<i>Foreword</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
<i>1992 Supplement</i>	<i>1</i>
A Greenhouse Gases R.T. WATSON ( <i>COORDINATOR</i> )	23
A1 Sources and Sinks R.T. WATSON, L.G. MEIRA FILHO, E. SANHUEZA & A. JANETOS	25
A2 Radiative Forcing of Climate I.S.A. ISAKSEN, V. RAMASWAMY, H. RODHE & T.M.L. WIGLEY	47
A3 Emissions Scenarios for IPCC: An Update J. LEGGETT, W.J. PEPPER & R.J. SWART	69
B Climate Modelling, Climate Prediction and Model Validation W.L. GATES, J.F.B. MITCHELL, G.J. BOER, U. CUBASCH & V.P. MELESHKO	97
C Observed Climate Variability and Change C.K. FOLLAND, T.R. KARL, N. NICHOLLS, B.S. NYENZI, D.E. PARKER & K.YA. VINNIKOV	135
<i>Annex</i>	<i>171</i>
<i>Appendix 1 Organization of IPCC and Working Group I</i>	<i>177</i>
<i>Appendix 2 Contributors to the IPCC WGI Report</i>	<i>179</i>
<i>Appendix 3 Reviewers of the IPCC WGI Report</i>	<i>183</i>

The 1992 IPCC Supplement:  
Scientific Assessment

---

Prepared by IPCC Working Group I

---

# CONTENTS

<b>1 Current Task</b>	5	Atmospheric Sulphate Aerosol Models	13
<b>2 Our Major Conclusions</b>	5	<b>6 How has our Understanding of Changes in Radiative Forcing Changed?</b>	14
Gases and Aerosols	5	Radiative Forcing due to Changes in Stratospheric Ozone	14
Scenarios	6	Radiative Forcing due to Changes in Tropospheric Ozone	14
Modelling	6	Radiative Effects of Sulphur Emissions	14
Climate Observations	6	Global Warming Potentials	14
<i>Box</i> - How does the climate system work?	7	Direct Global Warming Potentials	14
<b>3 How has our Understanding of the Sources and Sinks of Greenhouse Gases and Aerosols Changed?</b>	8	Indirect Global Warming Potentials	14
Atmospheric Concentrations and Trends of Long-lived Greenhouse Gases	8	Influence of Changes in Solar Output	15
Atmospheric Concentrations and Trends of Other Gases that Influence the Radiative Budget	8	<b>7 Confidence in Model Predictions</b>	15
Sources and Sinks of Carbon Dioxide	8	<b>8 Simulated Rates of Change in Climate and their Geographical Distribution</b>	15
Sources of Methane	9	<i>Box</i> - What tools do we use?	16
Sources of Nitrous Oxide	9	<b>9 What Would We Now Estimate for Climate Change?</b>	17
Sources of Halogenated Species	9	<b>10 The Updated Record of Global Mean Temperatures</b>	17
Stratospheric Ozone Depletion	9	<b>11 Are There any Trends in Other Climatically Important Quantities?</b>	19
Sources of Precursors of Tropospheric Ozone	9	<b>12 Are the Observed Temperature Changes Consistent with Predicted Temperature Changes?</b>	19
Sources of Aerosols	9	<b>13 Key Uncertainties and Further Work Required</b>	19
<b>4 Scenarios of Future Emissions</b>	9	<i>Annex:</i>	21
Scenario Results	10	Progress in the Development of an IPCC Methodology for National Inventories of Net Emissions of Greenhouse Gases	
Carbon Dioxide	10		
Halocarbons	10		
Methane, Nitrous Oxide, Ozone Precursors and Sulphur Gases	10		
<b>5 Relationship Between Emissions and Atmospheric Concentrations and the Influence on Radiative Budget</b>	13		
Carbon Cycle Models	13		
Atmospheric Gas Phase Chemistry Models	13

