

DESIGN WITH CLIMATE

BIOCLIMATIC APPROACH TO ARCHITECTURAL REGIONALISM

VICTOR OLGAYAY

some chapters based on cooperative
research with ALADAR OLGAYAY

PRINCETON UNIVERSITY PRESS
PRINCETON, NEW JERSEY

CONTENTS

PART 1. CLIMATIC APPROACH

- | | | |
|-------|--|----|
| I. | GENERAL INTRODUCTION | 1 |
| | The Earth and Life • Animal Life and Shelter • Human Life and Shelter • Adaptation of Shelter to Climate • Similarities Around the World • Community Layouts and Climate • Regional Character • Climate-Balance • To Find a Method • Summary | |
| II. | THE BIOCLIMATIC APPROACH | 14 |
| | The Effects of Climate on Man • Shelter and Environment • The Comfort Zone • Relation of Climatic Elements to Comfort • The Bioclimatic Chart | |
| III. | REGIONAL EVALUATION | 24 |
| | Climatic Evaluation by Region • Bioclimatic Needs by Region | |
| IV. | CLIMATIC ELEMENTS | 32 |
| | Factors in Weather • Radiant Heat Transfer | |
| V. | SITE SELECTION | 44 |
| | Microclimatic Effects • Effect of Topography • Natural and Built-Up Surroundings • Criteria for Site Selection | |
| VI. | SOL-AIR ORIENTATION | 53 |
| | Bound to the Sun • Recent Theories • Sol-Air Approach • Regional Adaptation • Regional Application | |
| VII. | SOLAR CONTROL | 63 |
| | The Structure • Transmission of Radiation and Heat • Economy of Shading Devices • Design of Shading Devices • Shading Effects of Trees and Vegetation • Obstruction of Surroundings • Summary of Method | |
| VIII. | ENVIRONMENT AND BUILDING FORMS | 84 |
| | Morphology in Nature • Impact of | |

PART 2. INTERPRETATION IN ARCHITECTURAL PRINCIPLES

	External Forces on Buildings • Criterion of Optimum Shape • Conclusions for Basic Forms of Houses • Regional Effects on Large Building Shapes • Morphology of Town Structures	
IX.	WIND EFFECTS AND AIR FLOW PATTERNS	94
	Wind and Architecture • Wind Analysis • Local Factors in Wind Orientation • Windbreaks • Flow Patterns Inside Buildings • Summary of Procedures in Wind Control	
X.	THERMAL EFFECTS OF MATERIALS	113
	Opaque Materials and Indoor Temperature Balance • Heat Entry on the Surface • Moisture Effects • Deterioration of Materials • Heat Transmission of Materials • Resistance Insulation, or Heat Capacity Effects • Time Lag and Calculation Methods • Balanced Insulation • Summary	
PART 3. APPLICATION	XI. HELIOTHERMIC PLANNING	126
	Comfort Criteria • Calculating Thermal Behavior of Structures • Method of Approach for Heliothermic Planning • Thermal Behaviors • Heat Analysis of Structures in Temperate Zone, Cool Area, Hot-Arid Area, Hot-Humid Area • Summation of Regional Conclusions	
	XII. EXAMPLES IN FOUR REGIONS	153
	Architectural Application to Community Layouts	
	APPENDIX A. Technical Notes	178
	APPENDIX B. The Thermoheliodon	180
	BIBLIOGRAPHY AND REFERENCES	186
	INDEX	189
