CONTENTS

Preface

Part One: Physical Relationships

1. Convective Heat Transfer from Leaves,
by J. Grace and M. Dixon 1
2. Flow Visualisation and the Study of Shelter Effects
for Vegetation at the Microscale,
by C.E. Wilson and J.M. Crowther 17
3. A Method of Determining the Thermal Resistance
of Poikilotherms from a Model of Heat Exchange
in Air and Water,
by C.V. Bell 37
4. Heat Loss and the Thermal Environment Outdoors,
by A.J. McArthur 49

Part Two: Animal Relationships

5. Effects of Previous Cold Exposure on the Cold Resistance
of Young Lambs,
by A.W. Stott 59
6. Shelter for Animals in Hot Countries,
by Ruth M. Gatenby 67
7. Shelter Studies using Thermal Models of Cattle,
by C.G. Jones and J.M. Bruce 83

Part Three: Plant Relationships

8. Wind and Plant Physiology – a Review,
by D.K.L. MacKerron and P.D. Waister 99
9. Wind and Surface Damage,
by C.E.R. Pitcairn and J. Grace 115

Part Four: Practical Case Histories

10. Some Effects of Shelter on the Yield and Water-use of Tea,
by M.K.V. Carr 127
11. Wind Protection in Traditional Microclimate Management
and Manipulation – Examples from East Africa,
by C.J. Stigter 145
12. The Effect of Climate on Plant Growth and Agriculture
in the Falkland Islands,
by J.H. McAdam 155
