Introduction to Meteorological Optics

R.A.R. Tricker

M.A., Ph.D.

AMERICAN ELSEVIER
PUBLISHING COMPANY INC.

NEW YORK

Mills & Boon

LONDON

Contents

| | Page |
|--|------|
| List of Plates | 5 |
| Preface | 9 |
| Chapter I Refraction in the Atmosphere | 11 |
| Chapter II The Heiligenschein | 24 |
| Chapter III The Rainbow. Geometrical Optics | 42 |
| Chapter IV Ice Particle Haloes | 70 |
| Chapter V The Corona | 146 |
| Chapter VI Supernumerary Rainbows | 169 |
| Chapter VII The Glory | 191 |
| Chapter VIII An Introduction to the Mathematical Theory of Waves and the Mie theory | 210 |
| Chapter IX Rayleigh Scattering | 230 |
| Chapter X Visibility | 246 |
| Appendix I The Airy Integral in Three Dimensions | 260 |
| Appendix II A Note on Bessel Functions | 262 |
| Appendix III A Note on Spherical Trigonometry | 269 |
| Appendix IV Verification of a Result used in Chapter X | 272 |
| Appendix V Maxwell's Equations in Curvilinear Coordinates | 274 |
| Appendix VI Rayleigh Scattering in Spherical Polar Coordinates | 277 |
| Index | 281 |
