GENERAL CLIMATOLOGY

HOWARD J. CRITCHFIELD
Professor of Geography
Western Washington State College

Prentice-Hall, Inc. Englewood Cliffs, New Jersey

CONTENTS

part one	chapter one	introduction	3	
THE PHYSICAL ELEMENTS OF WEATHER AND CLIMATE		History of meteorology and climatology		
		Nature of the atmosphere		
		Origin of the atmosphere		
		Composition of the atmosphere		
		Vertical divisions of the atmosphere		
		chapter two	heat and temperature	14
			The heat budget	
			Variability of insolation	
			World distribution of insolation	
			Measurement of sunshine and insolation	
		Air temperature and its measurement		
		Thermometers		
		Temperature records		
		Horizontal temperature distribution		
		Vertical distribution of temperature		
	chapter three	atmospheric moisture	37	
		Humidity		
		Humidity measurements		
		Physical changes of state of water		
		Processes of cooling to produce condensation and sublimation		

Clouds: Their formation and classification
Cloud observations
Fog formation and fog types
Precipitation: Causes, forms, and types
Observations of precipitation
Distribution of precipitation regionally
Seasonal variation of rainfall

chapter four motion in the atmosphere

70

Measurement of atmospheric pressure
Pressure scales
Pressure-height relations
Horizontal pressure distribution
Pressure gradient and wind
Wind observations
Mapping wind data
Factors affecting wind direction and speed
Winds aloft
Diurnal variation of wind speed
General atmospheric circulation
The jet streams
Seasonal changes in the general circulation
Oceanic circulation
The monsoons
Local winds

chapter five air masses and storms

100

Properties of air masses
Air mass identification and analysis
Stability and instability
Air mass source regions and classification
The extratropical cyclone
The warm front
The cold front
The occluded fronts
Mountain barriers and fronts
Anticyclones
Tropical storms
Thunderstorms
Tornadoes and waterspouts
Special air mass and storm effects
Storm and air mass observations
Forecasting storms and their weather
The weather map
Air mass analysis and auxiliary charts
The forecast

part two	chapter six climatic classification	145
CLIMATES OF THE WORLD	Approaches to the classification of climate Koeppen's classification The Thornthwaite classifications Other classifications Climatic regions of the world	
	chapter seven climates dominated by equatorial and tropical air masses	159
	The rainy tropics Monsoon tropics Wet-and-dry tropics Tropical arid and semiarid climates	
	chapter eight climates dominated by tropical and polar air masses	178
	The dry summer subtropics The humid subtropics Marine climate Mid-latitude arid and semiarid climates Humid continental warm summer climate Humid continental cool summer climate	
	chapter nine climates dominated by polar and arctic air masses; highland climates	207
	Taiga climate Tundra climate Polar climate Highland climates	
part three	chapter ten climate and the world pattern of vegetation and soils	225
WEATHER CLIMATE AND LIFE	Climatic factors in plant growth World distribution of vegetation Forests Grasslands Desert Tundra Vertical differentiation of vegetation Climate as a factor in soil formation World distribution of soils Soil erosion	

chapter eleven climate and water resources 248

The hydrologic cycle
Runoff and floods
Climatic causes of floods
Runoff forecasting
Snow surveying and runoff forecasts
Rainmaking and the water supply
Cloud seeding

chapter twelve climate and agriculture 266

Climatic factors in crop production
Temperature and crops
Frost
Frost prevention
Frost warnings
The frost-free season
Phenology
The moisture factor
Drought
Combating drought—irrigation
Crops and wind
Climate and forestry
Forest-fire weather
Climatic factors in animal husbandry
Selection and breeding for climatic adaptation
Insects and diseases
Plant and animal introduction

chapter thirteen relations of weather and climate to transportation, communication, and industry 305

Aviation
Flying weather
Turbulence
Aircraft icing
Flying in storms
Fog dispersal
Water transport
Railways and highways
Public utilities
Industry
Atmospheric pollution
Construction
Climate and business

chapter fourteen weather, climate, and housing 336

- Climatic aspects of site
- Climate conditioning
- House orientation
- Climate conditioning through design
- Air conditioning
- Heating
- Cooling

chapter fifteen climate and the human body 352

- Sensible temperature
- Cooling power
- Clothing and climate
- Weather and health
- Sunshine and health
- Climate and disease
- Acclimatization

chapter sixteen climatic change and cycles 369

- Paleoclimatology
- Geochronology
- Climate during recorded history
- Recent climatic trends
- Climatic cycles
- Forecasting climate

APPENDICES

- bibliography 385**
- abridged meteorological tables 388**
- supplementary climatic data 394**

INDEX 403
