Table of Contents

SESSION 2

PLANETARY-SCALE/SYNOPTIC-SCALE INTERACTIONS

Branstator, Grant		
Control of Stormtrack Position by the Time-Averaged Flow		3
Chen, Wilbur Y.		
Natural Variabilities for Widely Different Basic Flows		8
Dole, Randall M., Jeffrey S. Whitaker, and Kriste L. Paine		
Mechanisms for Storm Track Variability. Part I: Diagnostic Studies		12
Grotjahn, Richard		
A Simple Model of Frontal Cyclone Growth Having Interaction Between Eddy and Time Mean Flow		18
Higgins, R. W.		
Role of Synoptic-Scale Eddies in the Life-Cycles of Persistent Midlatitude Anomalies		19
Jansà, A., A. Genovés, M. A. Picornell, J. Campins, D. Radinovic, and P. Alpert		
Mediterranean Cyclones: Subject of a WMO Project		26
Kushner, Paul J., and Theodore G. Shepherd		
Wave-Activity Conservation Laws and Stability Theorems for Semi-Geostrophic Dynamics		32
Lee, Woo-Jin, and Mankin Mak*		
The Nature of Instability of an Observed Winter Mean State		38
Li, Tian-Shi, Stephen J. Colucci, John R. Gyakum, and David P. Baumhefner		
North Pacific Surface Cyclone Tracks: Interannual and Seasonal Variability and Relationship to Numerical 30-Day Mean Forecast Accuracy		44
Lupo, Anthony R., and Phillip J. Smith		
The Interaction Between a Mid-Latitude Blocking Anticyclone and the Precursor Cyclone Over the North Atlantic		50
Mokhov, Igor I., T. N. Doronina, V. M. Gryanik, V. K. Petukhov, A. O. Senatorsky, M. V. Tevs, R. R. Khairullin, E. P. Naumov, L. V. Korovkina, V. E. Lagun, and O. I. Mokhov		
Extratropical Cyclones and Anticyclones: Tendencies of Change		56

Randel, William J., and David J. Erickson Carbon Dioxide Variability in a GCM Associated with Baroclinic Waves	61
Rinne, Juhani, Simo Järvenoja, and Heikki Järvinen Scandinavian Retrograde Blocking as a 30-day Oscillation in a Barotropic Flow	65
Satoh, Masaki, Masayuki Shiobara and Masaaki Takahashi A Role of Hadley Circulations and Baroclinic Waves on the Global Angular Momentum Budget: A Comparison Between Symmetric and Asymmetric Calculations	70
Schär, Christoph, and Heini Wernli The Potential Vorticity Budget of the General Circulation as Viewed with the Generalized Bernoulli Theorem	75
Tracton, M. Steven Extended Range Predictability of Extratropical Cyclones	81
Tsou, Chih-Hua, and Mien Tze Kueh The Impact of Synoptic-Scale Cyclones on the Development of Blocking Anticyclones	87
Ueno, Ken'ichi, and Yetsuzo Yasunari Interannual Variability of Low-Frequency Atmospheric Circulation Patterns, Surface Cyclone Tracks, and Precipitation Patterns	91
van den Dool, H. M., and M. Cai An Empirical Rossby Wave Propagation Formula	96
Whitaker, Jeffrey S., Randall M. Dole, and Kriste L. Paine Mechanisms for Storm Track Variability. Part II: Model Studies	97
Zolotokrylin, Alexander N., L. V. Khmelevskaja, and T. N. Vegener Relationship Between Northern Hemisphere Atmospheric Circulation and Life Cycles of Extratropical Cyclones	102

SESSION 3 CYCLONE LIFE CYCLES

Achatz, Ulrich, G. Schmitz, and K.-M. Greisiger Principal Interaction Patterns in Baroclinic Wave Life Cycles	109
Ayrault, Franck, François Lalaurette*, Alain Joly, and Cécile Jousset On the Track of European Secondary Cyclones	115
Balasubramanian, G., and M. K. Yau An Evaluation of the Interaction Between Slantwise Convection and Marine Cyclogenesis	121
Bishop, Craig, Daniel Keyser, and Greg Hakim Vorticity Constraints at Horizontal Boundaries and Their Implications for PV Thinking	127

