# Contents

<i>Foreword</i>	xii
<i>Preface</i>	xv
Policymakers' summary	1
I Scenarios used in the report	1-1
II Agriculture and forestry	2-1
III Natural terrestrial ecosystems	3-1
IV Hydrology and water resources	4-1
V Human settlement; the energy, transport and industrial sectors; human health; air quality and changes in Ultraviolet-B radiation	5-1
VI Oceans and coastal zones	6-1
VII Seasonal snow cover, ice and permafrost	7-1

# Chapter 2

## Agriculture and forestry

**Co-Chairmen:** M.L. Parry (UK), G.V. Mendzhulin (USSR), S. Sinha (India)

**Lead author:** M.L. Parry, UK

**Section authors:**

Agriculture	M.L. Parry, UK
Forestry	P.N. Duinker, Canada

**Associate authors:**

Direct effects on agriculture	J.I.L. Morison, UK
Effects on pests	J.H. Porter, UK
Effects on prices and trade	J. Reilly, USA
Effects on sea-level	L.J. Wright, UK
Data Collection	L.J. Wright, UK

### Expert Contributors

B. Acock (USA); M. Beran (UK); M. Boko (Benin); D. Bond (Canada); W. Degefu (Ethiopia); T. Farago (Hungary); J. Hales (Australia); M. Harwell (USA); J. Hayes (USA); R. Heathcote (Australia); T. Keane (Ireland); L. Kettunen (Finland); J. Kindler (Poland); R. Kintanar (Philippines); D. Linforth (Australia); J. Lomas (Israel); A. Magalhaes (Brazil); G. Mendzhulin (USSR); P. Mosley (New Zealand); J. Muller (East Germany); N. Nicholls (Australia); Nguyen Hu Ninh (Vietnam); L. Ogallo (Kenya); J. Oguntoyinbo (Nigeria); S. Panturat (Thailand); B. Pittock (Australia); P. Ramirez (Costa Rica); J. Reilly (USA); V. Richter (Czechoslovakia); C. Rosenzweig (USA); J. Salinger (New Zealand); A. Sastri (India); S. Sinha (India); O. Sirotenko (USSR); B. Smit (Canada); Z. Uchijima (Japan); J. Williams (UK); M. Yoshino (Japan); Jia-cheng Zhang (China)

# Contents

1	Introduction .....	2-1
1.1	Objectives and approach .....	2-1
1.2	Assumptions .....	2-1
1.2.1	Climatic scenarios .....	2-1
1.2.2	Assumptions concerning technology and management .....	2-1
2	Potential impacts on agriculture and land use .....	2-1
2.1	Introduction .....	2-1
2.2	Critical types of climatic change .....	2-2
2.2.1	Climatic extremes .....	2-2
2.2.2	Warming in high latitudes .....	2-2
2.2.3	Poleward advance of monsoon rainfall .....	2-2
2.2.4	Reduced soil water availability .....	2-2
2.3	Present-day vulnerability to climate .....	2-3
2.4	Regions of risk .....	2-3
2.5	Critical vulnerabilities in food trade .....	2-3
2.6	Potential effects on agriculture and land use .....	2-4
2.6.1	Types of effect .....	2-4
2.6.2	'Direct' effects of elevated CO <sub>2</sub> and other greenhouse gases .....	2-4
2.6.3	Effects of changes in climate .....	2-7
2.7	Likely adjustments in agriculture .....	2-17
2.7.1	Introduction .....	2-17
2.7.2	Changes in land use .....	2-17
2.7.3	Changes in management .....	2-18
2.7.4	Changes in policies of agricultural support .....	2-20
2.8	Effects of changes in sea-level .....	2-20
2.8.1	Scenarios .....	2-20
2.8.2	Vulnerability .....	2-20
2.8.3	Vulnerable regions .....	2-20
2.8.4	Direct impacts on agriculture .....	2-21
2.8.5	Indirect impacts on agriculture .....	2-21
3	Potential impacts on managed forests and the forest sector .....	2-22
3.1	Introduction .....	2-22
3.2	Managed and unmanaged forests .....	2-22
3.3	World forest sector and managed forests .....	2-23
3.3.1	World forest sector .....	2-23
3.3.2	Managed forests .....	2-23
3.4	Potential biophysical responses of forests to climate change .....	2-23
3.4.1	Forest protection .....	2-23
3.4.2	Shifts in climatic zones affecting forest ecosystems .....	2-25
3.4.3	Forest production and renewal .....	2-26
3.5	Role of forest management in potential forest responses to climatic changes .....	2-27
3.5.1	Managed forests .....	2-27
3.5.2	Agroforestry - managed forests with agriculture .....	2-27
3.5.3	Urban forests .....	2-28
3.5.4	Summary assessment of forest sensitivity to projected climatic changes .....	2-28
3.6	Socioeconomic implications of climatic changes on forests and the forest sector .....	2-30