## Greenhouse Gases: Sources and Sinks

---

R.T. WATSON, L.G. MEIRA FILHO, E. SANHUEZA, A. JANETOS

Contributors:

*P.J. Fraser<sup>†</sup>; I.J. Fung; M.A.K. Khalil; M. Manning; A. McCulloch; A.P. Mitra;  
B. Moore; H. Rodhe; D. Schimel; U. Siegenthaler; D. Skole; R.S. Stolarski<sup>†</sup>*

<sup>†</sup> - Chairs for Chapters 1 and 2 of WMO/UNEP Science Assessment of Ozone Depletion: 1991 (WMO, 1992), therefore representing a number of other contributors who are not listed here.

---

# CONTENTS

<b>Executive Summary</b>	29	<b>A1.4.3 Sources</b>	37
<b>A1.1 Introduction</b>	31	<b>A1.5 Halogenated Species</b>	38
<b>A1.2 Carbon Dioxide</b>	31	A1.5.1 Atmospheric Trends	38
A1.2.1 Introduction	31	A1.5.2 Sinks	38
A1.2.2 Atmospheric Abundances and Trends	31	A1.5.3 Sources	38
A1.2.3 Sources	31	<b>A1.6 Ozone</b>	39
A1.2.3.1 Combustion	31	A1.6.1 Observed Trends in Total Column Ozone	39
A1.2.3.2 Land-Use Changes	31	A1.6.2 Observed Trends in the Vertical Distribution of Ozone	39
A1.2.3.2.1 Recent estimates of deforestation rates	32	A1.6.3 Future Levels of Stratospheric Ozone	40
A1.2.3.2.2 Carbon density and ecosystem processes	33	<b>A1.7 Tropospheric Ozone Precursors: Carbon Monoxide, Non-Methane Hydrocarbons and Nitrogen Oxides</b>	40
A1.2.3.2.3 Annual average fluxes	33	A1.7.1 Trends	40
A1.2.4 Sinks	33	A1.7.2 Sources and Sinks	40
A1.2.4.1 Oceans	33	<b>A1.8 Sulphur-Containing Gases</b>	40
A1.2.4.2 Terrestrial Biosphere	33	A1.8.1 Sources	40
A1.2.5 Models and Predictions	34	A1.8.2 Atmospheric Gas-Particle Conversion	41
<b>A1.3 Methane</b>	35	A1.8.3 Transport and Distribution	42
A1.3.1 Atmospheric Concentrations and Trends	35	A1.8.4 Removal	42
A1.3.2 Sinks	35	A1.8.5 Stratospheric Aerosols	42
A1.3.3 Sources	36	<b>References</b>	42
<b>A1.4 Nitrous Oxide</b>	37		
A1.4.1 Atmospheric Concentrations and Trends	37		
A1.4.2 Sinks	37

## Radiative Forcing of Climate

---

I.S.A. ISAKSEN, V. RAMASWAMY, H. RODHE, T.M.L. WIGLEY

Contributors:

*R. Charlson; I. Karol; J. Lelieveld; C.B. Leovy; S.E. Schwartz; K.P. Shine;  
R.T. Watson; D.J. Wuebbles; B.A. Callander*