Black, Robert X. Large-Scale Cyclogenesis in a General Circulation Model	128
Byrne, John P. The Post-Occlusion Phase of Low Return Frequency Major North Atlantic Extratropical Cyclones	134
Ciappesoni, Héctor H., José M. Núñez, Mirta A. Giachino, Manoel A. Gan, and Nelson Arai Some Characteristics of the Life Cycles of Extratropical Cyclones in Southern South America	139
Claud, Chantal, Kristin B. Katsaros, Nelly M. Mognard, and Noëlle A. Scott Satellite Investigation of a Rapidly-Deepening Cyclone in Northeastern Atlantic	145
Clough, Sid A., and Clare S.A. Davitt Development of an Atlantic Frontal Wave During IOP3 of Fronts 92	151
Cohen, Judah The Effect of Climate Perturbations on East Coast Cyclogenesis	157
Davis, Christopher A., Evelyn Donall Grell, and Melvyn A. Shapiro A Potential Vorticity-based Interpretation of the Life-Cycle of the ERICA IOP-4 Oceanic Cyclone	163
Dell'Osso, Lorenzo, and Ernst Klinker Numerical Experiments on the ERICA IOP4 Case and Diagnosis of Physical Processes	169
Egger, Joseph, Pinhas Alpert, Arnold Taffermer, and Baruch Ziv Genesis of Sharav Cyclones: Numerical Experiments	175
Ehrendorfer, Martin, Ronald M. Errico, and Tomislava Vukicevic Optimal Perturbations for a Primitive-Equation Regional Model	180
Flocas, Helena A., and Theodore S. Karacostas Synoptic and Dynamic Characteristics of Cyclogenesis Over the Aegean Sea	186
Gan, Manoel Alonso, and Vadlamudi Brahmananda Rao Energetics of the High Frequency Disturbances Over South America	192
Ghelli, Anna, Paul Berrisford, and Brian J. Hoskins Evidence of Characteristic Baroclinic Life-Cycle Events During Winter 1992-1993	198
Grell, Evelyn Donall, and Melvyn A. Shapiro Visualization of the Life Cycle of a Rapidly Intensifying Oceanic Cyclone	202
Grotjahn, Richard, and Joseph Tribbia On Cyclone Structure During Early Stages of Development	208
Gyakum, John R., and Lance F. Bosart Analysis of a Long-Lived and Rapidly-Growing North Atlantic Cyclone: Its Planetary-Scale and Mesoscale Components	211
Gyakum, John R., Ronald E. Stewart, G. W. K. Moore, and Cathy Reader A Multiscale Analysis of a Case of Rapid Cyclogenesis During CASP II	216

Hakim, Gregory J., Daniel Keyser, and Lance F. Bosart Diagnosis of Wave-Merger Cyclogenesis Through Quasi-Geostrophic Potential Vorticity Inversion	221
Ioannou, Petros J., and Brian F. Farrell Towards a Statistical Theory of Midlatitude Cyclones	227
Johnson, Donald R., Tom Zapotocny, Fred Reames, Allen Lenzen, and Todd Schaack The Dynamical Structure of Atmospheric Transport Processes Within Extratropical Cyclones Viewed Through Isentropic Analysis	233
Joly, Alain Linear and Non-Linear Properties of Non-Modal Periodic Frontal Waves	239
Kristjánsson, Jón Egill, and Sigurdur Thorsteinsson Simulations of Intense Cyclones Near Iceland	245
Lackmann, Gary, Daniel Keyser, and Lance Bosart On the Evolution of Mobile Upper-Tropospheric Troughs Preceding Western North Atlantic Cyclogenesis During ERICA	251
Langland, Rolf H., Russell L. Elsberry, and Ronald M. Errico Evaluation of Physical Processes in an Idealized Type-B Cyclone, Using Adjoint Techniques	257
Lefevre, Randy J., and John W. Nielsen-Gammon An Observational Study of Midtropospheric Mobile Troughs over the Northern Hemisphere	263
Lindstrom, Scott S. Observed Cyclogenesis in the Ocean	269
Locatelli, John D., Peng-Yun Wang, Jonathan E. Martin, and Peter V. Hobbs Three-Dimensional Depictions of the Structure and Evolution of a Major Winter Cyclone in the Central United States	273
Lu, Huei-Iin, and Timothy L. Miller Characteristics of Annulus Baroclinic Wave Structure During Amplitude Vacillation	277
Magnusdottir, Gudrun Cyclone Life-Cycles Examined by Wave-Activity Diagnostics	282
Malardel, S., and A. Joly Validity of the Geostrophic Momentum Approximation for Linear Stability Analysis on the Mesoscale	287
Miletta, Jennifer, and Kristina B. Katsaros Evolution of Satellite-Derived Integrated Water Vapor and Precipitation Patterns Throughout the Life Cycle of a Pacific Cyclone	293
Montgomery, Michael T. Cyclone Theories from a Swirling Flow Perspective	299

