Contents

Preface	v
Introduction	1
Chapter 1. Mechanisms of climatic change	5
Greenhouse effect	5
Causes of climatic change	5
Calculations of climatic warming	6
Greenhouse gases of concern	7
Carbon dioxide	8
Chlorofluorocarbons (CFCs)	10
Halon	12
Methane	12
Nitrous oxide	12
Carbon monoxide	12
Ozone	14
Chapter 2. Direct effects	16
Climatic stress and adaptation	16
Thermal factors	17
Heat disorders	18
Effects of ultraviolet radiation on human beings	20
Increase in skin cancer	21
Possible alterations in immune responses	22
Effects on eye diseases	22
Positive effects of ultraviolet radiation	23
Adaptation of man to ultraviolet radiation	23
Air pollution	23

Chapter 3. Indirect effects	26
Food and nutrition	26
Nutritional requirements	26
Food production	27
Effects of ultraviolet radiation on biota other than man	30
Marine organisms	30
Terrestrial plants	30
Communicable diseases	31
Vector-borne diseases	31
Direct effects	37
Indirect effects	39
Possible effects on malaria and malaria vectors	40
Climatic change and the epidemiology of vector-borne diseases	42
Non-vector-borne diseases	42
Non-vector-borne diseases related to water	42
Diseases related to water quality (water-borne diseases)	43
Diseases related to insufficient water availability to households (water-washed diseases)	43
Diseases related to the soil	44
Airborne diseases	44
Other communicable diseases	44
Human migration	44
Temporary migration following natural disasters	45
Patterned migration	45
Climate-induced emigration	46
 Chapter 4. Conclusions and recommendations	 48
Specific recommendations	48
 References	 50
 Annex 1. Lists of participants	 55
