Contents

Preface	x
1 Introduction	1
Definition of the term "tropics"	1
Climatic boundaries of the tropics	1
The importance of tropical climates	5
Tropical climatology	6
2 Understanding the Laws of Weather and Climate	8
The physical laws	9
The equation of state	9
The first law of thermodynamics	11
The moisture equation	14
The equation of continuity	14
Equations of motion	16
The hydrostatic equation	23
Vorticity	24
Summary	27
3 Radiation Conditions in the Low Latitudes	29
Radiation laws	29
Insolation and its importance	31
Duration of insolation	32
Intensity of insolation	33
Combined effects	35
Terrestrial radiation	37
The radiation balance	39
The energy balance	41
Summary	44

4 Tropical Temperatures	45
Seasonal uniformity	45
Spatial uniformity	47
Diurnal temperature variations	51
The effects of elevation	51
Ocean currents	55
Physiological temperatures	55
Urban heat islands	57
Summary	62
5 General Circulation of the Tropics	64
The tropical circulation in a global context	65
The Hadley cells	67
The central zone of low pressure and convergence	72
The subtropical highs	76
The trade winds	80
Upper level circulation in the low latitude atmosphere	85
The subtropical jet	86
The tropical easterly jet	87
West African mid-tropospheric jet	89
East African low level jet	89
Ocean general circulation	91
Summary	95
6 Non-seasonal Variations of the Tropical Circulation	97
The quasi-biennial oscillation	97
The 40–50 day tropical oscillation	99
The Walker circulation, southern oscillation and El Nino	101
Diurnal variations of the tropical circulation	111
Sea and land breezes	111
Mountain and valley winds	114
Diurnal pressure variation	115
Summary	117
7 Seasonal Variations in Regional Circulation Systems: the Monsoons	119
The monsoon makers	119
Seasonal heating	121
Moisture processes	121
The earth's rotation	121

The annual monsoon cycle	121
Variability of the monsoons	123
Regional monsoon systems	123
The Indian monsoon	124
The East Asian monsoon	128
East Asian summer monsoon	128
East Asian winter monsoon	132
The Australian monsoon	134
The African monsoon	135
Eastern north Pacific monsoon	140
Summary	141
8 Tropical Disturbances	142
Thunderstorms	143
Linear systems	147
Easterly waves	149
Tropical cyclones	151
Monsoon depressions	160
Tropical disturbances with extratropical origins	160
Subtropical cyclones	161
Cold surges	162
Summary	163
9 Water in the Tropical Atmosphere	165
Evapotranspiration	165
Measurement and estimation of evaporation	169
Humidity	171
Distribution of humidity in the tropical atmosphere	173
Condensation	179
Tropical clouds and climate	180
Cloud types and cloudiness	181
Satellite cloud climatology	185
Summary	186
10 Tropical Precipitation	187
The origin of tropical rainfall	187
Total rainfall	190
The effects of elevation	194
Inter-annual variability of rainfall	195
Drought	198

The seasonal distribution of rainfall	198
The diurnal variation of rainfall	204
Rainfall frequency	207
Rainfall intensity	211
Rainstorms	215
Summary	216
11 Tropical Climates	217
Tropical Asia	217
Equatorial monsoon climates	219
Dry and wet monsoon climates	223
The Indian subcontinent and northern Sri Lanka	223
Burma, Thailand and Indo-China	228
The Philippines	230
Northern Australia, south-eastern Indonesia, southern New Guinea	232
The dry tropics of Asia and Australia	234
North-west India and south-east Pakistan	234
The Australian dry tropics	235
Tropical Africa	236
Equatorial Africa	239
West Africa and the southern Sudan	242
Southern tropical Africa	244
East Africa	245
Madagascar	249
Tropical America	250
The Caribbean region	251
Central America	252
Tropical South America	255
The western coastal region	256
The mountain highlands	259
Tropical South America east of the mountains	259
The tropical oceans	263
Oceanic islands	264
Summary	265
12 Tropical Climates and Agriculture	268
Solar radiation	268
Temperature	270
Altitudinal zones of agriculture	272
Precipitation	273
Climatic water balances	275
Winds	278

Tropical soils	280
Agricultural systems	281
Summary	283
13 Climate Change	285
Types of climate change	285
Causes of climate change	286
External causes	286
Internal factors	287
Human activities and climate change	290
Greenhouse gases	292
Deforestation	295
Desertification	299
Methods for assessing the effects of climate change in the tropics	301
Predicted climate change	303
Climate change effects in the low latitudes	304
Summary	311
References	312
Author Index	325
Geographical Index	330
Subject Index	333