4	Summary and conclusions .....	2-32
4.1	Agriculture .....	2-32
4.1.1	Effects on food security .....	2-32
4.1.2	Magnitudes of possible dislocation .....	2-32
4.1.3	The most vulnerable regions and sectors .....	2-33
4.1.4	The effect of altered climatic extremes .....	2-33
4.1.5	Effects on crop growth potential, land degradation, pests and diseases .....	2-33
4.1.6	Regional impacts .....	2-33
4.1.7	Rates of adaptability .....	2-34
4.1.8	Future tasks .....	2-34
4.2	Forestry - future deliberations .....	2-35

## Tables

Table 2.1	Forest land in area in 1980. Hectare and percaput data from Peck (1984) .....	2-24
Table 2.2	Summary of forest resources .....	2-25
Table 2.3	Yields from hybrid plantation species .....	2-28
Table 2.4	Performance of 15 species at Kaunamano, Ka'u, Hawaii Island, evaluated after 23 months (Schubert adn Whiteshell, 1989) .....	2-29
Table 2.5a	Summary of forest resources and forest management species (1986) .....	2-31
Table 2.5b	Roundwood production, imports, exports and their value .....	2-32

1	Introduction .....	3-1
1.1	Reasons for concern .....	3-1
1.2	Sensitive species and ecosystems .....	3-3
1.3	Analytical methodologies .....	3-3
1.4	Historical evidence .....	3-4
2	Direct impacts of elevated CO <sub>2</sub> .....	3-5
3	Changes in the boundaries of vegetation zones .....	3-6
3.1	Global overview .....	3-9
3.2	Specific vegetation zones .....	3-10
3.2.1	Boreal and tundra .....	3-10
	(i) Global warming of 2°C .....	3-10
	(ii) Global warming of 1°C .....	3-10
3.2.2	Montane and alpine .....	3-13
3.2.3	Temperate .....	3-13
3.2.4	Semi-arid and arid .....	3-14
4	Changes within ecosystems .....	3-14
4.1	Water balances in terrestrial ecosystems .....	3-14
4.2	Ecological interactions .....	3-16
4.3	Biological diversity and endangered species .....	3-17
4.4	Pests and pathogens .....	3-18
4.5	Disturbance variables .....	3-19
	4.5.1 Fire .....	3-19
	4.5.2 Soil and surface stability .....	3-20
4.6	Sea-level rise .....	3-21
5	Socioeconomic consequences .....	3-23
5.1	Unmanaged vegetation and forests .....	3-23
5.2	Biological diversity and endangered species .....	3-25
5.3	Wetlands .....	3-26
5.4	Wildlife and fish .....	3-27
5.5	Heritage sites and reserves .....	3-28
6	Future deliberations .....	3-28

## Table

Table 3.1	Current relative surface area and net primary productivity of various vegetation zones .....	3-12
-----------	--	------

## Figures

Figure 3.1a:	Changes in climate zones currently associated with specific vegetation (Leemans, 1989) - Western Hemisphere .....	3-31
Figure 3.1b:	Changes in climate zones currently associated with specific vegetation (Leemans, 1989) - Eastern Hemisphere .....	3-32
Figure 3.2a:	Potential changes in the distribution of the main tree species as a result of projected increases in temperature in the European part of the USSR along a transect at 50°E longitude (Velichko et al., 1990) -increase in global mean temperature of 0.8°-1°C ..	3-33
Figure 3.2b:	Potential changes in the distribution of the main tree species as a result of projected increases in temperature in the European part of the USSR along a transect at 50°E longitude (Velichko et al., 1990) -increase in global mean temperature of 1.8°-2°C ..	3-34