Nielsen, Niels Woetmann The 915-HPA Cyclone of 10 January 1993	301
Nielsen-Gammon, John W. Potential Vorticity Diagnosis of the Genesis of an Upper-Level Mobile Trough	307
Orlanski, Isidoro Energy Dispersion vs. Baroclinic Conversion in the Life Cycle of Atmospheric Eddies	313
Peters, Dieter, and Gerhard Schmitz Multiple Life Cycles: Experiments with a Simplified GCM Under Different Boundary Conditions	318
Räisänen, Jouni Non-Quasigeostrophic Vertical Motions in a Strong Extratropical Cyclone	322
Silberberg, Steven A Potential Vorticity Perspective of Polar Vortex Extrusion and Trough Merger in Cyclone Development	328
Smith, Phillip J., and Anthony R. Lupo A Diagnosis of the Life Cycle of a Marine Cyclone System	329
Tafferner, Arnold Life Cycle of a Mountain Generated Adriatic Cyclone	335
Tanaka, H. L. A Life-Cycle of Nonlinear Baroclinic Waves Represented by a 3-D Spectral Model	341
Tyle, Kevin R., Lance F. Bosart, and Daniel Keyser Intense Surface Anticyclogenesis: Composite and Individual Case Studies	345
van Delden, A. J. Jetstreak- and Trough-Dynamics and Mesoscale Flow Features During the Development of "Thundery Lows" in Western Europe	346
Vukicevic, Tomislava, and Kevin Raeder Use of an Adjoint Model for Diagnosing the Evolution of Alpine Lee Cyclogenesis	353
Yang, Yajiang, and Stephen Colucci Surface Cyclone Mergers and Numerical Forecast Accuracy	358
Ziv, B., and P. Alpert Rotation of Binary Cyclones—A Data Analysis Study	364
Ziv, B., and P. Alpert A Potential Vorticity Conceptual Model to the Binary Cyclone	370

SESSION 4
FRONTS, JET STREAMS AND THE TROPOPAUSE

Atlas, Robert, Juan Carlos Jusem, and Daniel Keyser Evolution of a Low-Level Jet in Relation to an Upper-Level Baroclinic Disturbance East of the Rocky Mountains	379
Bertin, F., P. Van Velthoven, A. Crémieu, R. Ney, and R. Beugin Observation of a Tropopause Fold in the Exit Region of a Jet Streak	385
Bishop, Craig H. How Do Along Front Temperature Gradients Affect Deformation Frontogenesis?	390
Bluestein, Howard B., and Douglas A. Speheger Analysis of the Dynamics of an Upper-Level System Using Profiler Data	391
Bush, Andrew B.G., W. Richard Peltier, and James C. McWilliams Tropopause Folds and Frontal Balance in Three-Dimensional Primitive Equation Simulations of Synoptic-Scale Baroclinic Waves	397
Cammas, J.-P., D. Keyser, G. M. Lackmann, and J. Molinari Diabatic Redistribution of Potential Vorticity Accompanying the Development of an Outflow Jet Within a Strong Extratropical Cyclone	403
Cho, Han-Ru, and George T. J. Chen Mei-Yu Frontogenesis	410
Cohen, Robert A., and Carl W. Kreitzberg Air Stream Boundaries and Frontal Evolution in Occluding Cyclones	415
Cox, B. D., M. Bithell, and L. J. Gray A General Circulation Model Study of the Transfer of Air Between the Stratosphere and the Troposphere at Mid-Latitudes	420
Freeman, John C. Review of and Contribution to Non-Linear Wave Cyclone Theory	426
Grønås, Sigbjørn The Seclusion Intensification of the New Year Day Storm 1992	432
Hirschberg, Paul A., James D. Doyle, Rolf H. Langland, and J. Michael Fritsch Tropopause Undulations and Extratropical Cyclones	438
Jones, S. B., G. Vaughan, S. J. Reid, and H.G.J. Smit The Nature of the Tropopause as Revealed by Ozonesondes	444
Juckes, Martin N. Balanced Turbulence of the Tropopause	449
Karyampudi, V. Mohan, Michael L. Kaplan, Steven E. Koch, and Robert J. Zamora The Influence of an Upper-Level Front on Severe Weather and Dust Storms	453

