Proceedings of an International Symposium
Geophysical Institute, University of Bergen
27. June – 1. July 1994
Bergen – Norway

**INTERNATIONAL SYMPOSIUM ON
THE LIFE CYCLES OF EXTRATROPICAL CYCLONES
27 June – 1 July 1994
Bergen, Norway**

**Volume III
Table of Contents**

**SESSION 5
MESOSCALE SUBSTRUCTURES AND PHYSICAL PROCESSES**

Albright, Mark D., Richard J. Reed, and David W. Ovens Numerical Simulations of a Polar Low over Hudson Bay	3
Alpert, Pinhas, M. Tsidulko, S. Krichak, and U. Stein A Multi-Stage Evolution of an ALPEX Cyclone	9
Becker, Andreas The Influence of Turbulence and Soil Properties on the Shape and Development of a Cold Front	14
Berger, Bradford W., and C. A. Friehe Boundary-Layer Structure Near the Cold Front of a Marine Cyclone During ERICA	19
Blier, Warren, and Roger M. Wakimoto Synoptic and Mesoscale Analysis of the Early Evolution of the ERICA IOP 5 Explosive Oceanic Cyclone	25
Bond, Nicholas A., and James E. Overland Research Aircraft Observations of Orographic Effects on Landfalling Storms	31
Browning, G. L., and H.-O. Kreiss The Impact of Rough Forcing on Systems with Multiple Time Scales	37
Buzzi, Andrea, and Maurizio Fantini Short Baroclinic Waves of Finite Amplitude in a Moist Environment	43
Cardone, Vincent J., and Val R. Swail On Surface Wind and Ocean Wave Coupling in Severe Marine Extratropical Cyclones	46
Cione, Joseph J., and Sethu Raman A Three Dimensional Numerical Investigation of Surface-Induced Coastal Cyclogenesis Near the Gulf Stream	52
Craig, George C., T. D. Hewson, and C. Claud Mesoscale Structure and Life Cycle of a Polar Low	57

Doyle, James D. Air-Sea Interaction During Marine Cyclogenesis	61
Emanuel, Kerry A. Sea-Air Heat Transfer Effects on Extratropical Cyclones	67
Ewenz, Cécilia M. Moisture Effects in Frontogenetical Processes	73
Fantini, Maurizio Moist Baroclinic Instability in Three Dimensions	78
Grell, Georg A., and Evelyn Donall Grell A Multiscale Simulation of an Oceanic Cyclone	83
Grønås, Sigbjørn and Nils Gunnar Kvamstø* Synoptic Conditions for Arctic Front Polar Lows	89
Gulev, Sergey, and Jack Tonkacheev* On the Interaction of Rapidly Intensifying Cyclones with SST Front in the North-West Atlantic	96
Huntrieser, Heidi, H. H. Schiesser, and A. Waldvogel The Synoptic and Mesoscale Environment of Severe Convective Activity in Switzerland	101
Ioannidou, L., and M. A. Pedder On the Spectrum of Frontal Instabilities	107
Iskenderian, Haig Scale Interactions During a Sub-synoptic Scale Cyclogenesis Event: A Case Study	113
Ivancan-Picek, Branka, and Vlasta Tutis Diagnostic Study of Jet-Stream Influence on the Severe Surface Bora Winds	118
Kaplan, Michael L., and Steven Businger A Paradigm Linking Unbalanced Ageostrophic Adjustments to the Explosive Development in Extratropical Cyclones	123
Kuo, Ying-Hwa, and Simon Low-Nam Effects of Surface Friction on the Thermal Structure of an Extratropical Cyclone	129
Lemaître, Yvon, Georges Scialom, Konstantinos Lagouvardos, and Virginie Marécal Main Results on the Dynamical and Microphysical Mechanisms Involved in the Mesoscale Frontal Circulations Observed During the FRONTS 87 Experiment	135
Mailhot, Jocelyn, C. Chouinard, Andrew Staniforth, and B. Bilodeau Mesoscale Simulations of the Structure and Evolution of an Explosive Winter Storm Using the COMPARE Analyses	140
Mak, Mankin, and Mark Althouse* A Study of Extratropical Moist Cyclogenesis	144

Marécal, Virginie, Anthony J. Illingworth, and Susan P. Ballard (presented by Keith Browning)	Observation and Modelling of the Aggregation Process in a Frontal Rainband: The 21st of June Case Study	150
Martin, Jonathan E., John D. Locatelli, and Peter V. Hobbs	A Non-Classical, Synoptic-Scale Rainband in a Winter Cyclone in the Central United States and Its Effect on the Distribution of Precipitation	156
McMurdie, Lynn A., Andrew M. Carleton, Nelly M. Mognard, Chantal Claud, and Kristina B. Katsaros	Satellite-Derived Characteristics of Mesoscale Vortices Over the Southern Ocean	162
Moore, G.W.K., M. C. Reader, J. York, S. Sathiyamoorthy, and K. Tsuboki	Polar Lows in the Labrador Sea: A Case Study	168
Parsons, David B.	Non-Hydrostatic Simulations of Mesoscale Frontal Waves	170
Persson, P. Ola G.	Simulations of the Potential Vorticity Evolution and Budget in IOP8 of FRONTS '87	176
Pokrandt, Peter J., Gregory J. Tripoli, and David D. Houghton	A Numerical Investigation of the Development Mechanisms of the Mesoscale Waves of 15 December 1987	182
Powers, Jordan G.	Forcing of Mesoscale Gravity Waves in a Mesoscale Forecast Model	186
Ralph, F. Martin, Melvyn A. Shapiro, Paul J. Neiman, and Jennifer Mileta	Observations of Multiple Mesoscale Cyclones (50-700 km) Within Synoptic-Scale Cyclones	192
Rasmussen, Erik A., and Anette Cederskov	Polar Lows: A Critical Appraisal	199
Rasmussen, Roy M., Jon Reisner, and Greg Stossmeister	The Colorado Front Range Blizzard of 1990: The Structure and Evolution of a Small-Scale Occluded Front	204
Revell, Michael J., and Roger N. Ridley	The Origin and Evolution of Low Level Potential Vorticity Anomalies During a Case of Tasman Sea Cyclogenesis	210
Roebber, Paul J., and Lance F. Bosart	How Sensitive is the Precipitation Associated with Baroclinic Winter Storms to Small Variations in the Synoptic-scale Circulation? An Analysis of Observed Data Using Regional Analogues	215
Steenburgh, W. James, and Clifford F. Mass	An Investigation of the Influence of the Rocky Mountains on the Structural Evolution of an Extratropical Cyclone	221

