CONTENTS

Participants ix
Preface xiii
Frontispiece xv

RADIATIVE TRANSFER
Session I—W. Irvine, Chairman

Hybrid Methods Are Helpful 1
H. C. van de Hulst

Review of Radiative Transfer Methods in Scattering Atmospheres 21
Jacqueline Lenoble

MATHEMATICAL THEORY OF INVERSION METHODS
Session 2—L. Kaplan, Chairman

Some Aspects of the Inversion Problem in Remote Sensing 41
Sean S. Twomey

Generalization of the Relaxation Method for the Inverse Solution of Nonlinear and Linear Transfer Equations 67
Moustafa T. Chahine

Session 3—M. Chahine, Chairman

Statistical Principles of Inversion Theory 117
Clive D. Rodgers

Inverse Solution of the Pseudoscalar Transfer Equation through Nonlinear Matrix Inversion 139
Jean I. F. King

INVERSION METHODS IN THERMAL, GASEOUS, AND AEROSOL ATMOSPHERES

Session 4—C. Mateer, Chairman

Backus-Gilbert Theory and Its Application to Retrieval of Ozone and Temperature Profiles 155
Barney J. Conrath

Inversion of Infrared Limb Emission Measurements for Temperature and Trace Gas Concentrations 195
John C. Gille and Paul L. Bailey

Session 5—A. E. S. Green, Chairman

Inversion of Scattered Radiance Horizon Profiles for Gaseous Concentrations and Aerosol Parameters 217
Harvey L. Malchow and Cynthia K. Whitney

Inversion of Solar Aureole Measurements for Determining Aerosol Characteristics 265
Adarsh Deepak

Analytic Model Approach to the Inversion of Scattering Data 297
Alex E. S. Green and Kenneth F. Klenk

Open Discussion—I 323

Session 6—S. Twomey, Chairman

Comparison of Linear Inversion Methods by Examination of the Duality Between Iterative and Inverse Matrix Methods 325
Henry E. Fleming

Inversion of Passive Microwave Remote Sensing Data from Satellites 361
David H. Staelin

Session 7—D. Staelin, Chairman

Application of Statistical Inversion to Ground-Based Microwave Remote Sensing of Temperature and Water Vapor Profiles 395
E. R. Westwater and M. T. Decker

Inversion Methods in Temperature and Aerosol Remote Sounding: Their Commonality and Differences, and Some Unexplored Approaches 429
Alain L. Fymat

Session 8—M. P. McCormick, Chairman

Application of Modified Twomey Techniques to Invert Lidar Angular Scatter and Solar Extinction Data for Determining Aerosol Size Distributions 469
Benjamin M. Herman

The Inversion of Stratospheric Aerosol and Ozone Vertical Profiles from Spacecraft Solar Extinction Measurements 505
William P. Chu

Inversion of Solar Extinction Data from the Apollo-Soyuz Test Project Stratospheric Aerosol Measurement (ASTP/SAM) Experiment 529
Theodore J. Pepin

Session 9—H. C. van de Hulst, Chairman

Effective Aerosol Optical Parameters from Polarimeter Measurements 555
Jacob G. Kuriyan

Experience with the Inversion of Nimbus 4 BUV Measurements to Retrieve the Ozone Profile 577
Carlton L. Mateer

Temperature Sensing: The Direct Road to Information 599
Lewis D. Kaplan

Open Discussion—II 613

Index *617*
