LANDOLT-BÖRNSTEIN

Zahlenwerte und Funktionen aus Naturwissenschaften und Technik

Neue Serie

Gesamtherausgabe: K.-H. Hellwege · O. Madelung

Gruppe V: Geophysik und Weltraumforschung

Band 4

Meteorologie

Teilband c
Klimatologie. Teil 1

D. Etling · M. Hantel
H. Kraus · C.-D. Schönwiese

Herausgeber: G. Fischer

Springer-Verlag Berlin Heidelberg New York
London Paris Tokyo

Table of contents

Meteorology
Subvolume c: Climatology

11 Climate definition (M. HANTEL, H. KRAUS, C.-D. SCHÖNWIESE) 1
11.1 Qualitative definitions of climate 1
11.2 The climate system 5
11.2.1 Components of the climate system 5
11.2.2 Climate elements 6
11.3 Qualitative definitions of climate 10
11.3.1 Spectral definition of climate 10
11.3.2 Scale definition of climate 19
11.3.3 The Köppen type classification 25
11.4 References for 11 27

12 Climate models (M. HANTEL) . . . . . See Subvolume c, Part 2

13 The present global surface climate
(M. HANTEL) . . . . . See Subvolume c, Part 2

14 Specific Surfaces Climates (H. KRAUS) 29
14.1 Scope of consideration 29
14.1.1 Definition of "Specific Surfaces Climates" 29
14.1.2 The "Specific Surfaces Climate System" 30
14.1.3 Purpose of this compilation 31
14.2 Physical principles generally governing Specific Surfaces Climates 32
14.2.1 The hydrodynamic equations 32
14.2.2 The surface energy balance 33
14.2.3 The boundary layer thermodynamic energy budget 50
14.2.4 Gravity generated winds 57
14.2.5 Roughness effects 73
14.2.6 Leading edge effects 75
14.2.7 Effects of surface elevation 81
14.3 List of symbols and abbreviations 85
14.4 References for 14 88

15 Climate variations (C.-D. SCHÖNWIESE) 93
15.1 Introduction 93
15.2 Information sources 94
15.2.1 Paleoclimate 94
15.2.2 Neoclimate, historical interval 95
15.2.3 Neoclimate, modern interval 95
15.3 Remarks on statistical problems 98
15.4 History of paleoclimate and neoclimate before the modern interval 100
15.4.1 Pre-Archean interval (Basic interval, Eogeological Basement; c. $4.6 \cdots 3.8 \cdot 10^9$ yr b.p.) . 100
15.4.2 Archean to Mesozoic interval (c. $3.8 \cdot 10^9 \cdots 65 \cdot 10^6$ yr b.p.) 101
15.4.3 Tertiary interval (c. $65 \cdots 2 \cdot 10^6$ yr b.p.) 108

15.4.4 Quaternary Pleistocene interval (c. $2 \cdot 10^6 \cdots 11 \cdot 10^3$ yr b.p.) . . . 111
15.4.5 Holocene interval before the modern interval ($11 \cdot 10^3$ yr b.p.···1659 AD) . . . 116
15.5 History of neoclimate since the modern interval (1659 AD) . . . 122
15.6 Overview of the northern hemisphere temperature variations . . . 140
15.7 Spectral overview of the northern hemisphere temperature variations . . . 141
15.8 Summary of possible causes of climate variations . . . 142
15.9 List of symbols and abbreviations . . . 145
15.10 Glossary . . . 146
15.11 References for 15 . . . 148

16 The Planetary Boundary Layer (PBL) (D. ETLING) . . . 151
16.1 Introduction . . . 151
16.2 The vertical structure of the PBL . . . 151
16.3 Theoretical basis . . . 152
16.4 The surface layer . . . 153
16.4.1 Profile functions . . . 154
16.4.2 Mean profiles in the surface layer . . . 156
16.4.3 The eddy diffusivities in the surface layer . . . 157
16.4.4 The Richardson number . . . 158
16.4.5 Turbulence characteristic . . . 158
16.4.6 Bulk transfer formulae . . . 159
16.5 The Planetary Boundary Layer . . . 160
16.5.1 The Ekman layer . . . 160
16.5.2 The neutral PBL . . . 161
16.5.3 The unstable PBL . . . 164
16.5.3.1 General structure . . . 164
16.5.3.2 Scaling of the unstable PBL . . . 166
16.5.3.3 Turbulence structure . . . 167
16.5.3.4 The height of the unstable PBL . . . 169
16.5.3.5 Turbulent kinetic energy budget . . . 170
16.5.4 The stable PBL . . . 170
16.5.4.1 General structure of the stable PBL . . . 171
16.5.4.2 Turbulence structure . . . 174
16.5.4.3 The height of the stable PBL . . . 175
16.5.5 The resistance laws for the PBL . . . 176
16.6 Observations in the PBL . . . 179
16.7 Modelling of the PBL . . . 180
16.8 List of symbols and abbreviations . . . 182
16.9 Definitions . . . 183
16.10 References for 16 . . . 184
