ACADEMIC PUBLISHERS GROUP

DORDRECHT / BOSTON / LANCASTER / TOKYO

## T A B L E O F C O N T E N T S

Foreword	V
Ph. Bourdeau, Director, Directorate-General "Science, Research and Development", Commission of the European Communities, Brussels	
Opening address	3
J.P. ROZELOT, Director of CERGA, Sophia Antipolis, France	

## R A P P O R T E U R ' S R E P O R T S

Palaeoclimate in the E.C. climate programme	8
J. DUPLESSY, Centre des Faibles Radioactivités, CNRS-CEA, Gif sur Yvette, France; W.A. WATTS, Trinity College, Dublin, Ireland	
Climate modelling	10
A. GILCHRIST, Meteorological Office, Bracknell, United Kingdom; K.H. HASSELMANN, Max-Planck-Institut für Meteorologie, Hamburg, F.R. Germany	
Anthropogenic climate perturbations	16
A. BERGER, U.C.L., Institut d'Astronomie et de Géophysique Georges Lemaître, Louvain-la-Neuve, Belgium; C.D. SCHOENWIESE, Institut für Meteorologie und Geophysik, Johann-Wolfgang- Goethe-Universität, Frankfurt, F.R. Germany	
Impact of climate and climate variations on European resources	23
C. SCHUURMANS, Royal Netherlands Meteorological Institute, De Bilt, The Netherlands	

CHAPTER I : RECONSTITUTION OF  
PAST CLIMATE

- The impact on Europe of large-scale climatic changes:  
the onset of glaciation and the last deglaciation 28  
J.C. DUPLESSY et al., Centre des Faibles Radioactivités,  
Laboratoire mixte CNRS-CEA, Gif sur Yvette, France
- Climatic history from ice core studies in Greenland  
- Data correction procedures 45  
W. DANSGAARD, H.B. CLAUSEN, D. DAHL-JENSEN, N. GUNDESTRUP  
and C.U. HAMMER, Geophysical Institute, Department of  
Glaciology, University of Copenhagen, Denmark
- Air-Sea interaction during the last 100 years and time scales  
of climatic fluctuations 61  
H. FLOHN and K.-H. WEBER, Meteorologisches Institut,  
Universität Bonn, F.R. Germany
- Modelling the astronomical theory of paleoclimates in the time  
and frequency domain - An example of the relationship between long  
term and short term climate changes 77  
A. BERGER and P. PESTIAUX, Université Catholique de Louvain,  
Institut d'Astronomie et de Géophysique Georges Lemaître,  
Louvain - la - Neuve, Belgium
- Climate reconstruction using historical sources 97  
T.M.L. WIGLEY, G. FARMER and A.E.J. OGILVIE, Climatic  
Research Unit, University of East Anglia, Norwich,  
United Kingdom
- Stages of climatic change from full glacial to holocene in northwest  
Spain, southern France and Italy: a comparison of the Atlantic  
coast and the Mediterranean basin 101  
W.A. WATTS, University of Dublin, Ireland
- Paleoclimatic reconstruction in Belgium and in Greece based on  
Quaternary lithostratigraphic sequences 113  
R. PAEPE, Vrije Universiteit Brussel, Belgium; I. MARIOLAKOS,  
University of Athens, Greece

C H A P T E R   I I   :   C L I M A T E   M O D E L L I N G

Evidence of bimodality in the statistics of northern hemisphere circulation	132
A. SPERANZA, CNR-FISBAT c/o Dip. Fisica, Bologna, Italy	
Simulation of European climate with an atmospheric general circulation model	139
A. SLINGO and H. WILSON, Dynamical Climatology Branch, Meteorological Office, Bracknell, United Kingdom	
Modelling the impact of soil properties on European climate	151
K. LAVAL, Laboratoire de Météorologie Dynamique, Paris, France	
Interactive ocean-atmosphere models for climate forecasting	163
J.C.J. NIHOUL, Geo-Hydrodynamics and Environment Research, Liège University, Belgium	
Climate modelling activities at the Max-Planck-Institute of meteorology, Hamburg	172
K. HASSELMANN, Max-Planck-Institut für Meteorologie, Hamburg, F.R. Germany	
Ocean modelling in Cambridge	195
P.D. KILLWORTH, Department of Applied Mathematics and Theoretical Physics, University of Cambridge, United Kingdom	
Subpolar circulation, deep water formation and air-sea-ice interactions in Labrador and Greenland seas	207
J.C. GASCARD, Laboratoire d'Océanographie Physique, Muséum National d'Histoire Naturelle, Paris, France	
Development of an economical soil model for climate simulation	219
H. BAUER, E. HEISE, J. PFAENDTNER and V. RENNER, Deutscher Wetterdienst, Offenbach, F.R. Germany	

CHAPTER III : ANTHROPOGENIC CLIMATE  
PERTURBATIONS

- On modelling the effects of CO<sub>2</sub> on climate 228  
J.F.B. MITCHELL, Meteorological Office, Bracknell,  
United Kingdom
- CO<sub>2</sub> and climate : Information from Antarctic ice core studies 240  
D. RAYNAUD and J.M. BARNOLA, Laboratoire de Glaciologie et  
Géophysique de l'Environnement, St. Martin d'Hères, France
- Atmospheric CO<sub>2</sub> concentration in subantarctic countries 247  
A. GAUDRY, J.M. ASCENCIO-PARVY and G. LAMBERT, Centre des  
Faibles Radioactivités, Laboratoire mixte CNRS-CEA,  
Gif-sur-Yvette, France
- The influence of man-made SO<sub>2</sub>, and particle emission on the global  
aerosol concentration and the optical properties of the atmosphere 258  
H. HINZPETER, Max-Planck-Institute for Meteorology, Hamburg,  
F.R. Germany

CHAPTER IV : CLIMATIC IMPACTS

- Socio-economic impacts of a climatic change due to a doubling of  
atmospheric CO<sub>2</sub> content 270  
CH. SCHNELL, Dornier System, Friedrichshafen, F.R. Germany
- The use of crop models in assessing likely effects of variation  
in climate 287  
W. DAY, Physiology and Environmental Physics Department,  
Rothamsted Experimental Station, Harpenden, United Kingdom
- The effects of elevated carbon dioxide levels on the growth of  
crop plants : an attempt to predict the consequences for  
grassland and maize production in Europe 294  
M.B. JONES, Botany Department, Trinity College, Dublin,  
Ireland
- Agroclimatic classification of central Italy 309  
G. MARACCHI and F. MIGLIETTA, Agronomy Institute,  
University of Florence, I.A.T.A. - C.N.R., Florence, Italy

C H A P T E R V : G E N E R A L T O P I C S

World climate research programme, plan and implementation	324
V.P. MELESHKO, Joint Planning Staff for WCRP, WMO/ICSU, Geneva, Switzerland	
CO <sub>2</sub> programme of US department of energy	334
F.A. KOOMANOFF, Director, Carbon Dioxide Research Division, Office of Basic Energy Sciences, Washington, USA	
Satellite climatology - Study of the earth radiation budget from in flight ultrasensitive accelerometer techniques	339
J.P. ROZELOT, Centre d'Etudes et de Recherches Géodynamiques et Astronomiques (C.E.R.G.A.), Grasse, France	
Measurement of the radiation pressures by accelerometry: a new way to the determination of the earth radiation budget - Result obtained with CASTOR/CACTUS experiment	341
Y. BOUDON, Centre d'Etudes et de Recherches Géodynamiques et Astronomiques (C.E.R.G.A.), Grasse, France