# **Chapter 4**

## **Hydrology and water resources**

**Co-chairmen:** I. Shiklomanov, H. Lins, E. Stakhiv and K. Mostefa-Kara

**Lead authors:** H. Lins, I. Shiklomanov and E. Stakhiv

**Contributors:** M. Ayers; M. Beran; F. Bultot; L. da Cunha; G. Demarée; B. Foxworthy; G. Griffiths; K. Hanaki; J. Kelman; R. Lawford; H. Liebscher; C. Liu; P. Mosley; B. Stewart; R. Street; T. Yamada

1	Introduction .....	4-1
2	Climate scenarios .....	4-1
3	Some physical aspects of hydrology and water resources .....	4-1
	3.1 Methodological approaches .....	4-1
	3.2 Changes in annual and seasonal conditions .....	4-2
	3.3 Water demand .....	4-3
	3.4 Water balance and lake levels .....	4-4
	3.5 Other hydrologic characteristics .....	4-4
4	Hydrologic and water resource changes in large regions and countries .....	4-5
	4.1 North America .....	4-5
	4.1.1 United States .....	4-5
	4.1.2 Canada .....	4-6
	4.2 Brazil .....	4-7
	4.3 Western Europe and Scandinavia .....	4-8
	4.4 Union of Soviet Socialist Republics .....	4-11
	4.5 Northern China .....	4-11
	4.6 Japan .....	4-12
	4.7 New Zealand .....	4-13
5	Case studies of effects in critical or sensitive environments .....	4-15
	5.1 Large water bodies .....	4-15
	5.1.1 The Great Lakes Basin (US/Canada) .....	4-15
	5.1.2 The Caspian Sea .....	4-16
	5.2 The arid and semi-arid zones of North Africa, including the Sahel .....	4-17
	5.3 Water conditions in critical agricultural regions .....	4-18
	5.3.1 The South Platte River .....	4-18
	5.3.2 The Murray-Darling Basin (Australia) .....	4-18
	5.4 Water conditions in intensively urbanised areas - the Delaware River Basin (USA) .....	4-21
	5.5 Regions of snowmelt-generated runoff: The Sacramento-San Joaquin River Basin (USA) .....	4-22
6	Conclusions .....	4-24

## Tables

Table 4.1.	Estimated hydrologic impacts of varying climatic change scenarios for Canada (Marta, 1989) .....	4-7
Table 4.2.	Estimated percentage changes in mean annual runoff at three sites in the UK in response to changes in temperature and precipitation, based on the Turc formula (Beran and Arnell, 1989) .....	4-10
Table 4.3.	Potential changes in seasonal runoff in response to a temperature warming of 1°C for selected rivers in the USSR .....	4-12
Table 4.4.	Estimated percentage changes in Great Lakes net basin supplies between current climatic conditions (1 x CO <sub>2</sub> or the BASE case) and doubled CO <sub>2</sub> conditions as simulated by the GISS, GFDL and OSU GCMs (Croley, in press) .....	4-16
Table 4.5.	Changes in components of the water balance of the Caspian Sea in response to global warming .....	4-17
Table 4.6.	Simulated percent of time in which the Delaware River Basin is in a drought warning or drought emergency condition for prescribed temperature and precipitation scenarios (Ayers et al., 1990) .....	4-22

# Chapter 5

## Human settlement; the energy, transport and industrial sectors; human health; air quality; and changes in ultraviolet-B radiation

**Co-chairmen:** M. Hashimoto, M. Styrikovich and S. Nishioka

**Lead authors:** C. Rouviere; T. Williams; R. Ball; Y. Shinyak; J. Topping; S. Nishioka; M. Ando; T. Okita

**Contributors:** P. Cheng; J. Connell; P. Roy; S. Safiullah; R.B. Street; H.L. Tebicke; P. Donat-Hader; K. Gertis; G. Jendritzky; E.G. Jung; F. Steimle; E. Tekulve; G. Waschke; A. Sugandhy; M. Iriki; S. Nishinomiya; N. Washida; R. Odingo; J.C. van der Leun; D.S. Wratt; W.H. Weihe; L.D. Grant; D. Guinnup; J.D. Longstreth; M. Oppenheimer; A. Teramura; M.P. Walsh; I. Nazarov; N.F. Vladimirova; A.F. Yakovlev; P.J. Waight; R. Ye

