Climates of Australia and New Zealand

edited by J. GENTILI

*University of Western Australia
Nedlands, W.A. (Australia)*

ELSEVIER PUBLISHING COMPANY Amsterdam-London-New York 1971

Contents

Chapter 1. INTRODUCTION

by J. GENTILI

Reference	3
---------------------	---

Chapter 2. A CHRONOLOGY OF CLIMATIC WORK IN AUSTRALIA

by J. GENTILI

References	10
----------------------	----

Chapter 3. THE AUSTRALIAN REGION AND THE GENERAL CIRCULATION OF THE SOUTHERN HEMISPHERE

by U. RADOK

Introduction	13
The jet stream of the Australian region	17
The upper flow of the Australian region as a part of the general circulation	24
References	31

Chapter 4. AUSTRALIAN CLIMATIC FACTORS

by J. GENTILI

Introduction	35
Solar radiation	36
Latitude and solar angles	36
Duration of sunshine	36
Intensity of sunshine	41
Impurities in the air	44
The nature of the surface	45
Albedo and the heat balance	45
The effect of topography	47
Ocean temperature	49
Index to existing literature	51
References	51

Chapter 5. DYNAMICS OF THE AUSTRALIAN TROPOSPHERE

by J. GENTILI

Introduction	53
Air masses of Australia	53
The travelling anticyclones	58
Cool changes and southerly busters	69
The trade winds	74
The monsoon.	82
Tropical cyclones	86
Subtropical troughs and depressions	94
Mid-latitude depressions	94
Tornadoes, whirlwinds and waterspouts	105
Land- and sea-breezes	108
Index to existing literature	114
References	115

Chapter 6. THE MAIN CLIMATOLOGICAL ELEMENTS

by J. GENTILI

Pressure	119
Distribution of heat	122
The higher temperatures	122
The lower temperatures	127
Oceanic influences and thermal amplitudes	131
The water balance.	133
The rain-bearing factors	133
The amount and variability of the rain	144
Evaporation, humidity and the water balance	163
Climatic regions	176
Minor climatic elements	182
Dew.	182
Fog	182
Snow	183
Thunderstorms and hail	184
References	184

Chapter 7. CLIMATIC FLUCTUATIONS

by J. GENTILI

The search for a cycle	189
Lunar cycles	189
Solar cycles	190

The southern oscillation	193
Climatic trends and fluctuations	197
The climate of the southwestern quarter	198
The climate of the southeastern quarter	201
The overall pattern of change	204
References	210

Chapter 8. THE CLIMATE OF NEW ZEALAND—PHYSICAL AND DYNAMIC FEATURES

by W. J. MAUNDER

Situation—location and physiography	213
Surface dynamic features	215
Seasonal movement of pressure systems and frequency of patterns	215
Frequency of weather patterns, 215—Direction of air flow, 216	
Features of weather systems	217
Anticyclonic weather, 217—Low-pressure troughs, 218—Cold fronts, 218—Wave depressions, 219—Westerly wave series, 220—Disturbed southwesterlies, 221—Tropical cyclones, 221—Tornadoes, 222	
Upper dynamic features	222
The upper flow	222
Correlation with surface dynamic features	224
Sources used in the New Zealand chapters	225
Official published data	225
Data from climatological stations, 225—Data from rainfall stations, 225	
Acknowledgements	226
References	226

Chapter 9. ELEMENTS OF NEW ZEALAND'S CLIMATE

by W. J. MAUNDER

Meteorological observations in New Zealand	229
History	229
Climatological data	233
Pressure and winds	235
Prevailing airflow, 236—Mean wind speed, 237—Wind gustiness, 238	
Rainfall	238
Average yearly rainfall, 238—Highest yearly rainfalls, 240—Lowest yearly rainfalls, 240—Variability of yearly rainfalls, 241—Highest monthly rainfalls, 241—Lowest monthly rainfalls, 241—Monthly rainfall differences, 241—Variability of monthly rainfalls, 242—Highest daily rainfalls, 242—Duration of rainfall, 243—Diurnal rainfall regimes, 243—Rainfall intensities, 243—Rainfall trends, 244	
Droughts	245
Water vapour and cloudiness	246

Solar radiation and sunshine	246
Solar radiation, 246—Sunshine duration, 247	
Temperature	247
Extreme temperatures, 247—Annual extreme temperatures, 250—Mean daily temperatures, 251—January temperatures, 251—July temperatures, 254—Temperatures and rainfall, 254—Ground frosts, 254—Screen frosts, 256	
Evaporation and the water balance	256
Evaporation, 256—Water need, 257	
Special phenomena	259
Thunderstorms, 259—Hail, 259—Snow, 259—Fog, 259	
The human climates	260
Applied aspects	260
References	261

Chapter 10. CLIMATIC AREAS OF NEW ZEALAND

by W. J. MAUNDER

Climatic classifications	265
Climatic areas	266
References	267

Appendix. CLIMATIC TABLES OF AUSTRALIA AND NEW ZEALAND

Geographical arrangement of the tables	269
REFERENCES INDEX	385
GEOGRAPHICAL INDEX	391
SUBJECT INDEX	401
