

Cambridge Atmospheric and Space Science Series

The cover features a high-contrast, blue-toned aerial photograph of a snow-covered terrain. A large, semi-transparent circular shadow is cast over the lower-left portion of the image, suggesting the book's physical form. The overall aesthetic is scientific and atmospheric.

Contents

Preface ix

Chapter 1 Introduction 1

- 1.1 Physical characteristics of the Antarctic 1
- 1.2 A brief history of Antarctic meteorology 4
- 1.3 The role of the Antarctic atmosphere in the global climate system 10

Chapter 2 Observations and instrumentation 13

- 2.1 Observing in the Antarctic 13
- 2.2 Instruments for meteorological measurements 14
- 2.3 Automatic weather stations 20
- 2.4 Drifting buoys 29
- 2.5 Surface-based remote sensing 36
- 2.6 Satellites, space-based observing systems and ground stations 38
- 2.7 The station network and communications 57
- 2.8 Data sets and data centres 59

Chapter 3 Physical climatology 68

- 3.1 Radiation 68
- 3.2 Temperature and humidity 81
- 3.3 Pressure, geopotential and wind 89
- 3.4 Clouds and precipitation 97
- 3.5 Sea ice and the Southern Ocean environment 120

Chapter 4	The large-scale circulation of the Antarctic atmosphere	142	
4.1	Introduction	142	
4.2	The heat budget	143	
4.3	Atmospheric circulation and the vorticity budget	154	
4.4	The water vapour budget	168	
4.5	Representation of the Antarctic atmosphere in general circulation models	178	
Chapter 5	Synoptic-scale weather systems and fronts	185	
5.1	Introduction	185	
5.2	The role of depressions	188	
5.3	Depressions in the Antarctic and over the Southern Ocean	190	
5.4	Climatology	222	
5.5	Preparation of operational analyses and forecasts	246	
5.6	Future research needs	265	
Chapter 6	Mesoscale systems and processes	267	
6.1	Local wind systems	267	
6.2	Internal gravity waves	284	
6.3	The atmospheric boundary layer	290	
6.4	Blowing snow	301	
6.5	Mesocyclones	307	
Chapter 7	Climate variability and change	341	
7.1	Variations in the historical climate record	342	
7.2	Interactions with the tropical and mid-latitude circulation	353	
7.3	Future climate predictions – Antarctica in a ‘greenhouse’ climate	369	
	Appendix A	<i>A chronological list of stations that have made multi-year meteorological observations in the Antarctic and on the sub-Antarctic islands</i>	374
	Appendix B	<i>A chronological list of automatic weather stations that have been deployed in the Antarctic and on the sub-Antarctic Islands</i>	380
	<i>References</i>	386	
	<i>Index</i>	405