# Contents

1	Overview .....	5-1
	1.1 Introduction .....	5-1
	1.2 Direct impacts of global climate change on human activity .....	5-1
	1.3 Observed changes in global, regional and local climate .....	5-2
	1.3.1 Potential intensification of the urban heat-island effect .....	5-3
	1.3.2 The growth of desertification following land degradation .....	5-3
	1.3.3 Regional climatic implications of deforestation .....	5-3
	1.3.4 Trends in stratospheric ozone depletion .....	5-4
	1.3.5 Significance of rates of change .....	5-4
	1.4 Potential impacts of human response: strategies to limit emissions of greenhouse gases .....	5-4
2	Summary of likely impacts of climatic change on human settlement .....	5-5
	2.1 Scope and limitations of the assessment .....	5-6
	2.2 Assessment of impacts .....	5-6
	2.2.1 An overview of potential vulnerability of human settlement to rapid climate change .....	5-6
	2.2.1.1 Vulnerability of human settlement to sea-level rise .....	5-6
	2.2.1.2 Vulnerability of human settlement to tropical cyclones .....	5-7
	2.2.1.3 Vulnerability of human settlement to flood .....	5-7
	2.2.1.4 Vulnerability of human settlement to drought or water shortages .....	5-7
	2.2.1.5 Vulnerability of human settlement in some countries to loss of biomass .....	5-8
	2.2.1.6 Vulnerability of human settlement to rapid thawing of the permafrost .....	5-8
	2.2.1.7 Vulnerability of human settlement to health problems associated with climate change .....	5-8
	2.2.2 Implications of climate change for economic activity .....	5-8
	(i) Modification of supplies and consumption patterns .....	5-8
	(ii) Changes in the physical and social environment .....	5-9
	2.2.3 Migration and resettlement .....	5-9
	2.3 Determination of sensitivities .....	5-10
	2.3.1 Factors enhancing sensitivity to the impacts .....	5-10
	2.3.2 Spatial and social differentiation .....	5-11
	2.4 Tasks for the near future .....	5-11
3	Summary of likely impacts of climate change on the energy sector .....	5-11
	3.1 Scope and limitations of the assessment .....	5-11
	3.1.1 Definitions .....	5-11
	3.1.2 Geographic and substantive scope .....	5-11
	3.1.3 The relationships of expected impacts .....	5-12
	3.2 Assessment of impacts .....	5-12
	3.2.1 Industrial country energy demand .....	5-12
	3.2.2 Developing countries' electricity demand .....	5-13
	3.2.3 Implications for demand by particular utilities .....	5-14
	3.2.4 Implications for availability of hydroelectric power .....	5-14
	3.2.5 Other potential impacts .....	5-15
	3.3 Determination of sensitivities .....	5-16
	3.4 Tasks for the near future .....	5-16
4	Summary of likely impacts of climate change on transport .....	5-17
	4.1 Scope and limitations of the assessment .....	5-17
	4.1.1 Direct impacts of climate change .....	5-17
	4.1.2 Indirect impacts of climate change .....	5-17