Stewart, R. E., K. K. Szeto, D. R. Hudak, and R. W. Crawford Warm Fronts Within Canadian Winter Storms: Weather Conditions, Precipitation, and Mesoscale Structure	227
Tutis, Vlasta, and Branka Ivancan-Picek Diagnosis of Mesoscale Structures During the Adriatic Cyclogenesis	231
Wakimoto, Roger M., Nolan T. Atkins, and Chinghwang Liu Airborne Doppler Analysis of the Mesoscale Circulation and Frontal Structure of an Explosive Oceanic Cyclone During ERICA IOP 5	236
Zhang, Da-Lin, and Richard Harvey Convective Conditioning of a Baroclinic Environment for Surface Cyclogenesis	242
Zick, Christian Polar Lows in the SW Pacific Region and Their Transition from or into Synoptic-Scale Cyclones	248

SESSION 6 OPERATIONAL FORECASTING

Arakawa, Akio, and Celal S. Konor* A Generalized Vertical Coordinate and the Choice of Vertical Grid for Atmospheric Models	259
Bates, J. R., Y. Li, A. Brandt, S. McCormick, and J. Ruge Numerical Integration of the Primitive Equations Based on the Semi-Lagrangian Advection of Potential Vorticity	265
Benjamin, Stanley G., Georg A. Grell, John M. Brown, Rainer Bleck, Kevin J. Brundage, Tracy Lorraine Smith, and Patricia A. Miller An Operational Isentropic/Sigma Hybrid Forecast Model and Data Assimilation System	268
Colman, Bradley R., Edward I. Tollerud, and Randall S. Collander Assessing the Use of Upper-Level Jet Streaks for Operational Prediction of Winter Precipitation	274
Cotton, William R., Brian A. Beitler, and J. Christopher Clarke Mesoscale Forecasting on Workstations	280
Geerts, Bart, and Milton Speer An Investigation of the Use of a Mesoscale Version of an Operational NWP Model for the Prediction of Australian East Coast Lows	286
Grant, J. Roger, and Michael J. Bader Improving Forecasts of Weather Associated with Small Depressions	292
Houtekamer, Peter L., and Jacques Derome Strategies for Ensemble Prediction	297

Kocin, Paul J., Louis W. Uccellini, Philip N. Schumacher, Ronald F. Morales, Jr., and Russell S. Schneider	The 12-14 March 1993 Superstorm: Synoptic and Mesoscale Overview and Operational Forecast Performance	302
Kurz, Manfred	Methods of Synoptic Diagnosis Used in the Deutscher Wetterdienst	310
Lee, J. L., G. L. Browning, and Y. F. Xie	Four-Dimensional Least Squares Objective Analysis and Vorticity Method Applied to the Wind Profiler Network	314
Mahoney, Jennifer Luppens, John M. Brown, and Edward I. Tollerud	Using Potential Vorticity to Forecast Heavy Snowfall	320
Mansfield, Doug	The Use of Potential Vorticity in Forecasting Cyclones: Operational Aspects	326
McCallum, Ewen	The Role of the Forecaster in the Prediction of Cyclogenesis Events	332
Mesinger, Fedor, and Michael E. Baldwin	Skill of the ETA Model Precipitation Forecasts and its Dependence on a Number of Model Design Features	338
Mogil, H. Michael, and Frank J. Smigielski	A Systematic Satellite Approach for Estimating Central Pressures of Mid-Latitude Oceanic Cyclones	344
Murphy, Allan, Klaus Fraedrich, and Edilbert Kirk	Short-Range Weather Forecasts for Bergen: Statistical Models and Diagnostic Verification	350
Santurette, Patrick	Forecasting Cyclogenesis, The Forecaster's Point of Vue	358
Snook, John S.	A Nonhydrostatic Mesoscale Numerical Modeling System Structured for Operational Use	364
Thaler, Eric R.	Operational Forecasting of Extratropical Cyclones and Their Attendant Weather in the Modernized National Weather Service	370
Tripoli, Gregory J., and Peter J. Pokrandt	Visualization of the Internal Structure of Extratropical Cyclones Simulated by an Operational Nonhydrostatic Model	376
Young, Martin V.	A Classification Scheme for Cyclone Life-Cycles: Applications in Analysis and Short Period Forecasting	380
