London and New York

CONTENTS

| | |
|--|-------|
| <i>List of plates</i> | xiv |
| <i>List of figures</i> | xv |
| <i>List of tables</i> | xviii |
| <i>List of contributors</i> | xx |
| <i>Preface</i> | xxii |
| <i>Acknowledgements</i> | xxiv |
| | |
| 1 INTRODUCTION: THE EMERGENCE OF APPLIED CLIMATOLOGY AND CLIMATE IMPACT ASSESSMENT | 1 |
| John E. Hobbs | |
| Introduction: weather, climate and everyday life | 1 |
| The development of applied climatology | 2 |
| Definitions, applications and developments | 3 |
| Atmospheric concern and awareness | 4 |
| Climate impact assessment | 6 |
| Conclusions | 8 |
| References | 8 |
| | |
| PART 1: APPLIED CLIMATOLOGY: THE 'TOOLS' OF RESEARCH | |
| | |
| 2 GROUND AND REMOTELY SENSED MEASUREMENTS | 13 |
| Ian Strangeways | |
| Introduction: data requirements and sources | 13 |
| A comparison of old and new instrumentation | 13 |
| The old-style instruments | 14 |
| The new generation of instruments | 16 |
| Remote sensing | 20 |
| Conclusions | 21 |
| References | 21 |

viii CONTENTS

| | | |
|---|---|----|
| 3 | STATISTICAL CONSIDERATIONS | 22 |
| | Scott M. Robeson | |
| | Introduction: the value of statistics | 22 |
| | Time series analysis | 22 |
| | Spatial analysis | 28 |
| | Conclusions | 32 |
| | References | 34 |
| 4 | CLIMATE MODELS | 36 |
| | Ann Henderson-Sellers and Kendal McGuffie | |
| | Introduction: modelling the climate system | 36 |
| | Global climate models | 39 |
| | Climate impact models | 42 |
| | Integrated assessment models | 43 |
| | Climate model evaluation | 44 |
| | Conclusions | 48 |
| | References | 48 |
| 5 | ATMOSPHERIC RESOURCE MANAGEMENT | 51 |
| | Ian Burton and Marjorie Shepherd | |
| | Introduction: atmospheric resource management issues | 51 |
| | History of atmospheric resource management | 52 |
| | Current management approaches to air quality problems | 54 |
| | Integration of air issues | 60 |
| | Sustainable development and the atmosphere | 61 |
| | Conclusions | 62 |
| | References | 62 |

PART 2: CLIMATE AND THE PHYSICAL/BIOLOGICAL ENVIRONMENTS

| | | |
|---|--|----|
| 6 | HYDROLOGICAL PROCESSES AND WATER RESOURCES | 65 |
| | Paul Whitehead | |
| | Introduction: climate and the aquatic environment | 65 |
| | Hydrological processes | 66 |
| | Impacts of climate change on hydrological response | 69 |
| | Impacts of climate change on water resources | 72 |
| | Conclusions | 73 |
| | References | 73 |
| 7 | GLACIERS | 74 |
| | Russell D. Thompson | |
| | Introduction: climate and glaciers | 74 |

| | |
|---|------------|
| Glacier types: physical and thermal characteristics | 75 |
| Glaciers: constituent zones and climate controls | 77 |
| The conversion of snow to glacier ice and the role of climate | 79 |
| Glacier mass balance and climate controls | 81 |
| Conclusions | 86 |
| References | 87 |
| 8 GEOMORPHIC PROCESSES AND LANDFORMS | 89 |
| Edward Derbyshire | |
| Introduction: climatic geomorphology | 89 |
| Climate and geomorphological processes | 90 |
| Climate change and landforms | 94 |
| Conclusions | 105 |
| References | 106 |
| 9 SOILS | 111 |
| Michael Bridges | |
| Introduction: soil climate | 111 |
| The soil | 111 |
| The soil atmosphere | 112 |
| Soil climate | 113 |
| Climate and soil geography | 115 |
| Soils and the greenhouse gases | 117 |
| Effect of climate change on soils | 120 |
| Conclusions | 121 |
| References | 121 |
| 10 VEGETATION | 123 |
| A.M. Mannion | |
| Introduction: climate and vegetation | 123 |
| Vegetation communities in the geological past | 124 |
| Climate and vegetation today | 133 |
| Climate and vegetation in the future | 135 |
| Conclusions | 138 |
| References | 139 |
| 11 ANIMAL RESPONSES TO CLIMATE | 141 |
| Bernard Stonehouse | |
| Introduction: climate and life | 141 |
| Elements of climate | 141 |
| Bioclimatic zones | 143 |
| Climatic instability | 144 |
| Sources of energy | 145 |
| Biochemical acclimatization | 146 |
| Ectothermy and endothermy | 147 |

| | |
|-------------------|-----|
| The ectotherm way | 148 |
| The endotherm way | 149 |
| Conclusions | 151 |
| References | 151 |

