CONTENTS

PART I INTRODUCTION TO CLIMATE MODELS

1. Elementary Models of the Climate System, 3
2. General Circulation of the Atmosphere and Oceans, 23

PART II QUATERNARY CLIMATES

3. Reconstructing Climate of the Last 20,000 Years, 47
4. Modeling the Climate of the Last 20,000 Years, 71
5. Historical Climate Fluctuations, 92
6. Temporal Trends in Pleistocene Climates, 110
7. Times Series Analysis of Paleoclimate Records, 132

PART III PRE-QUATERNARY CLIMATES

8. Mid-Cretaceous Climate, 155
9. Environmental Consequences of an Asteroid Impact, 171
10. The Last 100 Million Years, 183
11. Paleozoic and Early Mesozoic Climates, 212
12. Precambrian Climates, 237

PART IV SUMMARY AND SYNTHESIS

13. Summary and Synthesis of Past Climates, 245
 14. Paleoclimate Perspectives on a Greenhouse Warming, 252
- Appendix A: The Geologic Time Scale, 263
- Appendix B: Paleoenvironmental Estimates from Proxy Data, 264
- Appendix C: A Short Outline of Time Series Analysis, 268
- Appendix D: Annotated Bibliography of Selected Reference Works, 274
- References, 277
- Addendum: Recent Advances in Paleoclimatology, 323
- Index, 333