Katzfey, Jack J. The Importance of Trough-Ridge and Jet-Streak Motions on the Development of the August 1986 Australian East Coast Low	459
Konor, Celal S., Carlos R. Mechoso, and Akio Arakawa Comparison of Frontogenesis Simulations with Isentropic and Normalized Pressure Vertical Coordinates	464
Kreitzberg, Carl W., and Robert A. Cohen Air Stream Analysis: An Objective Way to Diagnose the Evolution of Important Structures in Occluded Cyclones	469
Mills, Graham A. The Cudlee Creek Flash Flood—The Interaction of a Deep Tropopause Undulation and a Warm Seclusion	475
Morgan, Michael C., and Kerry A. Emanuel On the Motivation for Tropopause Potential Temperature Analyses and a Dynamically Derived Climatological Basic State	479
Neiman, Paul J., Melvyn A. Shapiro, F. Martin Ralph, B. F. Smull, and D. Johnson A Multiscale Observational Study of Multiple Frontal Zones Within an Extratropical Continental Cyclone	485
Price, J. D., G. Vaughan, and A. Howells Transport into the Troposphere in a Tropopause Fold/Cut-off Low System	492
Reader, M. Catherine, and G. W. Kent Moore Stratosphere-Troposphere Interactions Associated with Extra-Tropical Cyclogenesis	493
Reed, Richard J., Ying-Hwa Kuo, and Simon Low-Nam Frontal Development and Airflow in an Adiabatic Simulation of the ERICA IOP 4 Storm	499
Rotunno, R., W. C. Skamarock and C. Snyder Upper-level Frontogenesis and Cut-Off Cyclone Formation in a Simulated Baroclinic Wave	505
Saravanan, R. Modelling the Tropopause-Surface Interaction: A Contour Dynamical Approach	511
Saute, Marcel The Interaction Between Upper and Lower-level Potential Vorticity Anomalies in Two-Dimensional Models	517
Snyder, Chris Instability of Steady Fronts with Uniform Potential Vorticity	518
Thompson, William T. Numerical Simulations of the Life Cycle of a Baroclinic Wave	524
Thorpe, Alan J., and Craig H. Bishop Potential Vorticity and the Electrostatics Analogy	530

Thorstensen, Ina, and Elmer Raushein Frontal Structures in Simulations of Marine Extratropical Cyclones	536
Vaughan, G., A. Howells, and J. D. Price Use of MST Radars to Probe the Mesoscale Structure of the Tropopause	541
Verkley, W. T. M. Planetary Waves from a Contour Dynamics Perspective	542
Wernli, Heini, and Andrea M. Rossa Identification of Structures Within Extratropical Cyclones Based Upon Objective Criteria	548
Wirth, Volkmar Diabatic Decay of Upper Level Cut-Off Cyclones and Anticyclones and Resulting Stratosphere-Troposphere Exchange	554
Xu, Liang, Rao V. Madala*, and Sethu Raman A Numerical Study of Carolina Coastal Frontogenesis During GALE IOP-2 Using a Triple Nested Model	560
Xu, Qin, Jin-Xing Zong, and Chao-Yang Lo C-Vector Diagnosis of Ageostrophic Circulation	564
Zwack, Peter, Serge Desjardin, Pierre Bourgouin, and Christian Pagé Diagnosing Vertical Motions, Pressure Tendencies, and Ageostrophic Circulations and Their Relationships to Potential Vorticity and Cyclone Structure and Development	568

*Presenter, if not first author.