PART 3: CLIMATE AND THE CULTURAL ENVIRONMENTS

| | |
|--|-----|
| 12 COMFORT, CLOTHING AND HEALTH | 155 |
| Andris Auliciems | |
| Introduction: human adaptability and microclimate management | 155 |
| Homeothermy and adaptation | 155 |
| The human energy balance | 156 |
| Thermal stress estimates | 157 |
| The clothing envelope | 160 |
| Thermal comfort | 161 |
| Acclimatization | 163 |
| Atmospheric impacts on performance and behaviour | 165 |
| Atmospheric impacts on morbidity and mortality | 166 |
| Conclusions | 168 |
| References | 171 |
| 13 TOWN PLANNING, ARCHITECTURE AND BUILDING | 175 |
| Anthony Brazel and Jonathan Martin | |
| Introduction: climate and the built environment | 175 |
| Hot, humid climates | 176 |
| Hot, arid climates | 177 |
| Cold climates – polar regions | 178 |
| Other climates | 180 |
| Applications in urban planning | 181 |
| Conclusions | 185 |
| References | 186 |
| 14 INDUSTRY AND COMMERCE | 187 |
| Sven Lindqvist | |
| Introduction: climate, industrial output and commercial activities | 187 |
| Location of industries | 187 |
| Industry operation | 189 |
| Construction operations | 192 |
| Commerce | 193 |
| Conclusions | 195 |
| References | 197 |

| | | |
|----|---|-----|
| 15 | TRANSPORT SYSTEMS | 198 |
| | John E. Thornes | |
| | Introduction: climate and transport services | 198 |
| | Air transport | 201 |
| | Rail transport | 204 |
| | Road transport | 207 |
| | Water transport | 210 |
| | Conclusions | 213 |
| | References | 214 |
| 16 | AGRICULTURE AND FISHERIES | 215 |
| | David W. Lawlor | |
| | Introduction: nature and rate of environmental change | 215 |
| | Climatic factors regulating crop and animal production | 216 |
| | Responses of agricultural crops to global environmental changes | 218 |
| | Crop production and climate change | 221 |
| | Climate and animal production | 224 |
| | Fisheries and global environmental change | 225 |
| | Plant and animal breeding | 225 |
| | Conclusions | 226 |
| | References | 227 |
| 17 | FORESTRY | 228 |
| | Alexander Robertson | |
| | Introduction: climate and forests | 228 |
| | Climate and sustainable forests | 229 |
| | Dynamical perceptions | 229 |
| | Spatiotemporal chaos | 232 |
| | Conclusions | 235 |
| | References | 238 |
| 18 | RECREATION AND TOURISM | 240 |
| | Allen Perry | |
| | Introduction: climate–leisure interactions | 240 |
| | Weather and leisure participation | 241 |
| | Weather and climate information for the tourist industry | 242 |
| | Climate change, tourism and recreation | 244 |
| | Conclusions | 247 |
| | References | 247 |
| 19 | POLITICAL, SOCIAL AND LEGAL ASPECTS OF CLIMATE | 249 |
| | Paul J. Croft | |
| | Introduction: climate and political, social and legal impacts | 249 |
| | Political considerations | 250 |
| | Social aspects | 251 |

| | |
|---|------------|
| Legal considerations | 253 |
| References | 255 |
| 20 THE ENERGY SECTOR | 256 |
| Jim Skea | |
| Introduction: climate and energy supply | 256 |
| World energy supply | 256 |
| Energy resources | 259 |
| Transportation of energy | 264 |
| Energy conversion | 264 |
| Energy demand | 265 |
| Conclusions | 268 |
| References | 269 |
| PART 4: THE CHANGING CLIMATIC ENVIRONMENTS | |
| 21 URBAN CLIMATES AND GLOBAL ENVIRONMENTAL CHANGE | 273 |
| T.R. Oke | |
| The nature of global environmental change | 273 |
| The nature of urban climates | 274 |
| Impacts of urban climates on GEC | 278 |
| Impacts of GEC on urban climate | 279 |
| Conclusions | 284 |
| References | 286 |
| 22 AIR POLLUTION | 288 |
| Howard Bridgman | |
| Introduction: definitions and categorization of air pollution | 288 |
| Global air pollution problems | 288 |
| Continental-scale pollution problems | 296 |
| Urban air pollution problems | 299 |
| Conclusions | 302 |
| References | 302 |
| 23 CLIMATIC EXTREMES AS A HAZARD TO HUMANS | 304 |
| Keith Smith | |
| Introduction: climatic extremes, hazards and disasters | 304 |
| Impact of atmospheric disasters | 305 |
| Reducing the impact of atmospheric disasters | 308 |
| Conclusions | 314 |
| References | 315 |

| | | |
|----|--|-----|
| 24 | CLIMATE CHANGE, HISTORY AND THE FUTURE | 317 |
| | Neville Brown | |
| | Introduction: climate and human historical processes | 317 |
| | Into the medieval optimum | 318 |
| | Into the Little Ice Age | 320 |
| | Post-1850 climatic amelioration | 322 |
| | Conclusions | 323 |
| | References | 324 |

PART 5: OVERVIEW

| | | |
|----|--|-----|
| 25 | CONCLUSIONS AND SYNTHESIS | 329 |
| | Allen Perry and Russell D. Thompson | |
| | Introduction: aims and objectives reassessed | 329 |
| | The significance of climate in the functioning of the physical, biological and cultural environments | 329 |
| | Climate change and the responses of the physical, biological and cultural environments | 333 |
| | The monetary impact and value of climate change | 336 |
| | Concluding comments | 338 |
| | References | 340 |
| | <i>Index</i> | 341 |