---

## CONTENTS

<b>Executive Summary</b>	51	<b>A2.5.4 Indirect Effects due to CH<sub>4</sub> Emissions</b>	60
<b>A2.1 Introduction</b>	53	A2.5.4.1 Changes in Lifetimes due to Changes in OH	60
<b>A2.2 Radiative Forcing</b>	53	A2.5.4.2 Radiative Forcing Changes from CH <sub>4</sub> -Induced Changes in Ozone	60
<b>A2.3 The Global Warming Potential (GWP) Concept</b>	53	A2.5.4.3 Effects of CH <sub>4</sub> on Stratospheric Water Vapour	61
A2.3.1 Definition	53	A2.5.4.4 Oxidation to CO <sub>2</sub>	61
A2.3.2 Reference Molecule	54	A2.5.4.5 Indirect GWP for CH <sub>4</sub>	61
A2.3.3 Time Horizons for GWPs	54	A2.5.5 NO <sub>x</sub> Emissions	61
A2.3.4 Limitations of Present GWPs	54	A2.5.6 CO and NMHC Emissions	61
A2.3.5 Direct GWPs of Well-Mixed Trace Gases	55	A2.5.7 Summary	61
A2.3.6 Indirect GWPs of Well-Mixed Trace Gases	55	<b>A2.6 Radiative Forcing due to Aerosol Particles</b>	62
<b>A2.4 Radiative Forcing due to Stratospheric Ozone</b>	55	A2.6.1 Tropospheric Particles	62
A2.4.1 Lower Stratospheric Losses	55	A2.6.1.1 Background	62
A2.4.2 The Greenhouse Effect of Ozone Losses	58	A2.6.1.2 New Findings	62
A2.4.3 Ozone Depletion and Stratospheric Temperature Changes	58	A2.6.1.3 Discussion	63
<b>A2.5 Radiative Forcing due to Gases in the Troposphere</b>	59	A2.6.2 Stratospheric Sulphate Particles	64
A2.5.1 Introduction	59	<b>A2.7 Forcing Due to Solar Irradiance Changes</b>	64
A2.5.2 Chemical Processes and Changes in O <sub>3</sub> and OH	59	<b>References</b>	65
A2.5.3 Sensitivity of Radiative Forcing to Changes in Tropospheric Ozone	60

## CONTENTS

<b>Executive Summary</b>	139	C3.3.1.1 Radiosonde data	154
<b>C1 Introduction</b>	141	C3.3.1.2 Satellite microwave sounder data	156
<b>C2 Palaeoclimate Variations and Change - Climates Mainly Before the Late Nineteenth Century</b>	141	C3.3.1.3 Comparisons of satellite microwave, radiosonde & surface temperature data	156
<b>C3 The Modern Instrumental Record</b>	142	C3.3.2 Atmospheric Moisture	157
C3.1 Surface Temperature Variations and Change	142	C3.4 Variations and Changes in the Cryosphere	158
C3.1.1 Hemispheric and Global Land Temperature	142	C3.4.1 Snow Cover	158
C3.1.2 Hemispheric and Global Sea Surface Temperature	143	C3.4.2 Mountain Glaciers	158
C3.1.2.1 Ship data	143	C3.4.3 Polar Ice Caps	160
C3.1.2.2 Reliability of the SST data	145	C3.4.4 Sea-Ice	160
C3.1.2.3 Coral reef bleaching as an indicator of SST extremes	145	C3.5 Variations and Changes in Atmospheric Circulation	162
C3.1.3 Land and Sea Combined	146	<b>C4 Detection and Attribution of Climatic Change</b>	162
C3.1.4 Worldwide Regional Temperature Anomaly Patterns	148	C4.1 The Greenhouse Effect	162
C3.1.5 Changes in the Diurnal Range of Temperature	151	C4.2 Other Factors	162
C3.2 Precipitation and Evaporation Variations and Changes	152	C4.2.1 Solar Influences	162
C3.2.1 Precipitation Over Land	152	C4.2.2 Bi-decadal Temperature Variations	163
C3.2.2 Precipitation Over the Oceans	153	C4.2.3 "Abrupt" Climatic Changes	163
C3.2.3 Evaporation from the Ocean Surface	153	C4.2.4 Aerosols	163
C3.3 Tropospheric and Lower Stratospheric Variations and Change	154	C4.2.4.1 Man-made aerosols	163
C3.3.1 Temperature	154	C4.2.4.2 Volcanic aerosols	164
		C4.2.5 Changes in Land Surface Characteristics	164
		C4.2.6 Deep Ocean Heat Storage	164
		<b>C5 Concluding Remarks</b>	165
		<b>References</b>	165