4.1.3	Potential impacts on the transport sector of governmental regulations seeking to curtail emissions of greenhouse gases . . . . .	5-17
4.1.4	Potential impacts on transport sector of shifts in consumer patterns in order to curtail emissions of greenhouse gases . . . . .	5-17
4.2	Assessment of impacts . . . . .	5-17
4.2.1	Impact of climate change on airways . . . . .	5-17
4.2.2	Impact of climate change on waterways . . . . .	5-18
4.2.2.1	Impact of climate change on inland waterways . . . . .	5-18
4.2.2.2	Impact of climate change on ocean shipping . . . . .	5-20
4.2.3	Impact of climate change on roads . . . . .	5-20
4.2.4	Impact of climate change on railways . . . . .	5-21
4.3	Determination of sensitivities . . . . .	5-21
4.4	Tasks for the near future . . . . .	5-21
5	Summary of likely impacts of climate change on industry . . . . .	5-22
5.1	Scope and limitations of the assessment . . . . .	5-22
5.1.1	Direct impacts of climate change . . . . .	5-22
5.1.2	Indirect impacts of climate change . . . . .	5-22
5.2	Assessment of impacts . . . . .	5-22
5.2.1	Direct impact of climate change on particular industries . . . . .	5-22
5.2.1.1	Weather-dependent demand . . . . .	5-23
5.2.1.2	Weather vulnerable industry . . . . .	5-23
5.2.1.3	Climate-utilising industry . . . . .	5-23
5.2.1.4	Local resource-dependent industry . . . . .	5-24
5.2.1.5	Site-dependent industry . . . . .	5-24
5.2.1.6	Variability-dependent industry . . . . .	5-24
5.2.2	Indirect impacts of climate change on industry . . . . .	5-27
5.3	Determination of sensitivities . . . . .	5-27
5.4	Tasks for the near future . . . . .	5-27
6	Summary of likely impacts of climate change on human health . . . . .	5-27
6.1	Scope and limitations of the assessment . . . . .	5-28
6.2	Assessment of impacts . . . . .	5-28
6.2.1	General climate effect . . . . .	5-28
6.2.2	Heat stress . . . . .	5-28
6.2.3	Air pollution . . . . .	5-28
6.2.4	Chemical pollution . . . . .	5-29
6.2.5	Water quality and quantity . . . . .	5-29
6.2.6	Vector-borne diseases . . . . .	5-29
6.2.7	Ultraviolet-B radiation . . . . .	5-29
6.3	Determination of sensitivities . . . . .	5-30
6.3.1	General climate effect . . . . .	5-30
6.3.2	Heat stress . . . . .	5-30
6.3.3	Air pollution . . . . .	5-30
6.3.4	Chemical pollution . . . . .	5-30
6.3.5	Water quality . . . . .	5-30
6.3.6	Vector-borne diseases . . . . .	5-30
6.4	Tasks for the near future . . . . .	5-30
6.4.1	General climate effect . . . . .	5-30
6.4.2	Temperature stress . . . . .	5-30
6.4.3	Air pollution . . . . .	5-30
6.4.4	Chemical pollution . . . . .	5-31
6.4.5	Water quality . . . . .	5-31
6.4.6	Vector-borne diseases . . . . .	5-31
6.4.7	UV-B radiation . . . . .	5-31
7	Summary of likely impacts of global warming and stratospheric ozone depletion on air quality . . . . .	5-31
7.1	Scope and limitations of the assessment . . . . .	5-31
7.2	Assessment of impacts . . . . .	5-31
7.3	Determination of sensitivities . . . . .	5-32

8	7.4 Tasks for the near future .....	5-32
	Summary of likely impacts of increased UV-B radiation .....	5-33
	8.1 Scope and limitations of the assessment .....	5-33
	8.2 Assessment of impacts .....	5-33
	8.3 Determination of sensitivities .....	5-34
	8.4 Study tasks for the near future .....	5-34
	8.4.1 UV-B radiation .....	5-34
	8.4.2 Terrestrial plants .....	5-34
	8.4.3 Aquatic ecosystems .....	5-34
	8.4.4 Tropospheric air quality .....	5-35
	8.4.5 Materials damage .....	5-35

