lunar Tidal Changes of Height of Various Pressure Levels 103
2L.16. Brief Mention of the Lunar Geomagnetic Tide 104

CHAPTER 3. QUANTITATIVE THEORY OF ATMOSPHERIC TIDES AND THERMAL TIDES 106

3.1. Introduction 106
3.2. Equations 106
3.3. Methods of Solution 113
3.3A. Laplace's Tidal Equation 113
3.3B. Vertical Structure Equation 116

3.3C. Outline of Overall Procedure 119
3.4. Sources of Excitation 121
3.4A. Gravitational Excitation 121
3.4B. Thermal Excitation Due to Exchange of Heat with the Ground 124
3.4C. Thermal Excitation Due to Direct Atmospheric Absorption of Insolation 125
3.4D. Summary 127
3.5. Explicit Solutions 130
3.5A. The Migrating Solar Semidiurnal Thermal Tide 130
3.5B. The Solar Diurnal Thermal Tide 138
3.5C. The Lunar Semidiurnal Tide 151
3.5D. Other Components 157
3.6. Shortcomings of Present Calculations 157
3.6A. Surface Topography 157
3.6B. Dissipation 159
3.6B.1. Infrared Cooling 160
3.6B.2. Molecular Viscosity and Conductivity 164
3.6B.3. Ion Drag and Thermal Tides in the Ionosphere 166
3.6C. Non-Linear Effects 167
3.6D. Neglect of Mean Winds and Horizontal Temperature Gradients 168
3.6E. Additional Remarks 169
3.7. Comparison of Theory with Data 169
List of Symbols for Chapter 3 171
