## CONTENTS

Foreword	xi
<b>1 Microphysics and Geometry of Clouds</b>	<b>1</b>
1.1 Microphysical Characteristics of Clouds	1
1.2 Geometrical Characteristics of Clouds	27
<b>2 Optics of a Single Particle</b>	<b>33</b>
2.1 Vector Wave Equation	33
2.2 Mie Theory	37
2.3 Differential and Integral Light Scattering Characteristics	44
2.4 Geometrical Optics	75
<b>3 Radiative Transfer</b>	<b>113</b>
3.1 Radiative Transfer Equation	113
3.2 Reflection and Transmission Functions	117
3.3 Polarization Characteristics	119
3.4 Optically Thin Clouds	122
3.5 Small-Angle Approximation	123
3.6 Optically Thick Clouds	126
3.7 Clouds Over Reflective Surfaces	179

3.8 Vertically Inhomogeneous Clouds	181
3.9 Horizontally Inhomogeneous Clouds	194
<b>4 Applications</b>	<b>207</b>
4.1 Optical Phenomena in Clouds	207
4.2 Cloud Remote Sensing	223
4.3 Laser Beam Propagation Through a Cloud	247
4.4 Image Transfer Through Clouds and Fogs	252
4.5 Clouds and Climate	256
<b>Appendix A</b>	<b>259</b>
<b>Appendix B</b>	<b>263</b>
<b>References</b>	<b>269</b>
<b>Index</b>	<b>277</b>