# Contents

1	Introduction .....	6-1
2	The socioeconomic and ecological impacts of sea-level rise and related climate change .....	6-1
	2.1    Introduction .....	6-1
	2.1.1    Methodological limitations .....	6-2
	2.2    Socioeconomic impacts: threatened populations in low-lying areas and island countries .....	6-2
	2.2.1    Inundation .....	6-2
	2.2.2    Agricultural losses .....	6-3
	2.2.3    Erosion and tourism .....	6-3
	2.2.4    Increased potential of coastal flooding .....	6-3
	2.2.5    Water supply and quality .....	6-5
	2.2.6    Infrastructure .....	6-6
	2.3    Ecological impacts: alteration and degradation of the biophysical properties of beaches, coral reefs, estuaries and wetlands .....	6-6
	2.3.1    Wetlands .....	6-6
	2.3.2    Background: importance of wetlands .....	6-7
	2.3.3    Redistribution of wetlands .....	6-7
	2.3.4    Changes in nutrients and chemicals .....	6-8
	2.3.5    Other ecological impacts of sea-level rise .....	6-8
	2.4    Physical aspects of shoreline retreat: inundation, erosion and recession of barrier islands, coral reefs and other shorelines .....	6-8
	2.4.1    Background .....	6-8
	2.4.2    Global projections of inundation and recession .....	6-9
	2.4.3    Shoreline erosion and stabilisation .....	6-9
	2.4.4    Examples of sea-level rise impacts on particular regions .....	6-10
3	The ecological and socioeconomic impacts of climate change on the world ocean .....	6-11
	3.1    Introduction .....	6-11
	3.2    Impact on physicochemical processes .....	6-11
	3.2.1    Impact of global warming on the heat budget and water circulation of the World Ocean .....	6-11
	3.2.2    Changes in the carbon cycle .....	6-13
	3.2.3    Changes in nutrients .....	6-13
	3.2.4    Changes in contaminants .....	6-14
	3.3    Ecological impacts .....	6-15
	3.3.1    Changes in habitats .....	6-15
	3.3.2    Changes in production/destruction processes and biosedimentation .....	6-15
	3.3.3    The role of ice in supporting polar ecosystems .....	6-16
	3.3.4    Regional aspects of the problem (the Bering Sea as an example) .....	6-17
	3.4    Palaeoecological studies and El Niño analogs .....	6-17
	3.5    Impacts on fisheries .....	6-18
	3.6    Socioeconomic impacts .....	6-19
	3.7    Impacts on navigation and territorial policies .....	6-20

# Contents

1	Introduction .....	7-1
2	Environmental impacts .....	7-2
	2.1 Seasonal snow cover .....	7-2
	2.2 Ice sheets and glaciers .....	7-4
	2.3 Permafrost .....	7-7
	2.3.1 Nature, extent and stability of permafrost .....	7-7
	2.3.2 Responses of permafrost to climatic changes .....	7-10
	2.3.2.1 Changes in permafrost distribution .....	7-12
	2.3.2.2 Implications of permafrost degradation .....	7-14
	2.3.3 Gas hydrates and methane .....	7-15
	2.4 Seasonally frozen ground .....	7-16
3	Socioeconomic consequences .....	7-16
	3.1 Seasonal snow cover .....	7-16
	3.2 Glaciers and ice sheets .....	7-17
	3.3 Permafrost .....	7-18
	3.4 Seasonally frozen ground .....	7-22
4	Future deliberations .....	7-22

## Tables

Table 7.1	Relative extent of terrestrial areas of seasonal snow cover, ice and permafrost (after Washburn, 1980a and Rott, 1983) .....	7-2
Table 7.2	Characteristics of the Greenland and Antarctic ice sheets (based on Oerlemans and van der Veen, 1984) .....	7-5
Table 7.3	Effect of terrestrial ice sheets on sea-level, adapted from Workshop on Glaciers, Ice Sheets and Sea Level: Effect of a CO <sub>2</sub> -Induced Climatic Change. National Research Council, 1985 and Meier, 1990 .....	7-8
Table 7.4	Estimates of methane hydrate resources (from Kvenvolden, 1988) .....	7-15

## Figures

Figure 7.1	Global distribution of permafrost .....	7-25
Figure 7.2	Schematic representation of the interrelations in the atmosphere - 'buffer layer' - permafrost system (Nieuwenhuijzen and Koster, 1989) .....	7-26
Figure 7.3	Projected changes in the distribution of continuous permafrost in the USSR as a result of a 2°C increase in mean annual global temperature .....	7-27
Figure 7.4a	Projected changes of permafrost in the USSR along a N-S transect at approximately 83°-85° E longitude (Velichko et al., 1990) .....	7-28
Figure 7.4b	Projected changes of permafrost in Canada along a N-S transect at approximately 100°W longitude (Velichko et al., 1990) .....	7-29
